The Human and Responsible Light

The relationship between humans, light and environment has always been central to Artemide's vision. Over the years, this principle has aimed not only at the well-being of the individual and his/her perception of spaces, but also it has confronted the environmental sustainability and it has focused on understanding the attention to nature and to all living beings.

Light is the source of life. It feeds man, space, and the whole Planet. It marks the rhythms of our lives. It is an element that can sustain and improve environmental, perceptive and social quality.

ADV Campaign, 1998

Innovation adds up values to the present in order to shape the future we want to inhabit.

Designing innovation means to offer a better alternative to what we already have, creating an interactive and responsive design that connects technology and science with humanistic contemporary culture.
Good design combines innovation, aesthetics, know-how, high quality of manufacturing and the greatest attention to the human and emotional relation with the object and the light effect. Design means project, not simply shape or style.

Sustainability

↪ Sustainable light design means to be responsible for our common future

Responsible design

Reduce to innovate: more with less. New project values become acts of responsibility towards the Planet and translate into a creative evolution: less material, no waste and less energy, without giving up performance, quality and beauty. A more efficient and critical approach that gets to the core of the project.

Enduring projects

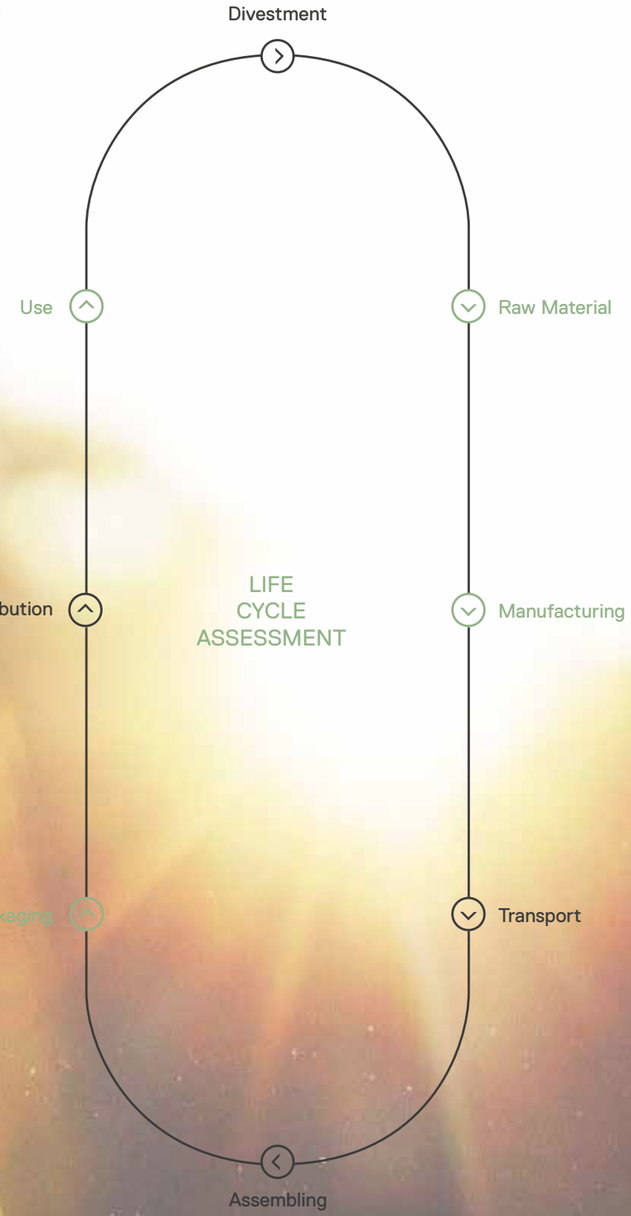

Enduring Project: the emancipation from the logics of consumption, through a lasting partnership with matter.
A careful selection of innovative materials and an intelligent project help create a dynamic emotional bond with the product.
Enduring project means quality.

Incremental system

Incremental System: the project as an open platform.
We intend the product as something that is never finished, an open positive system that can constantly grow through physical maintenance and the upgrading of parameters.

Re-connecting to nature

From energy to nature: re-connecting to nature. Light is indispensable energy for the life of humanity and all organisms. It has significant repercussions on nature by helping its growth and all the photo-biological processes. By studying light and its relation to humankind, space and environment, we can get towards the definition of a light that takes care of all living organisms.

→ Light is energy as well as matter. The attention to the sources, materials, optical solutions and efficient management choice is the key to have a correct energy balance.

Beyond spaces

↳ Transversal light solutions

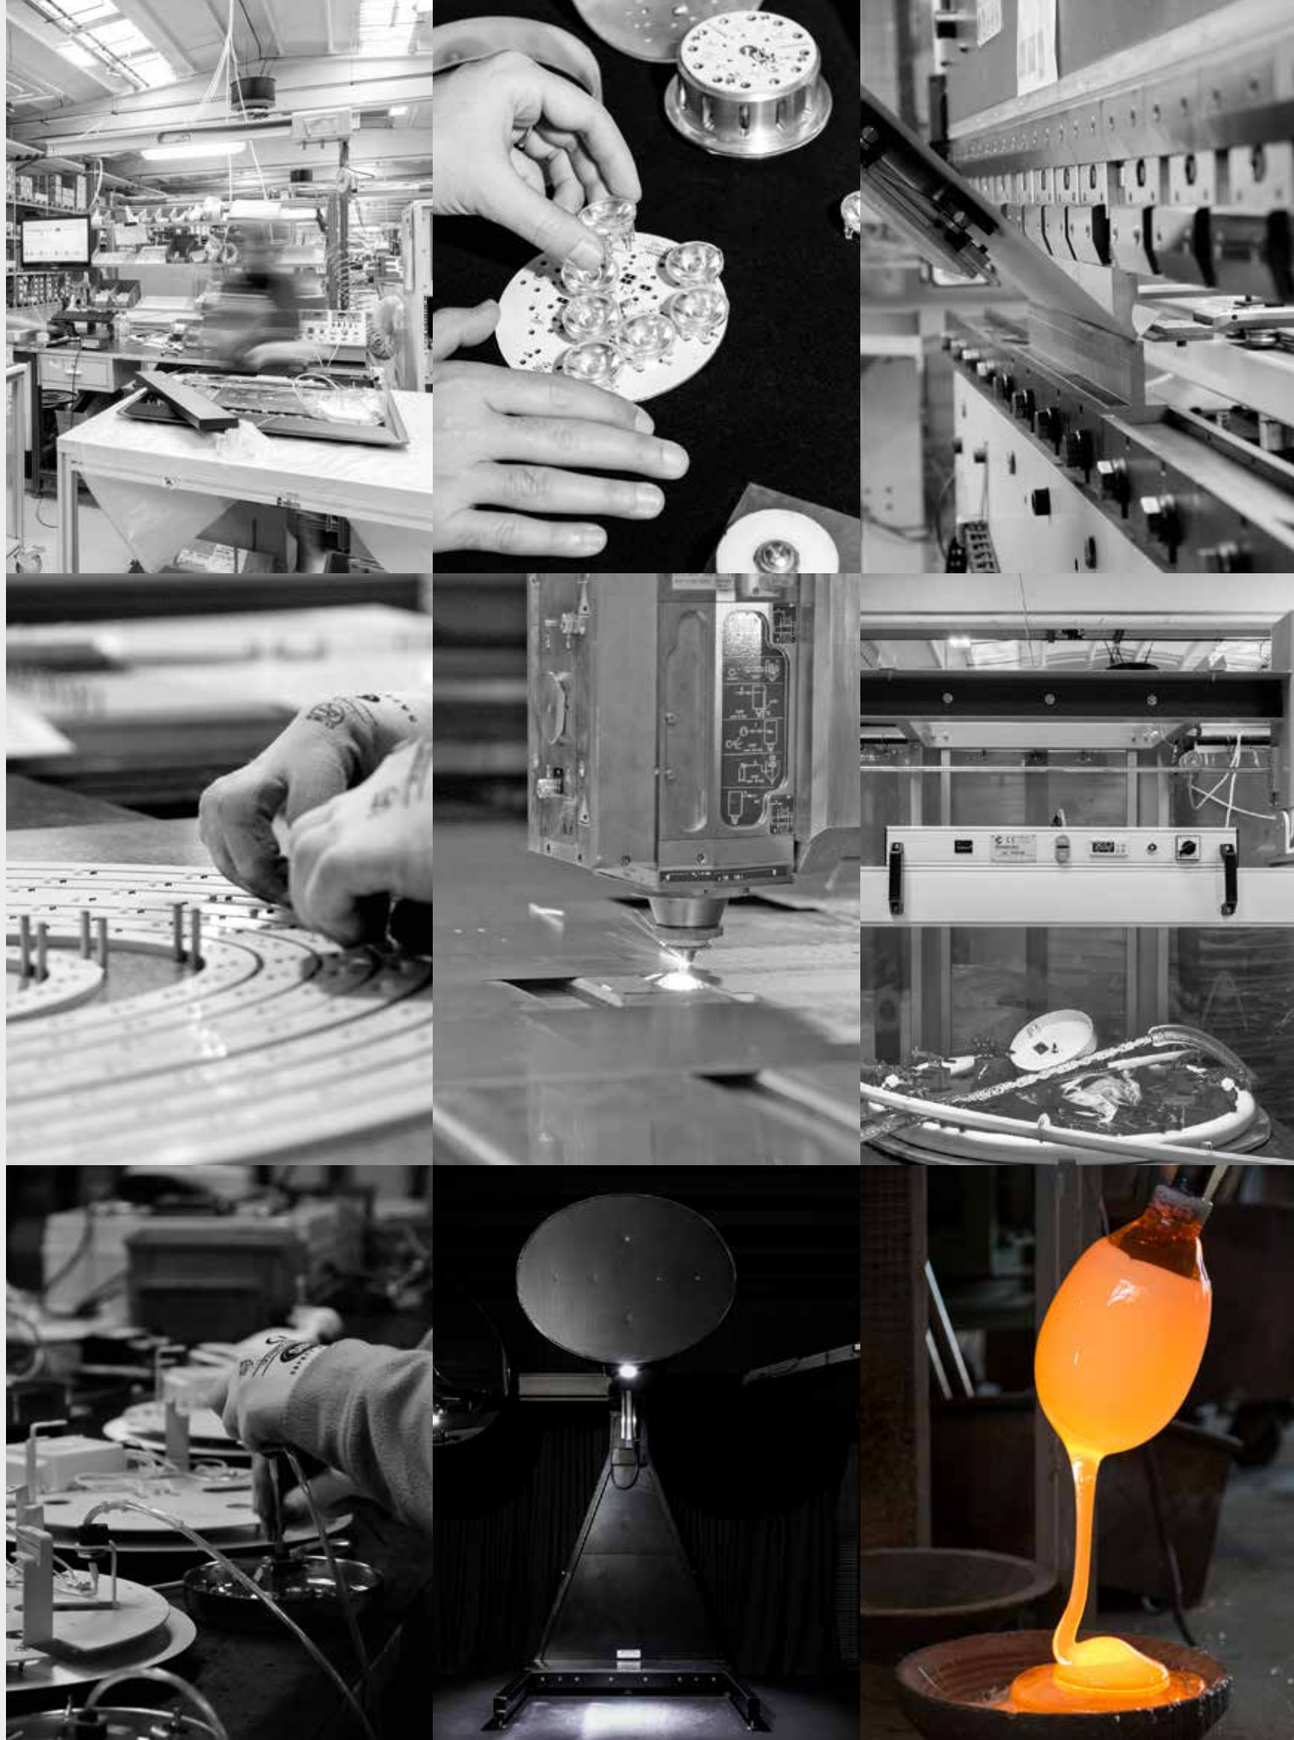

Let’s go beyond the classic separation between technical products and design products; let’s open a new transversal point of view on the light project and its applications. We can offer all-purpose and surprising solutions, translating innovation and high-tech performance into emotional perception. And create products that are perfect for both outdoor and indoor, or products for the office space that have an exciting, fascinating design.

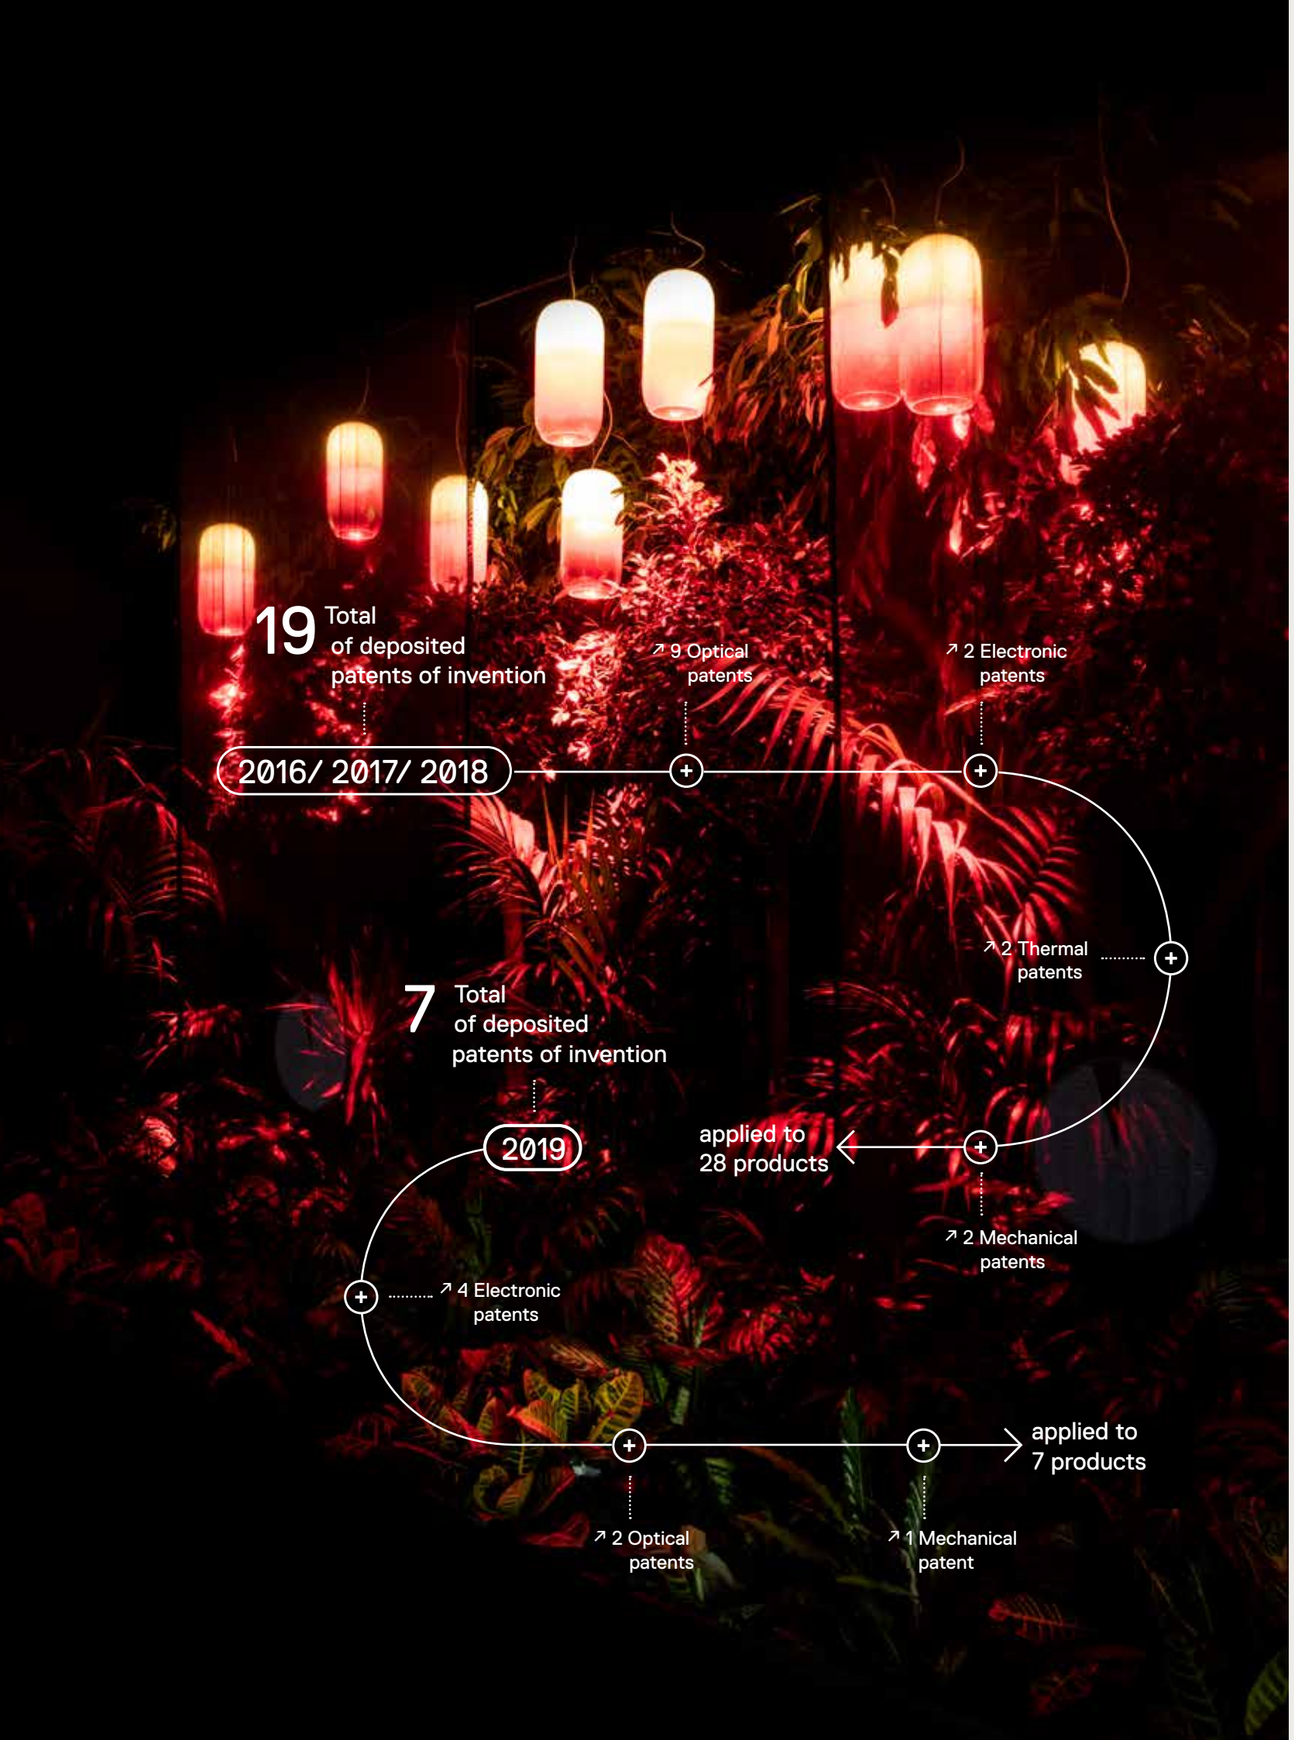

↑ Atelier Cazzaro costruzioni, Padova

Knowledge and manufacturing

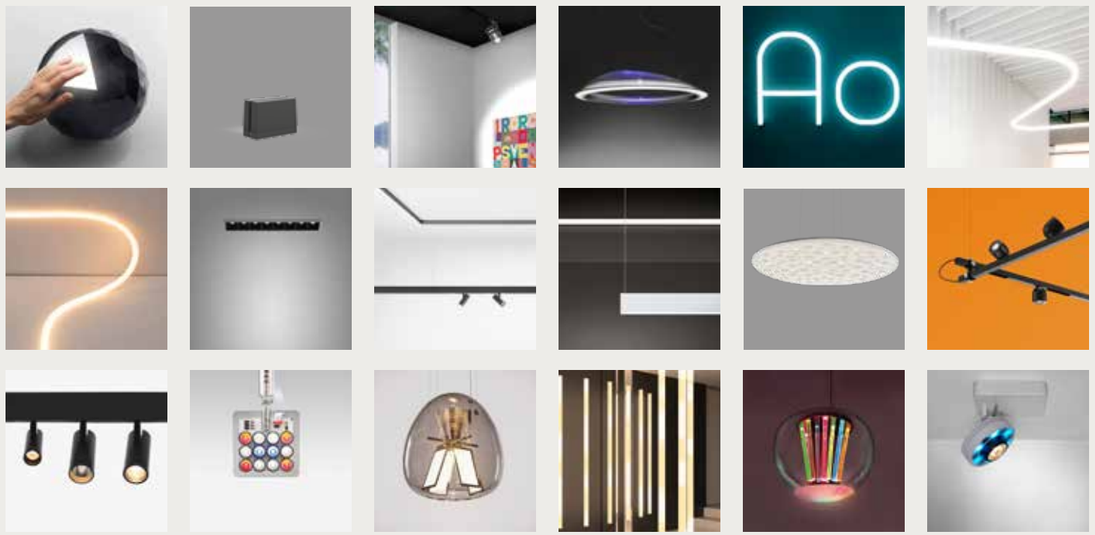

The Artemide collections are a unique blend of values and competences: the company's approach to human and responsible light is combined with design and material savoir faire to create a mix of next-generation technology, industry 4.0 and ancient wisdoms – a perfect expression of sustainable design.
Every Artemide product is completely developed in our Pregnana Milanese headquarter and made in Europe, to guarantee the best results of quality and conformity to international standards. Certified laboratories support research and every stage of the product development, from the preliminary study until the final release.
The culture of the project, the true value of Italian design, is the unique coincidence of scientific, technical and humanistic heritage knowledge.
Innovation, born from an interdisciplinary culture, is nourished by research and scientific thought, that is the ability to see things differently than before.

Patents of invention

Artemide opens up important research issues connected with photonics and new technologies to outline a future vision, a new way to interpret and experience light.
The time for technological transfer - from research to implementation - is gradually shrinking. All our patents of inventions are immediately applied to the catalogue's products.

Bespoke products

↗ Audi City Lab, Milan

↗ BIG Offices, New York

The world of project is our world. Project is our strong skill and we are always eager to work with new partners that can give us the opportunity to create special products. We can develop custom product solutions, both starting from existing versions and by designing and producing bespoke items. We have a dedicated custom department working together with the Research, Development and Innovation staff, to create new and different solutions and support them with services and intelligence.

Smart environment

↪ Wir verwandeln Raum in Orte

Licht ist ein Schlüsselelement in der Beziehung zwischen Mensch und Raum. Es kann zu neuen Erfahrungen und Emotionen beitragen, indem es unsere Räume neu qualifiziert und uns zu Autoren dynamischer und partizipativer Landschaften macht. Licht verstärkt unser Zugehörigkeitsgefühl, indem es jede Umgebung in den Ort verwandelt, an dem wir sein möchten.

Light has two identities

↳ Light is wavelenght

Light is wavelength. It is an invisible physical phenomenon that makes the world visible. Good light can follow and sustain the rhythmic flow of the lives, behavior and emotions of individuals by introducing them to a broader dimension for a new perceptive experience.
In its continuous relation between humanity and the environment, light is a material for the construction of space, delimiting territoriality and influencing our state of mind. Light has significant repercussions on the feeding of nature by helping its growth and favouring the photobiological processes that guarantee its survival.

↳ Light is quanta

Light is energy and it can also transmit data, information and intelligence sustaining man to interpret the space he lives in. Photonics is the science of the new millennium and it's remodeling the world as we know it. New technologies are developing at a tremendous speed, revolutionizing the design limits of light.

We design interactivity to generate interactions

Freedom

People are different, and so is their approach with light.
That's why we offer different solutions to manage this relationship: from the physical analogic interaction to the digital one made of sensors and apps, ours is a very simple principle: everyone must be free to determine his/her approach with light.
We are constantly developing new generations of products that express a parametric human-centered vision, in order to achieve a dynamic and positive experience.

→ Artemide App

→ Geo LI-FI

Artemide APP

Artemide designs products and services to allow a more advanced and flexible use thereof.
The Artemide App is a user-friendly and intuitive interface that can be used as a daily tool for private use and as well as a project variable for workplace and retail, public and urban spaces. Man is the centre of the project, the orchestra director of his light concerto.
All Artemide products can be Artemide App compatible.

→ **Managing up to 500 lighting fixtures, single or in groups**

→ **Connecting with Bluetooth Low Energy**

→ **Distance: bluetooth Android 25-30 m, Apple 15 m**

→ Cloud backup

→ Secured personal access

→ Multi-user: 1 administrator, more guests

→ Multidevices control for the same network

→ For tablet and smartphone

→ Bluetooth interface for DALI products - 40 addresses

Geo LI-FI

Artemide is able not only to design the right light for every space but also to propose innovative applications of the Geo Li-Fi technology introducing specific multi-level solutions for any application fields, generating unexpected experiences for engagement, interaction and inspiration.
Geo Li-Fi technology is not a product-specific standard solution but an open platform for the creation of new services. It's capable to be integrated into multiple products and systems within Artemide collections to combine the perfect lighting solution with an innovative interpretation of interaction.
The Geo LI-Fi App, especially designed by Artemide, processes and transforms the contents received through light into useful information, services, or interactions. It can also refer to external links, thus acting as a bridge towards more in-depth analyses that help us to interpret and understand spaces we live in.
It is able to support a contextualized, real-time and tailored experience for the single user giving the possibility to select specific information, marketing and communication contents.
They can be related for example to what we are lighting or directions to drive visitors through spaces.
Geo Li-Fi ensures much greater precision in tracking the position – within a few centimetres, rather than one metre. This allows very accurate and punctual localization of the position of the signal receiver.
The Geo Li-Fi technology can be used to provide information, as well as to collect data: it allows to create heat maps that recognize people in space, track their positions, record motion times and generate useful information on space use. It therefore works as a service for space users and as a tool for space operators.

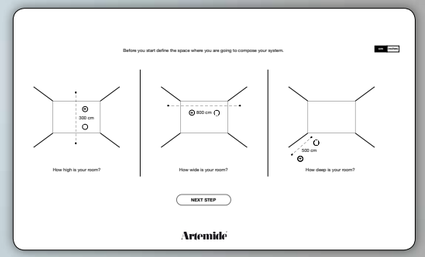

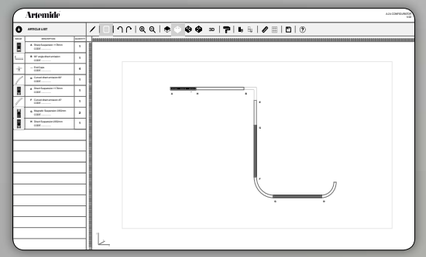

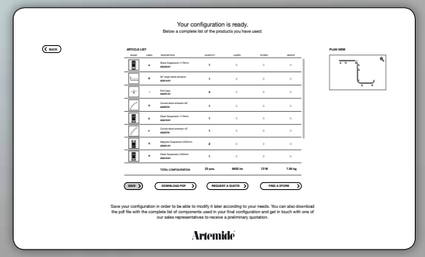

With Geo Li-Fi data is transmitted by the lamp through visible light, which is modulated according to the 0-1 binary signal, at the basis of all digital electronic communication. While the frequency of these light impulses cannot be perceived by the human eye, it generates a signal that the camera of any smart device can receive. Communication travels one way (from the lighting appliance to the device) and the bit rate is limited. The transmitted information should be quite "light" and therefore simple. It can be a static content, such as a message or an image, as well dynamic one, such as a video.

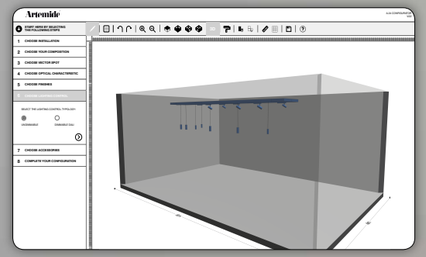

Two configurators
A.24
Alphabet of Light

Artemide provides tools to support the end customer and especially the lighting professionals in choosing the best lighting solution.
For an intuitive composition of the most complex systems, Artemide offers innovative and complete configurators on its website.
A24 and Alphabet of Light System Configurator are useful tools to simplify the design of your composition.
After defining the layout of the space, the desired system can be created by reconstructing it with a practical drag and drop of the various modules available.
Once the project is completed, the system returns a complete datasheet with all the details to proceed with the order.

Picto

Studio Artemide
↳ 2013

Showroom Poltrona Frau

Series of high-output LED adjustable projectors.

2 colours available.

Optical units available in 3 sizes, depending on the light source: 70 mm, 100 mm, 125 mm.

Defined narrow beams in the LED version, thanks to the hybrid optical system (Picto 125).

Picto 125 High Flux uses a high-yield reflective optical unit.

The new Picto High Flux improves the performance thanks to the high installed power and its high efficiency.

Picto 125 Tuneable White (LED): colour temperature can be adjusted from 2,900K to 5,500K – CRI>91 (min).

Adjustability: -90°/+90°, rotation up to 355°.

Precise aiming of the projectors, thanks to advanced locking system.

Wide range of accessories: UV filters, chromatic filters, louvres, asymmetric diffuser, adjustable dowsers, Gobo to project images or control shape of beam.

2 installation options: with 3-circuit track adapter (available for ceiling mounted option), or base plate for ceiling mounting.

Electronic power supply: with DALI dimmable, or non-dimmable options.

Materials: injection-moulded aluminium head, aluminium or polymer body, pure aluminium reflectors.

Compliant to EN60598-1 standard and other specific regulations.

LoT

Tapio Rosenius
↪ 2016

→ Patent of invention

LoT
↳ RGB white

LoT is a universal projector that changes the beam angles of emissions and flows dynamically, and produces coloured ambient light.

It is a multi-focal projector that ensures utmost flexibility with minimal dimensions.

Its dynamic luminous beam does not imply any mechanical movements, but is rather the result of innovative optoelectronic design. Seven lenses define four base beam angles and, when combined, can modulate countless beam angles and intensities through current change.

A well-calibrated mix of currents allows to adjust the beam angles of the emissions and to manage all intermediate angles with a very high resolution. Fluid and gradual changes are thus perceived through the management of a single DMX channel. 1 DMX channel is dedicated to adjusting the light intensity.

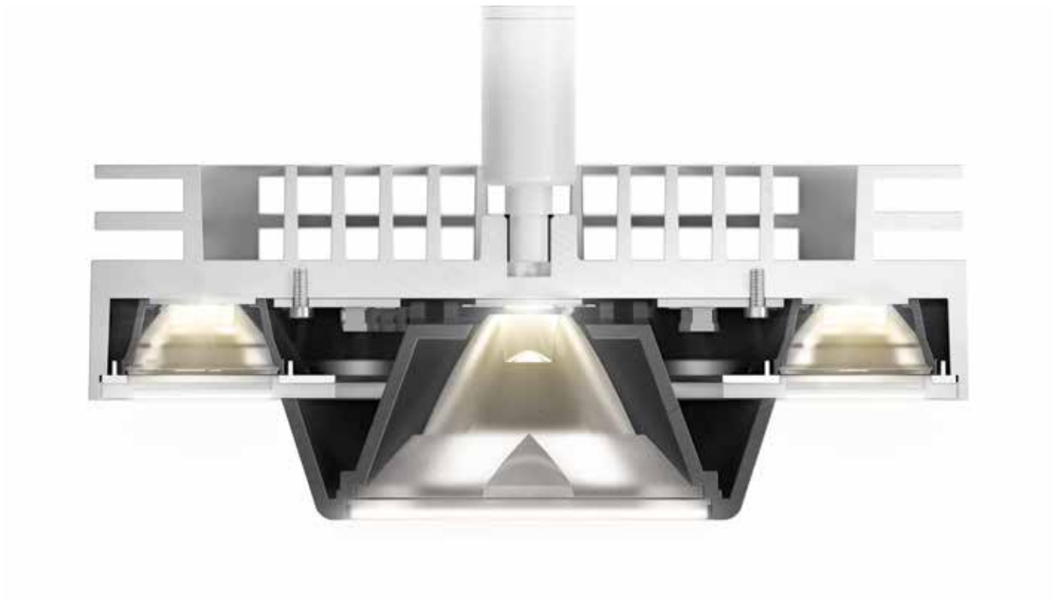

In addition to the white light projector function, LoT can produce coloured ambient light in the RGBW mode through 4 additional dedicated channels.

Uses TIR lenses.

The special heat sink allows to adjust the lighting power to ensure excellent illumination up to a 5 m distance.

Specifications and details can be obtained from the Artemide sales office.

For further information on LoT
↳ visit artemide.com

LoT

DMX

The LoT is an DMX RDM enabled device.

DMX stands for Digital Multiplex. It is simply a standard system of controlling lighting equipment and accessories.

The Remote Device Management or RDM is a protocol enhancement to USITT DMX512 and enables the bi-directional communication between a lighting controller and the connected RDM devices over a standard DMX line, for simple, convenient commissioning. The protocol allows the configuration (setting of the start address, patching, load personalities), status monitoring, firmware update and management of these devices.

The wiring infrastructure for DMX has been precisely defined and all installers must follow these rules. Pls refer to the Artemide DMX Brochure for detailed information.

The LoT fixtures can be controlled with Standard DMX controllers (not RDM enabled) as the DSC30 NL19030 or the DSC60 NL19081.The setup of the parameters has to be carried out with a RDM controller during or before the installation.

For smaller installations with small quantities, Artemide offers the possibility for a pre-setup (addressing,...) of the DMX RDM fixtures.

Artemide offers the on-site support for the RDM setup and the programming of the system. Refer to the technical department of Artemide SpA for further information or assistance.

CONFIGURATION FOR UP TO 32 LOT

At the beginning of every DMX line there must be a single DMX controller / transmitter.

This can have a max. of 32 standard devices connected over a max. cable length of 300m in a multi-drop bus topology commonly called a “daisy chain”.

The last DMX512 Output needs to be terminated with a 120 ohms resistor joining pins + and -.

CONFIGURATION FOR HANDLING MORE THAN 32 LOT

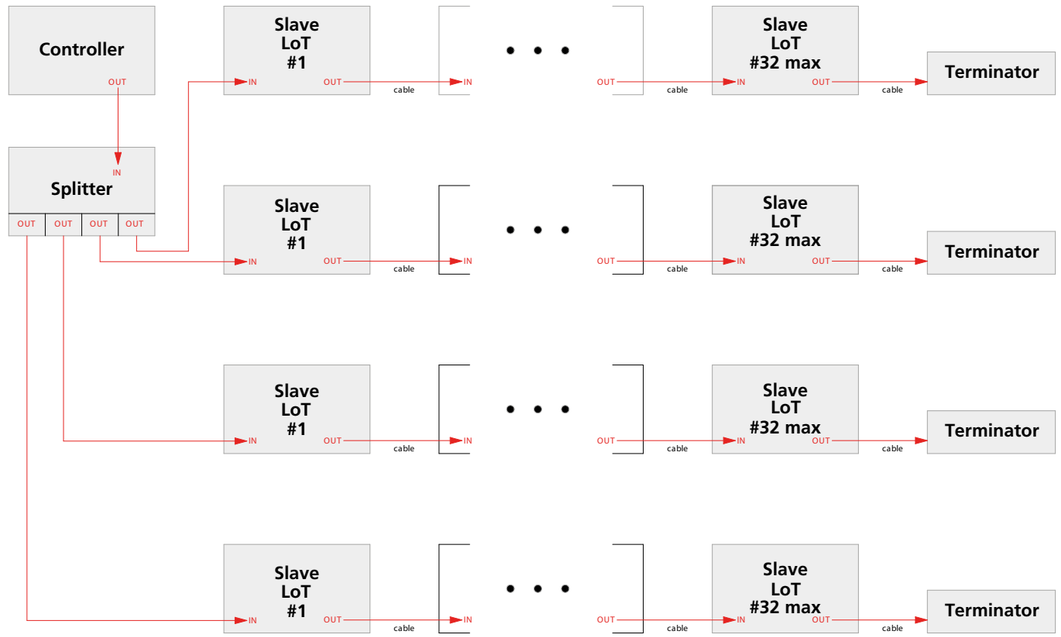

If more devices are required then a DMX splitter should be used.

The output of a DMX splitter is considered a new DMX line, with the same rules applying.

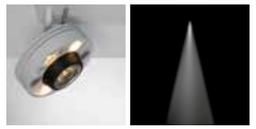

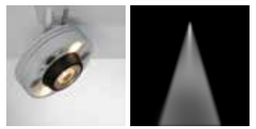

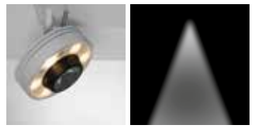

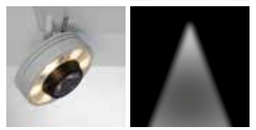

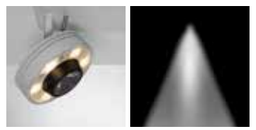

At the end of each DMX line a terminator should be fitted.

DMX fixtures are linked by ‘daisy-chaining’ cables; Y-Splits are not possible.

Pls. use RDM enabled DMX splitter for RDM light fixtures.

LoT
↳ Reflector

LoT Reflector is a universal projector that changes the beam angles of emissions and flows dynamically.

It is a multi-focal projector that ensures utmost flexibility with minimal dimensions.

Its dynamic luminous beam does not imply any mechanical movements, but is rather the result of innovative optoelectronic design. Seven lenses define 3 base beam angles and, when combined, can modulate countless beam angles and intensities through current change.

Each base beam angle has 3 different optical unit types: 3 for the narrow beam, 2 for the flood beam, and 2 for the extra flood beam.

A well-calibrated mix of currents on the 3 different channels allows to adjust the beam angles of the emissions and to manage all intermediate angles with a very high resolution. Fluid and gradual changes are thus perceived.

Footprint 1: white emission beam angle
Footprint 2: white emission intensity

Uses reflective optical units.

The special heat sink allows to adjust the lighting power to ensure excellent illumination up to a 12 m installation height.

Specifications and details can be obtained from the Artemide sales office.

Cata optical system

CATA

CATADIOPTRIC

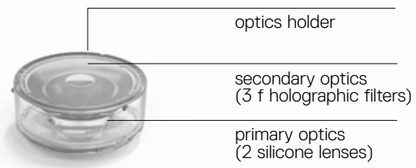

High axial intensities with considerable beam collimation.
High-precision accent lighting.
Well defined narrow beams.
Excellent light blending.

CATA TIR

TOTAL INTERNAL REFLECTION

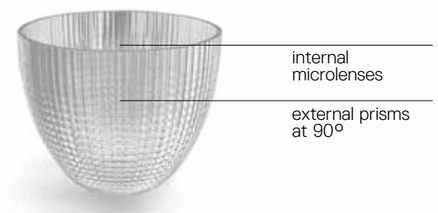

Extremely compact dimensions.
High efficiency.
Wide availability of beam angles.
Maximum control of light emission.
Wide range of optical accessories.

CATA WIDE

REFLECTIVE & REFRACTIVE

Soft, homogenous light.
High efficiency.
Diffused light effect produced by transparent material.

Interchangeable optical unit a ‘twist & lock’ mechanism.

Defined, concentrated light beams thanks to an innovative collimation system.

3 beam angles: S (9°), S (14°), XF (66°).

Excellent quality of light.

Cata Tuneable White: adjustable colour temperature from 2700K to 5700K CRI >93 (min.).

Cata Stable White: available as warm white (3000K) and neutral white (4000K) – CRI=80 (min.).

Rotation of 360°, tilt angle of +90°/-90°.

4 installation options: with adaptor for 3-circuit track (ceiling only as envisaged by legislation), with power unit for ceiling installation in the adjustable and fixed version, with power unit for suspension installation in the adjustable version.

Ultra-flat power source (8mm height): DALI dimmable as standard, DALI8 interface hub for Tunable White version.

If mounting on a track, it can be used with button on board unit with memory function.

In all the other mounting modes, optional SwitchDimm operation and resident button with memory function.

Materials: optic in transparent and metallic polycarbonate, heat sink in die-cast polished aluminium, feeder/power supply in transparent polycarbonate, arm in die-cast polished aluminium.

Complies with EN60598-1 standard and other specific standards.

OPTICAL UNIT

Cata is equipped with a system of interchangeable optics via a ‘twist and lock’ mechanism.

Olmo

Giulio Iacchetti
↪ 2015

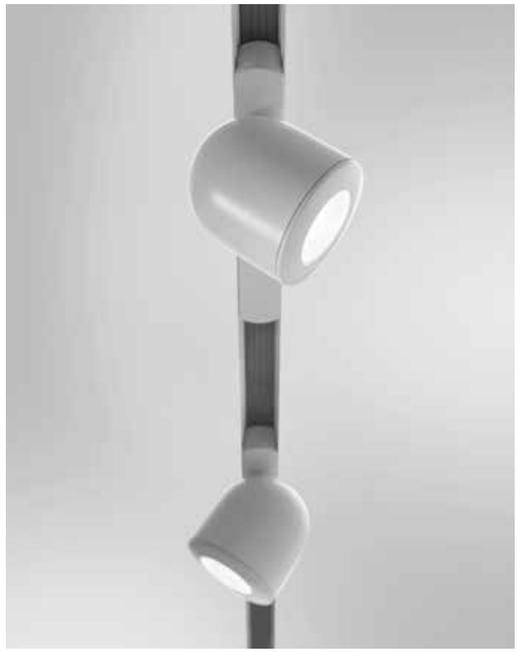

Olmo
is magnetic

48V magnetic track, max. 5 modules with 12 spots and one power unit.
The junction allows to join the parts at 360° horizontally or vertically.
Adjustable magnetic LED projectors.
DALI dimmerable and non-dimmerable version.

Artemide App
↪ on request

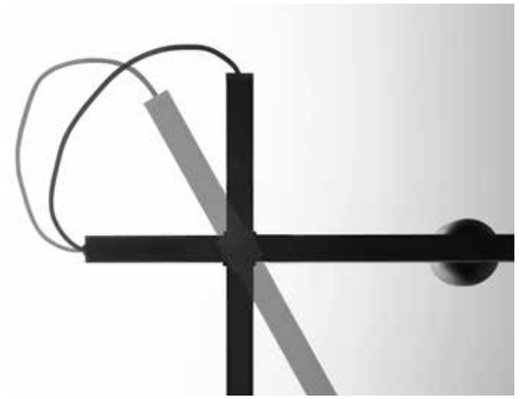

Olmo is a system based on a combination of plain optical and mechanical elements: a magnetic adapter and three luminous heads that offer different light beams. The track's structure has a C-section to ensure appropriate structural properties and accommodate an innovative printed circuit board within for power supply. Underneath is a thin iron edge that supports the luminous bodies with a magnetic joint. The suspension tracks ensure maximum mounting flexibility, in that they can be either connected with each other or installed vertically or horizontally, as are connected via an element that ensures power and mechanical connection. Olmo is therefore a system that grows freely and unpredictably to adjust its geometry, look, and lighting performance to space.

Caelum

Ernesto Gismondi
↳ 2013

Caelum is designed to provide a versatile lighting solution for the retail sector. It is a highly flexible, multi-functional system, with a high aesthetic and exceptionally high performance.

Caelum is a modular lighting system with an open recessed profile channel, which integrates perfectly with the architectural design.

Optional covers to delineate the channel.

The spotlight kits are available in 2 sizes: Ø 90 mm and Ø 120 mm (diameter of the optical assembly) and are provided with a swivel arm which allows total concealment of the spotlight or, if open, allows the partial or total extraction of the spotlight from the channel.

A double hinge system provides a high degree of regulation of the beam direction.

The spotlights are provided with an electronic power supply.

The extruded elements are installed along both edges of the ceiling cut, creating a channel that can be finished with an optional top cover.

Una Pro

Carlotta de Bevilacqua
↳ 2010

High-power LED lighting appliance mounted on a thin (3 mm) flat aluminium sheet with improved heat dissipation.

The patented dissipation system allows to touch the lighting body at all times for adjusting in space, thus establishing a new relation with light.

The heads can accommodate 9, 12, or 16-LED circuits.

Available with three different emissions: 6°, 20°, 38°.

The junction allows 358° rotation on two axes and 180° rotation on the third one.

Una Pro joints

The utmost flexibility of UNA PRO is ensured by a small junction that allows 358° rotation on two axes and 180° rotation on the third one, thus providing full freedom of movement of the three heads in space. Adjustment is easy; based on the study of heat dissipation, the sheet constituting the lamp's body can be freely touched for easy and intuitive adjustment of the light beam.

Flexibility also helps ensure perfect integration with any space and architectural approach. Una Pro can be an unobtrusive entity that stresses the importance of the emitted light, rather than of the appliance.

37 Cube

Carlotta de Bevilacqua
Paola di Arianello
↪ 2011

Minimal dimensions, material and energy consumption: 37mmx37mmx37mm.

Effective and precise accent lighting with only 8W of total power consumption.

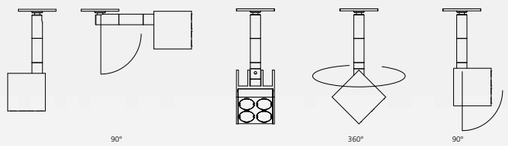

Maximum flexibility: rotation 360°, tilt angle +90°/-90°.

2 installation options available: with control gear for mounting within Algoritmo product range or base plate for semi-recessed installation.

Option of installation inside Algoritmo modules.

Materials: body in anodised aluminium, translucent cover in polycarbonate.

Complies with EN60598-1 standard and other specific standards.

Compact dimensions:
PAD, 85mm x 170mm x 16mm
PAD Square,168mm x 170mm x 16mm

Ultra-flat power source (8mm height): high efficiency and extraordinary versatile power input from 100 to 240v, 50 and 60 Hz.

Optimized thermal management: passive cooling system based on the extension of aluminium surface and partition of the LED sources (PAD 12 LED-12W PAD SQUARE 24 LED-24W).

2 sizes and power:
PAD (12LED-14,5W total load, 85mm x 170mm x 16mm)
PAD Square (24LED-29W total load,168mm x 170mm x 16mm).

4 installation options: with adaptor for 3-circuit track, with gear plate for mounting within Algoritmo product range, wall/ceiling mounted version, or base plate for semi- recessed mounting.

Wall/ceiling and semi-recessed versions available with SwitchDim.

Materials: body in extruded aluminium, transparent cover in polycarbonate, translucent cover in polycarbonate, joint in die-cast aluminium.

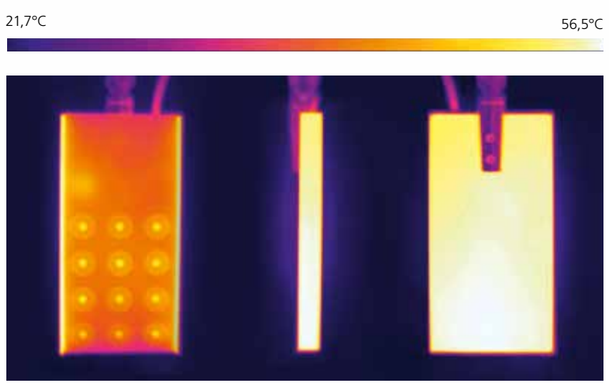

Complies with EN60598-1 standard and other specific standards.

The system is a 3 phase mixed system with two additional conductors intended to manage a general data signal (for example DALI, DMX, Ion, eib, etc.).

The system is EN 60570 certified and its installation must be accomplished by highly qualified person.

There are four possible installation systems: directly on ceiling or on wall, using the needlepoints on the track, on ceiling or on wall using a metal clip, hanging by the suspension or recessed without exceeding the maximum loads.

↳ EXTERNAL 3-PHASE TRACK 230V - EUTRAC

White **2.** Black **3.** Aluminium **7.**

Three-circuit track for surface mounting.

Extruded aluminium profile in white, black or aluminium finish.

Supplied in lengths of up to 4m, cut to measure.

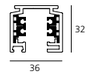

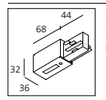

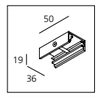

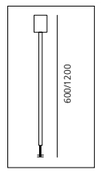

2 versions: standard version with 5 conductors (1 earth, 1 neutral, 3 phases) each with a 2.5mm² section, or DALI version with 2 additional conductors allowing dimming of lights fitted with DALI dimmable control gear.

Maximum intensity: 16a across the 3 circuits.

Track is pre-cut every 33cm for fixing.

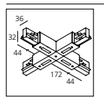

Wide range of accessories, power supply components and electrical and mechanical connectors.

↪ RECESSED 3-PHASE TRACK 230V - EUTRAC

White **2.** Black **3.**

3-phase track for recess mounting.

Extruded aluminium profile in white, black or aluminium finish.

Supplied in lengths of up to 4m, cut to measure.

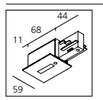

2 versions: standard version with 5 conductors (1 earth, 1 neutral, 3 phases) each with a 2.5mm² section, or DALI version with 2 additional conductors allowing dimming of lights fitted with DALI dimmable control gear.

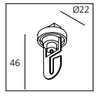

Maximum intensity: 16a across the 3 circuits.

Track is pre-cut every 33cm for fixing.

Wide range of accessories, power supply components and electrical and mechanical connectors.

↪ INSTALLATION DIAGRAMS

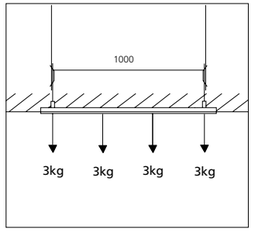

LOAD OF TRACKS WITH SPOTLIGHTS IN RELATION TO FIXING POINTS (INCLUDES THE WEIGHT OF THE TRACK)

Three-circuit track for pendant mounting with fixing points every 0.5m.
(Can also be used for recessed installation).

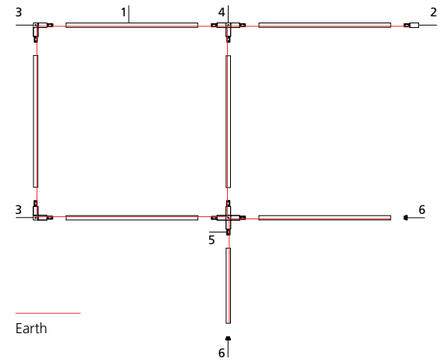

Three-circuit track for ceiling mounting with fixing points every 0.33m.

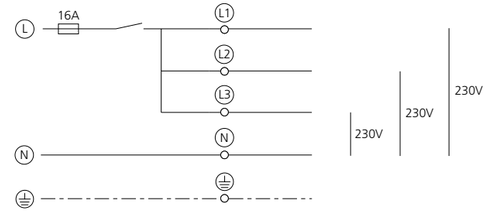

Three-circuit track for recessed installation with fixing points every metre.
(Can also be used for pendant mounting).

EARTH CONDUCTOR DIAGRAMS

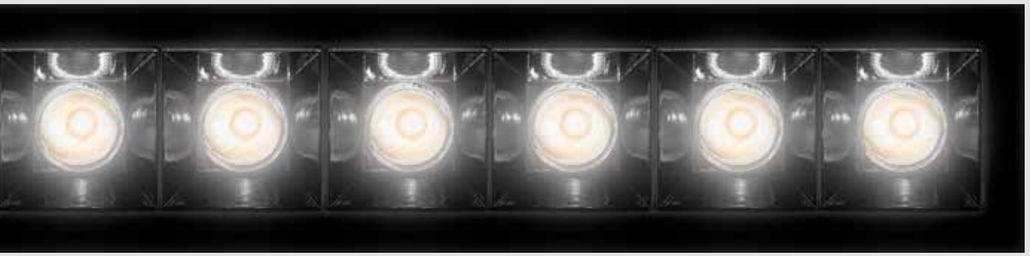

1 Standard three-circuit track.
2 Power supply end cap, earth conductor on left.
3 90° joint, internal earth conductor.
4 3-way joint, earth conductor on left.
5 4-way joint.
6 Closure end cap.

ELECTRICAL DIAGRAM FOR ALTERNATING CURRENT 230V (220-240V)

Maximum W allowed: 3600W (max 16A total).
The load can be distributed over the 3 circuits as required.
Protection fuse: 1x16A.
Power supply cable section: min 3x1.5mm² - max 3x2.5mm².

Sharp

Carlotta de Bevilacqua
↪ 2016

A patented high-efficiency optical system combining a polynomial optical unit with geometric screening of the beam's viewing angle.

Highly uniform lighting and full emission control.

Total absence of any lighting defects, such as spots or multiple shadows.

Recess depth 60 mm.

Suited for 1 to 25 mm ceilings.

Available in the trim, trimless and SMD versions.

→ PATENT PENDING

For further information on Everything
↳ visit artemide.com

Artemide App
↳ on request
Only for 105/150 version

5 dimensions: 35 mm, 55 mm, 80 mm, 105 mm, 150 mm.

Different options available: fixed or adjustable (excluding Everything 35), round or square, trim or trimless.

LED versions use an optical system based on a hybrid technology (lens and reflector) producing defined beams with high-power LEDs.

The extruded aluminium heat sink guarantees great thermal management, long life and high efficiency, while providing maximum luminous flux.

Adjustable versions (excluding Everything 80 option) are equipped with a blocking system to guarantee perfect framing.

Rotation up to 360°, beam angle +30°/-30°.

Separate electronic driver: non-dimmable or DALI dimmable options for LED products.

Compliant with standard EN60598-1 and other specific regulations.

Una Pro 75

Carlotta de Bevilacqua
↪ 2010

High-power LED lighting appliance mounted on a thin (3 mm) flat aluminium sheet
with improved heat dissipation.

Each head accommodates 4-LED circuits.

Available with three different emissions: 6°, 20°, 38°.

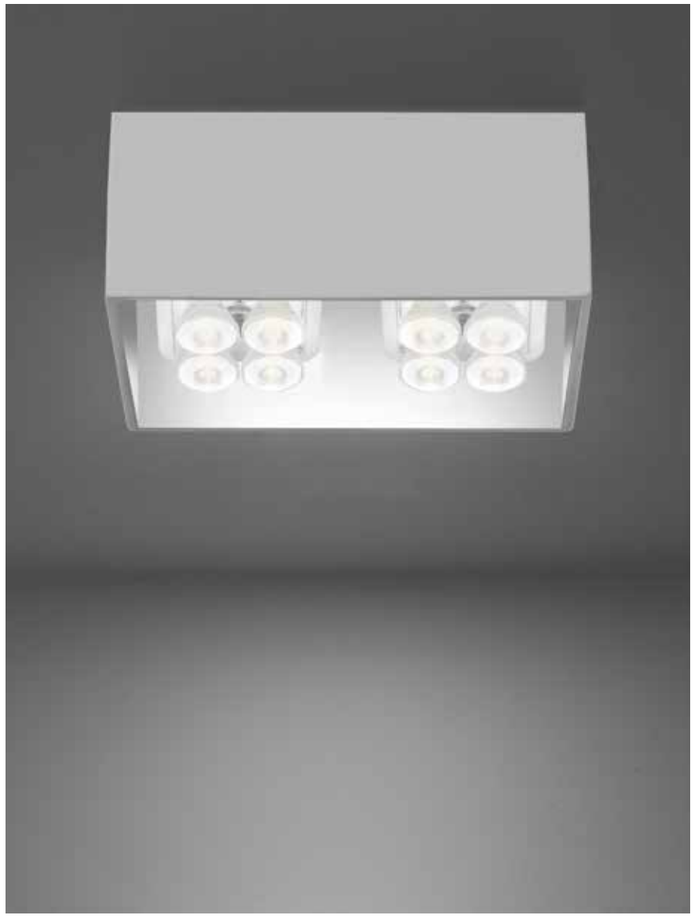

The different versions feature 1 or 2 heads.

The junction allows 360° rotation and 30° tilting in all directions.

The addition of a clear cap with magnetic joint allows to reach protection rating IP44.

Una Pro 75 joint

The junction allows 360° rotation and 30° tilting in all directions. This movement is suited either to reach any individual points on horizontal or vertical surfaces requiring accent light or to evenly distribute the emitted light through space.

Each 4-LED head in the multiple compositions can be adjusted individually, so that each light beam can be directed independently of the others to stress different points in space by installing one appliance.

Pad 80

Carlotta de Bevilacqua
↪ 2012

Pad 80 typologies

Efficient, clear accent lighting, fixed and adjustable.

Excellent lighting efficiency > 70lm/W.

High adjustability: 360° rotation, +90°/-90° tilt angle.

Fixed version available as IP44.

Easy installation of light modules, no tools required.

Lighting units available in 3 finishes: gloss aluminium, painted white, painted black.

Structural elements of recessed-mounted version available in 3 sizes, for use with 1, 2, 3 and 2x2 modules. 3 compatible finishes (polished aluminium, white, and black).

Housing of ceiling-mounted version available in 3 sizes (1, 2, 3 lighting units), and 3 compatible finishes (polished aluminium, white and black).

Recessed-mounted version available as trimless or framed.

Materials: body in anodised extruded aluminium, diffuser in opal polycarbonate.

Complies with standard EN60598-1 and other specific standards.

Rounded edge trim

Luceri
↳ Round

Recessed fixed downlighters using high-output LEDs.

Two versions: trim (with bezel) and Trimless (recessed ceiling mounted without bezel)

Materials: bezel, white reflector and screens in polycarbonate, reflectors in vacuum-metalled polycarbonate with anti-scratch surface treatment.

Standard version IP44.
IP54 with the addition of an optional screen.

Compliant to standard EN60598-1, EN62471 and other specific standards.

Luceri trim

Complete with optic housing and trim.

Trim available in white, black or grey.

Professional mirror optic with UGR Luminance Control <19 for office spaces with computer screens.

Installation brackets for an easy, tool-free installation on false ceilings of thicknesses between 1 and 25 mm.

Optional screens in transparent polycarbonate, easy to install, opal and prismoptic diffuser, with a 90 degree turn.

Wide beam symmetrical distribution.

Luceri trimless

2 available trims:
Sharp edge
Rounded edge

2 available optic housings.

Professional mirror optic with UGR Luminance Control <19 for office spaces with computer screens.

Comfort white optics.

Optics housings and trim to be ordered separately.

Optional screens in transparent polycarbonate, easy to install, opal and prismoptic diffuser, with a 90 degree turn.

Wide beam symmetrical distribution.

Grey frame

Black frame

Sharp edge trim

Rounded edge trim

Luceri
↳ Kadro

Recessed fixed downlighters using high-output LEDs.

Two versions: trim (with bezel) and Trimless (recessed ceiling mounted without bezel)

Materials: bezel, white reflector and screens in polycarbonate, reflectors in vacuum-metalled polycarbonate with anti-scratch surface treatment.

Standard version IP44.
IP54 with the addition of an optional screen.

Compliant to standard EN60598-1, EN62471 and other specific standards.

Luceri trim

Complete with optic housing and trim.

Trim available in white, black or grey.

Professional mirror optic with UGR Luminance Control <19 for office spaces with computer screens.

Installation brackets for an easy, tool-free installation on false ceilings of thicknesses between 1 and 25 mm.

Optional screens in transparent polycarbonate, easy to install, opal and prismoptic diffuser, with a 90 degree turn.

Wide beam symmetrical distribution.

Luceri trimless

2 available trims:
Sharp edge
Rounded edge

2 available optic housings.

Professional mirror optic with UGR Luminance Control <19 for office spaces with computer screens.

Comfort white optics.

Optics housings and trim to be ordered separately.

Optional screens in transparent polycarbonate, easy to install, opal and prismoptic diffuser, with a 90 degree turn.

Wide beam symmetrical distribution.

LUCERI KADRO TRIMLESS

White | XF

220/240Vac 50/60Hz supplied separately.

Fitting to be completed with installation frame.

Picto Recessed

Studio Artemide
↪ 2018

Set of fixed recessed downlight equipment using high efficiency LEDs

Available in one dimension with two different power ratings, each with two opening angles of the light beam (flood and wide flood).

Dali dimmable or non dimmable driver not included.

Available in two finishes: painted white or silver.

Technical features of the equipment compliant with EN60598-1.

ENEC certification.

Parabola

↪ 2010

Light fixture with high-performance LED light sources.
Consists of: frame, body, lens, fixing springs.
Frame in injection mould of aluminium.
Heat sink body in extruded aluminium.
Lens in policarbonate with 3 different versions of beam.

Fixing springs in harmonic steel.
Electrical connection to the driver by means of a FEP-FEP cable and a terminal board.
Technical features of light fixtures in compliance with EN60598-1.

Zeno Up

Jan Van Lierde
↪ 2011

Light fixture with high-performance LED light sources.

Low recessed depth.

Consists of: body, frame, black silkscreened tempered glass, fixing springs.

Body in EN AB44100 aluminium, silicone gaskets.

Frame in aluminium.

Black silkscreened tempered glass, 4mm-thick.

Fixing springs in harmonic steel.

Power connection to the mains by means of a H05RN-r cable and IP68 electrical terminal board, supplied with the fixture.

Glass surface temperature lower than 40°C.

Fixed optics. PMMA lenses in 2 different versions of beams.

Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxydant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1.

A.24
↳ Magnetic

A.24 Magnetic is Artemide SELV

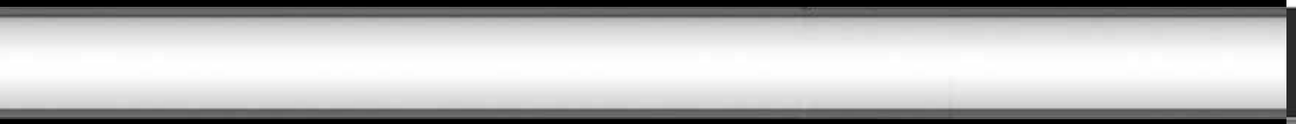

a unique feature developed for a real safe DALI interface.

D.art® is a technology patented by Artemide that overcomes the safety limits of the DALI signal in devices where the same signal is accessible to the touch.

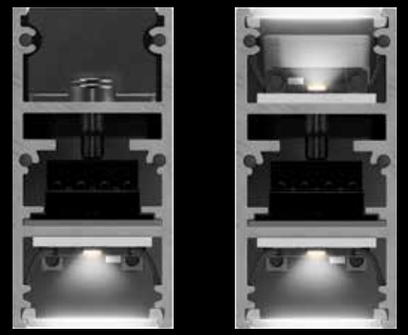

The DALI signal is transformed to an “SELV” voltage ensuring the total safety of the appliance.

A.24 has been designed in compliance with international certifications.

is balanced

NO TRACK'S ROTATION WHEN THE SPOTLIGHTS ARE TILTED IN THE SAME DIRECTION.
SUSPENSION CABLE NO STIFF STEMS.

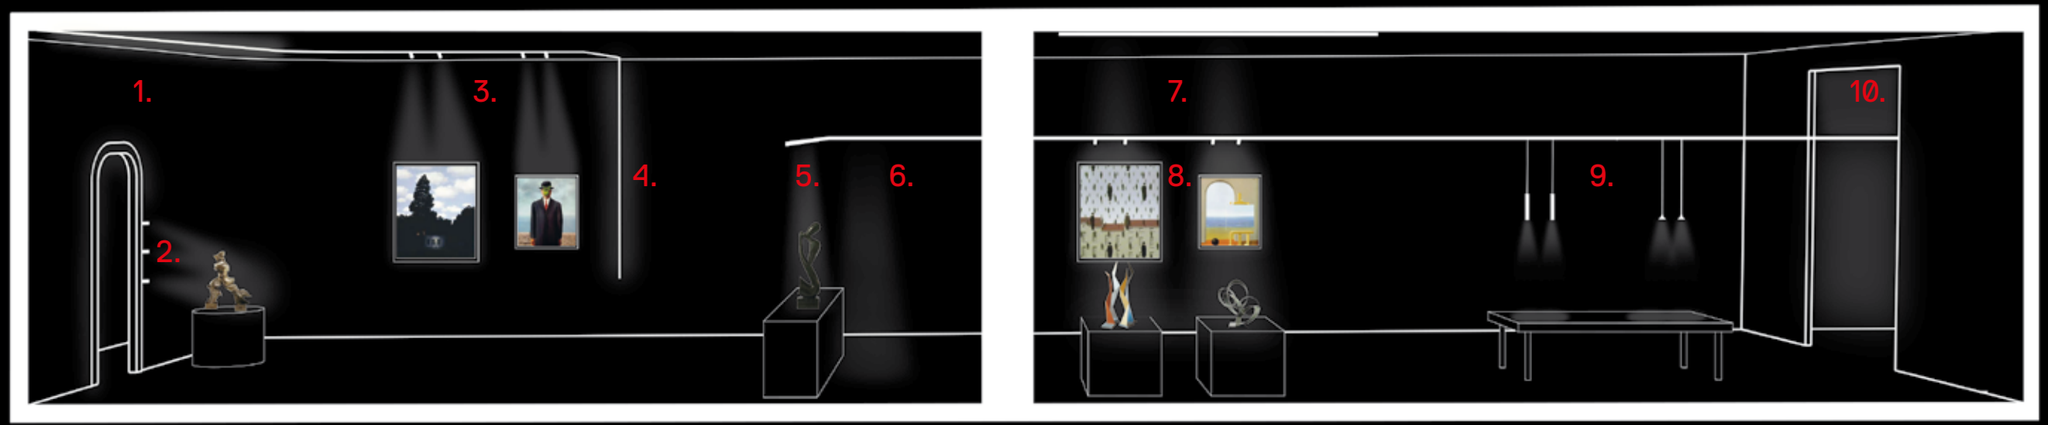

The junction arm is integrated with the spotlight body.

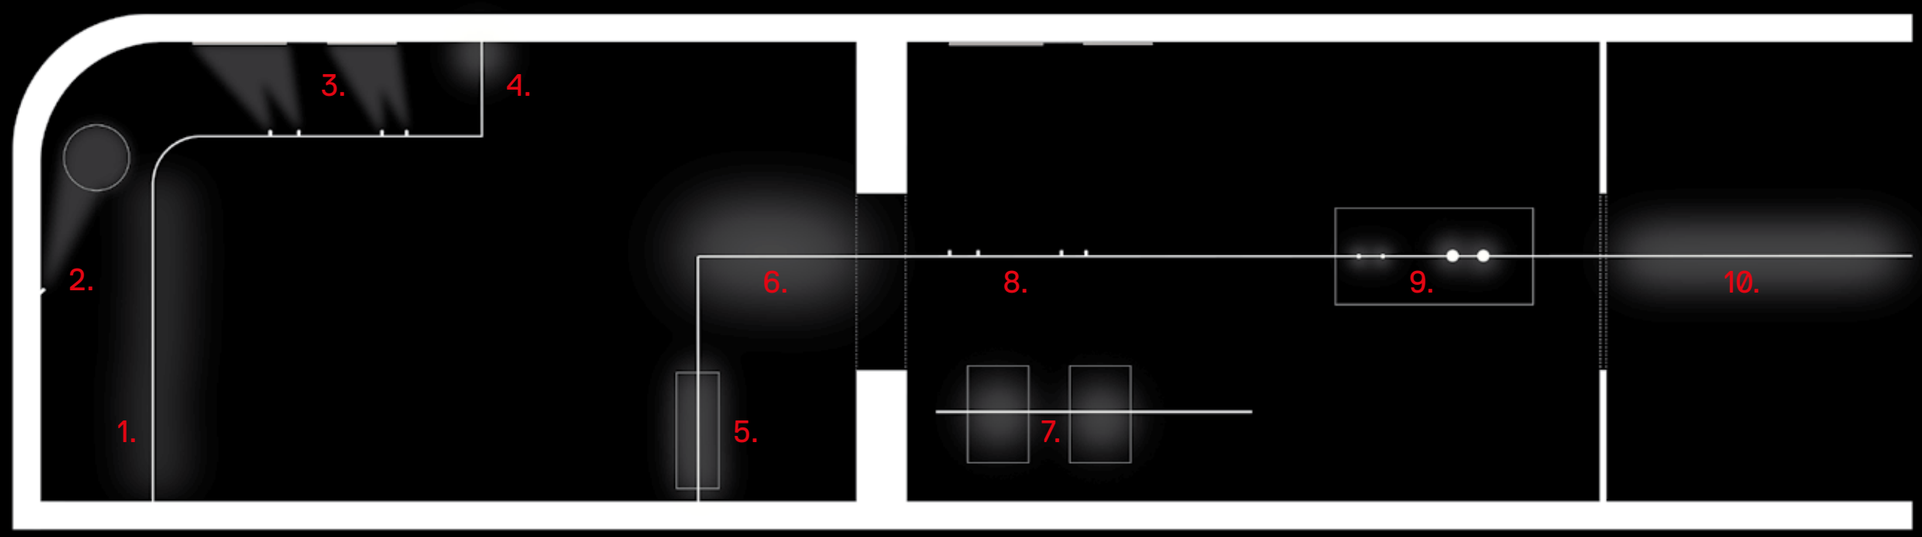

The center of balance is perfectly aligned with the track.

The pivoting and arm orientation are lockable.

A.24 / Vector infinite possibilities

1. A.24 Recessed diffused emission
2. Vector 40 magnetic
3. Vector 55 magnetic
4. A.24 Ceiling - wall diffused emission
5. A.24 Suspension sharping emission 24º
6. A.24 Suspension diffused emission
7. A.24 Suspension sharping emission 64º
8. Vector 55 zoom magnetic
9. Vector 40 /Unterlinden magnetic pendant
10. A.24 Suspension indirect diffused emission

A.24
pre-configurated modules

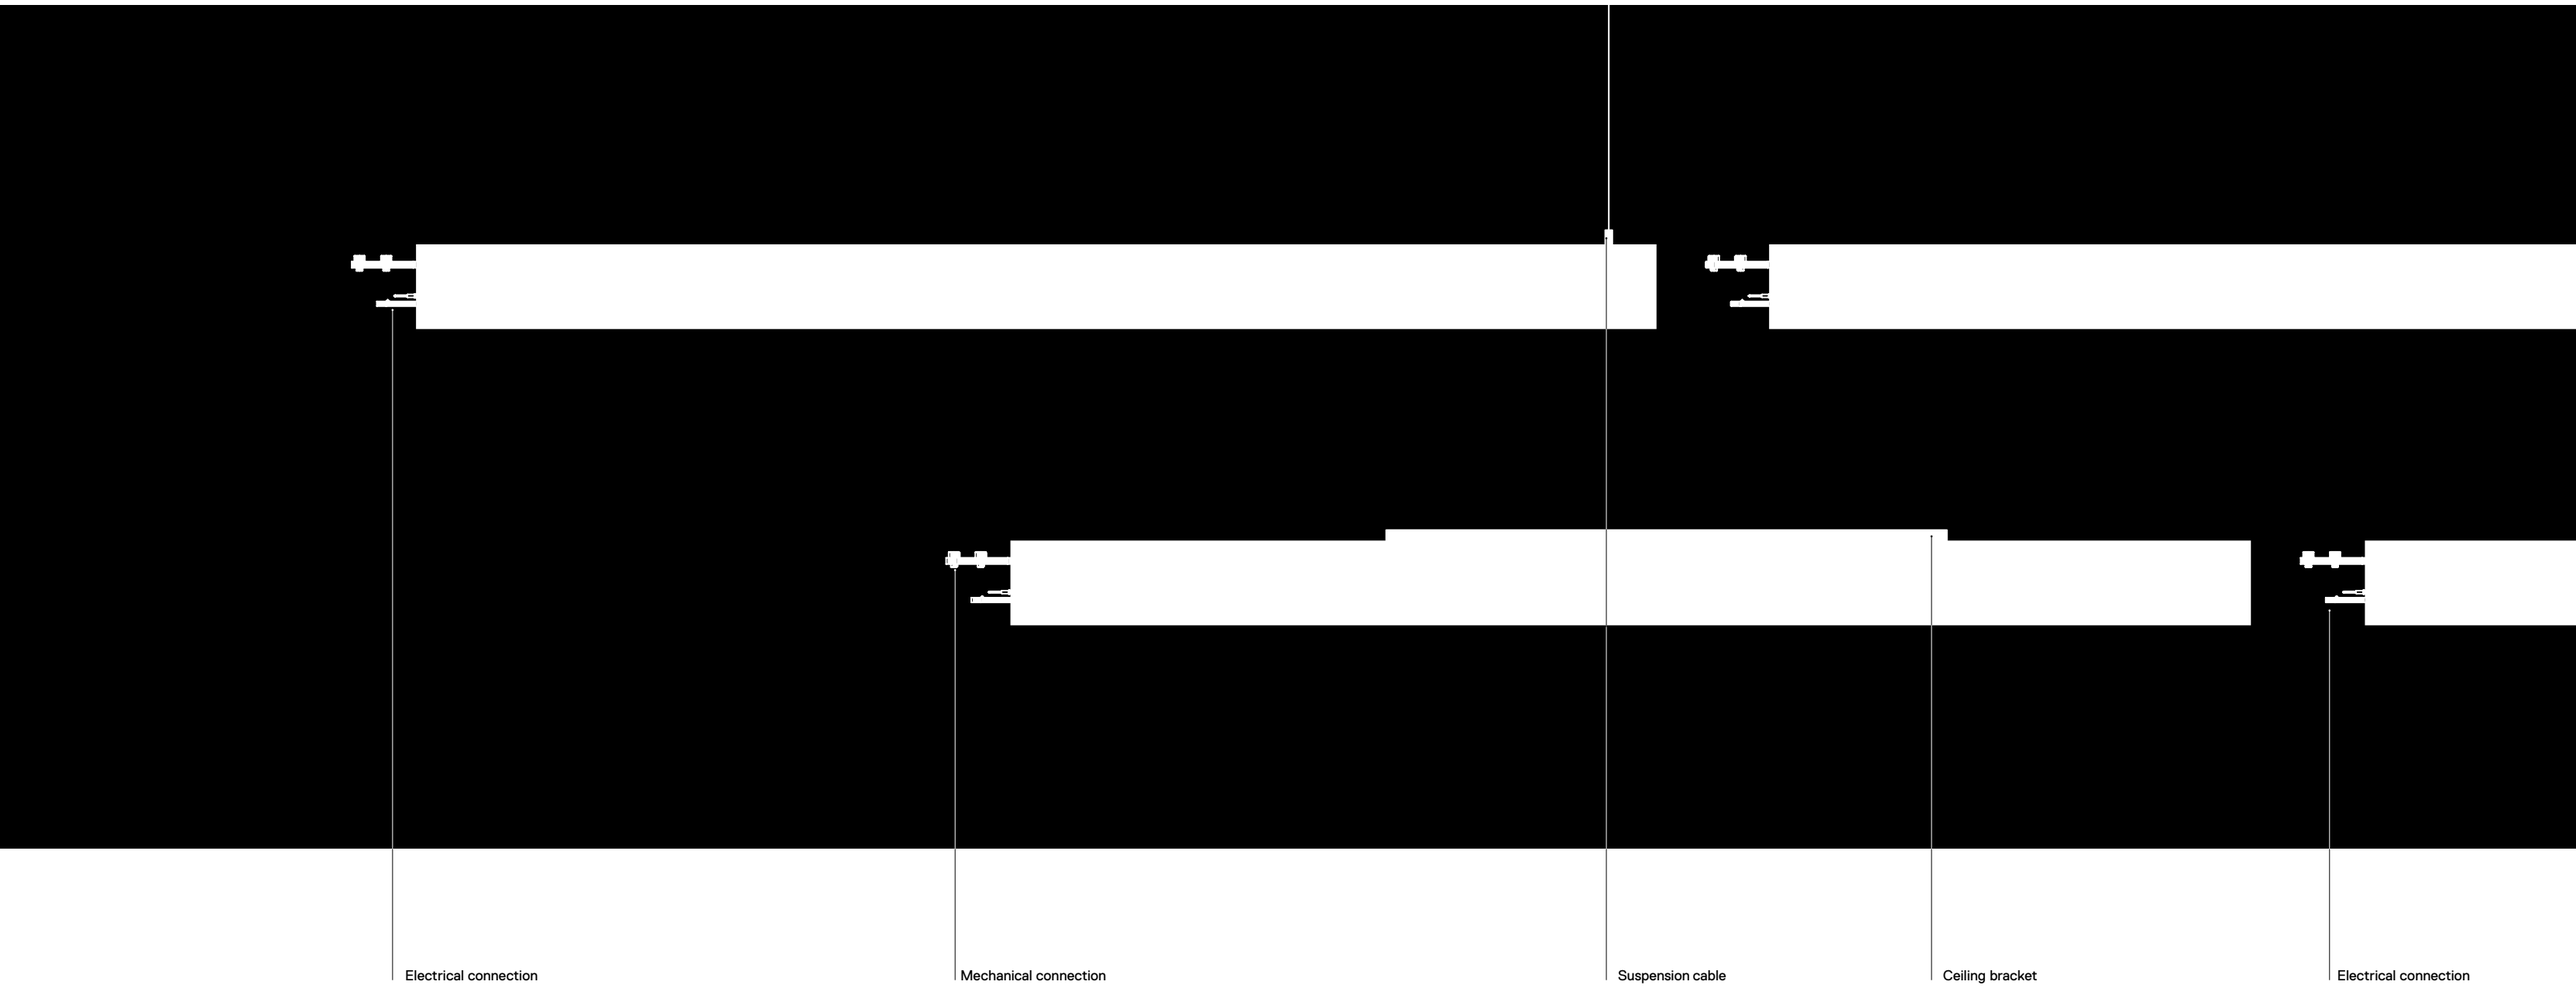

Each module (magnetic track, diffused, sharping) is pre-configurated and it is provided with:

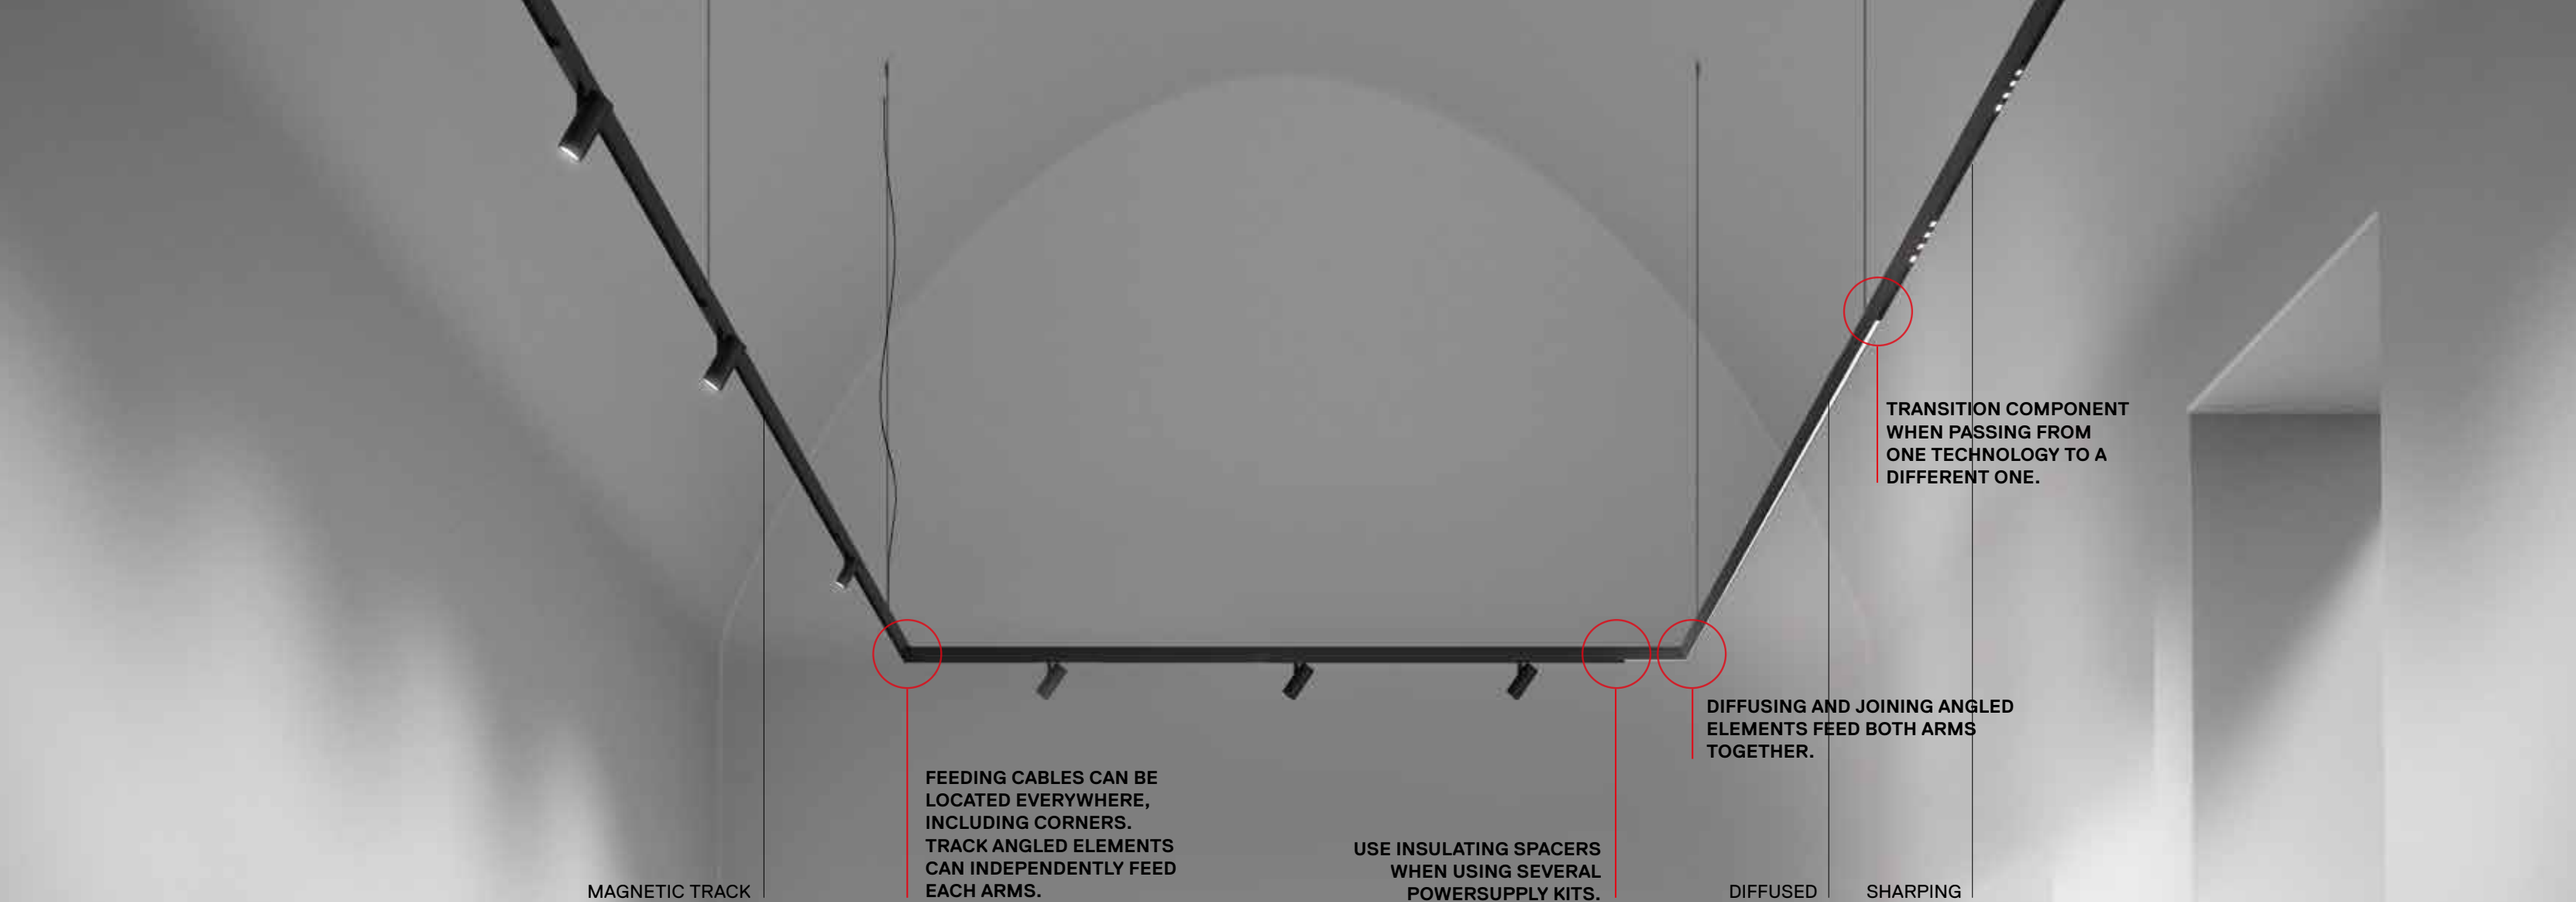

01. the specific optical engine (magnetic, diffused , sharping).

02. the mechanical and electrical connections to combine for a continuous run.

03. each suspension module is equipped with a suspension cable.

04. each ceiling module is equipped with 1 ceiling bracket for 1176 mm lenght or with 2 ceiling brackets for 2352 mm lenght.

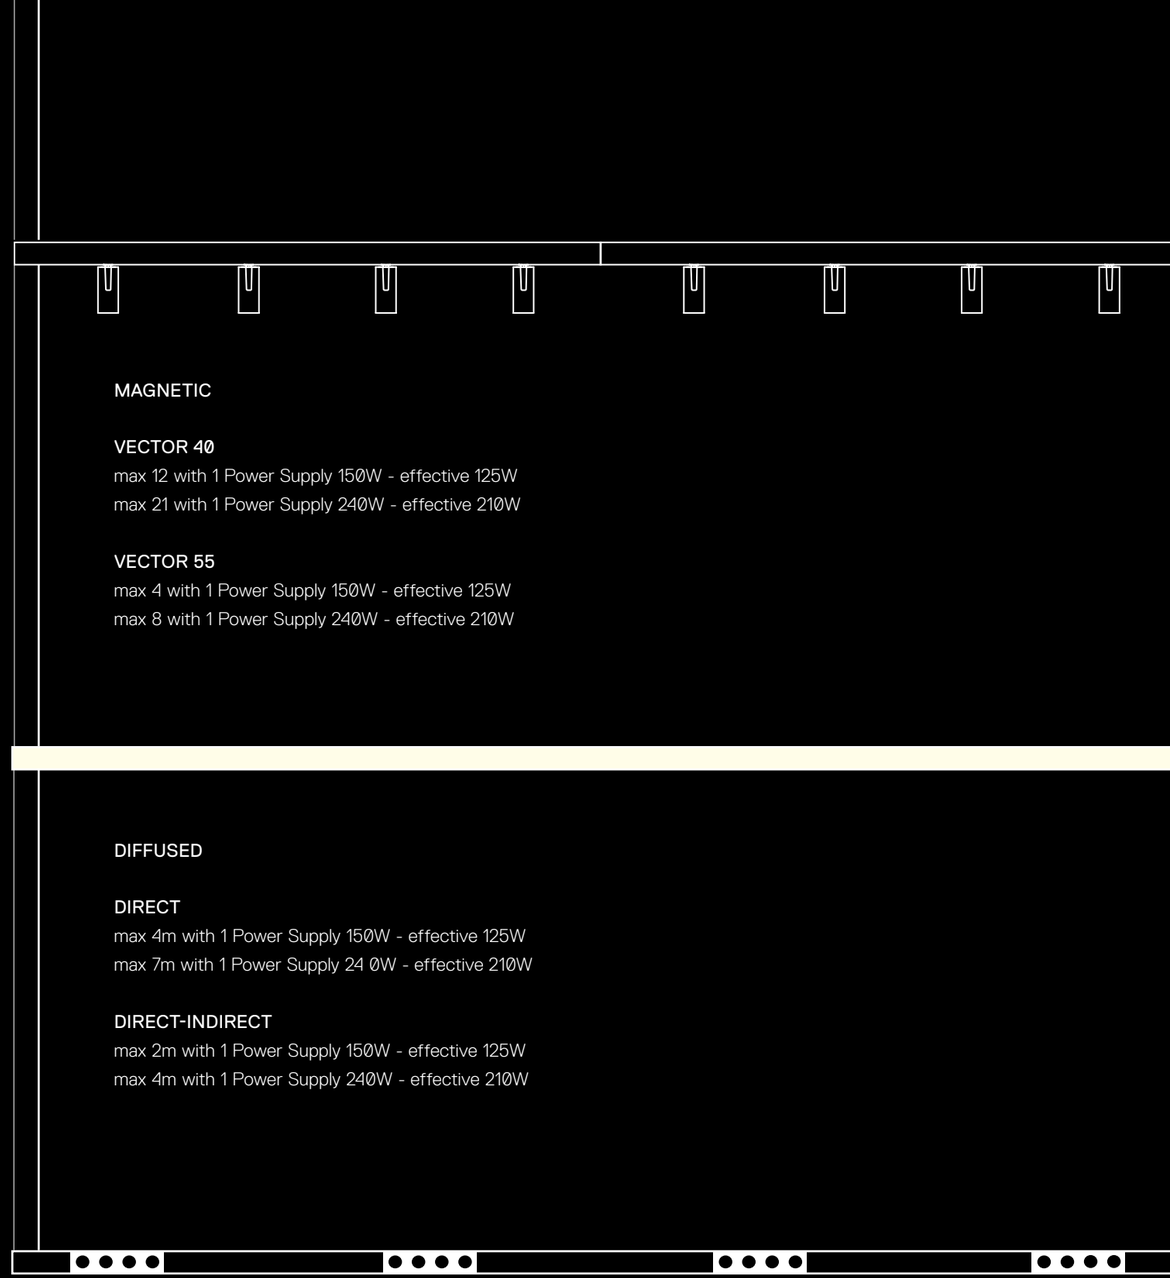

A.24 components

A.24 is powered by 48 Vdc

It permits long runs
in a small size 27x54 mm

Each forwork module is provided with a mechanical joint to connect two recessed coplanar forwork modules.
Each module, angle and curved elements are provided with mechanical and electrical joints and installation accessories.
End caps have to be ordered separately.
Sharping kit (louvers and covers) has to be ordered separately.
The APP driver can not be controlled by DALI dimming system and viceversa.
For the effective powers of the drivers, see the table on page. 331

↳ controlled emission

Controlled emission LED optic System UGR index control and 65° luminance (EN 12464)

Patent-pending proprietary optic system made by a thin black square-meshed grid and by a system of square plano-convex lenses of appropriate beam angle. The internal part of the grid is white painted and has a high reflection coefficient, so that the light incident on the grid is retrieved within the body.

A net 'cut off' at the required angle is obtained through this system.

The convex profile of the lens is designed with images optic techniques, so that the emission is limited within the 65° required by standard EN 12464.

UGR<19

Angle luminance equals to 65° and beyond: <3,000 cd/m2.

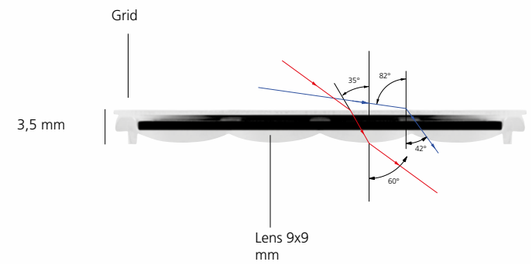

→ Patent pending

Operating diagram of the optical device used:

The grid positioned over the lenses allows only the rays falling into the required output angular limits to be incident to the lenses.

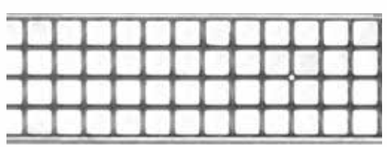

The rays beyond these limits are recovered and redirected inside the light box (if the ray is incident to the white surface) or cancelled (if the ray is incident to the black edge).

Structural module
suspension, ceiling, wall

Algoritmo system is particularly flexible; it allows different lighting solutions to be coupled through the same shared electrical system. LED diffused or wall washer in warm (3000 K) or neutral white (4000 K), LED controlled and prismoptic, accent lighting.

Installation in line or at a 90° angle.

Algoritmo system is composed of:

Structural modules in extruded aluminium, available in different lengths depending on the installation option and 3 finishes, white, black and silver.

Gear plates with through-wiring and rapid connectors.

Supplementary through-wiring with rapid connection.

Optical systems: diffusers, controlled optics for LED, wall washer optics for LED, 3 white LED monochromatic projectors (Pad, Pad square and 37 cube).

End caps and joints.

Supplying cables.

Pre-cabLED white LED (MV) plates equipped with electronic or electronic dimmerable driver (DALI).

Power supply and LED management systems (LV) to be ordered separately.

Compliant with standard EN60598-1 and other specific standards.

SUSPENSION, CEILING, WALL

Fixing components +

Wall bracket to connect a suspended module to the wall.

Wall / ceiling fixing bracket.

Suspension cable (no supply).

Suspension kit with supply.

Junction components +

End caps. (set of 2)

Linear connector.

90° angle for the mechanical connection of two recessed modules on one same plane.

90° angle.
For the mechanical connection of 2 modules on two perpendicular planes.

RECESSED

Junction components +

End caps.

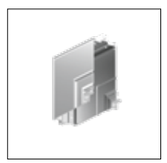

Vertical joint to connect two recessed modules on the same plane.

End caps.

Vertical joint to connect two recessed modules on the same plane.

Horizontal joint to mechanically connect two recessed modules on the same plane.

Pre-wired gear plates +

Pre-wired gear tray for white LED diffused, prismoptic, controlled and wall washer. MV through-wiring included.

Pre-wired gear tray for RGB LED diffused. LV through-wiring included.

Pre- wired gear tray for track.

Electrical Components +

Optional through-wiring. To be used with mixed installations combining LV and MV pre-wired gear trays.

Power supply kit.

Optical systems +

Opal polycarbonate diffuser for white LED and diffused RGB versions.

ControlLED Optics for white LED version.

Prismoptics optics for white LED versions.

Polycarbonate optics for white LED wall washer versions.

Junction components +

Junction to be fitted to the module on the same plane.
Compatible with the junction for the same plane.

prismoptic emission

Controlled emission LED optic System UGR index control and 65° luminance (EN 12464)

Patent-pending proprietary optic system made by a thin black square-meshed grid and by a system of square plano-convex lenses of appropriate beam angle. The internal part of the grid is white painted and has a high reflection coefficient, so that the light incident on the grid is retrieved within the body.

A net 'cut off' at the required angle is obtained through this system.

The convex profile of the lens is designed with images optic techniques, so that the emission is limited within the 65° required by standard EN 12464.

UGR<19

Angle luminance equals to 65° and beyond: <3,000 cd/m2.

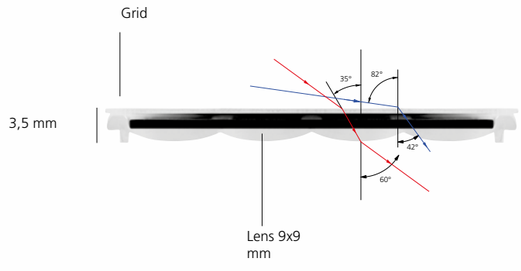

→ Patent pending

Operating diagram of the optical device used:

The grid positioned over the lenses allows only the rays falling into the required output angular limits to be incident to the lenses.

The rays beyond these limits are recovered and redirected inside the light box (if the ray is incident to the white surface) or cancelled (if the ray is incident to the black edge).

Functioning scheme

Comfort emission

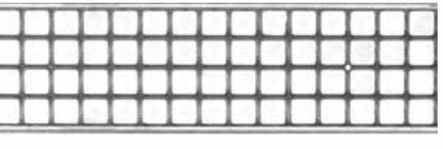

The appliance is fitted with a clear plastic screen featuring an outer micro-prism pattern designed in order to obtain a focused luminous emission mostly within a 2x60° cone.

With this technology, Algoritmo Prismoptic provides comfort lighting even when the appliance falls within the observer's visual cone.

A.Sharping optics

Algoritmo Sharping is very flexible and it allows to combine in continuity Sharp light modules, with indirect and diffused LED lighting in warm white (3000K) and neutral white (4000K).

Structural modules are in extruded aluminum, available in different lengths depending on the installation option, three finishes (white, black, silver or gloss anodized), two optic finishes (black and white) and three beams (17°, 34° and 54°).

Smart Office

Carlotta de Bevilacqua
↪ 2016

Dedicated office suspension ensuring top performance with utmost formal simplicity.

Available with controlled or diffused emission.

Highly uniform light performance, without multiple shadows or spots.

Innovative optical system: the light emitted is controlled by a mixing chamber before its emission through a lamellar optical unit or diffuser.

Two lenghts available.

Batwing indirect emission

Maximum flexibility of composition

Horizontal rotation modules respecting a minimum of 75°

Controlled emission

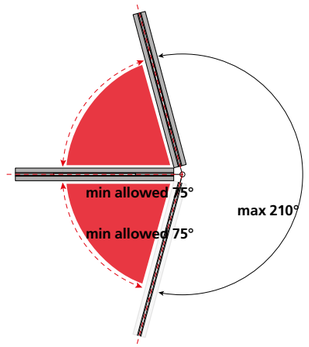

Diffused emission

Free vertical tilt up to 30° upwards or 30° downwards

Horizontal and vertical freedom to play with

→ ROTATION ON HORIZONTAL PLANE

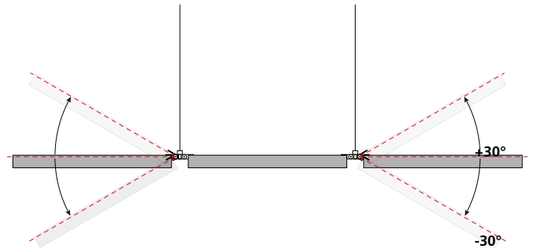

During the installation it is possible to freely choose the position of each single module, respecting a minimum angle between two modules of 75°.

→ TILT ON VERTICAL PLANE

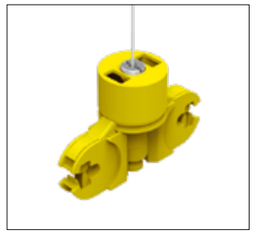

Each module can be easily tilted (upward or downward) up to 30° from the horizontal plane.

This two movements (rotation and tilting) can be mixed up in infinite possibilities to best adapt to space requirements.

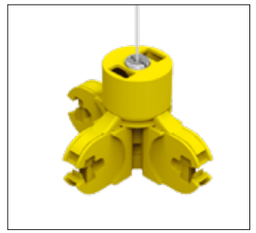

→ POSSIBLE MULTIPLE CONFIGURATIONS UP TO 4 MODULES

The fractal shape of the small circle works as an optical grid and defines a comfort emission.

Round version is available in one diameter (526mm), suspension and ceiling / wall.

Linear version are available in two lengths (1200 and 1800 mm), suspension and ceiling.

System version available in three lengths (600, 1200 and 1800 mm) suspension and ceiling. Can be composed in line or with 90° right or left angles.

Materials: matt white technopolymer body and aluminum structure.

Modular system with direct emission and indirect with LED high efficiency.

Installation with suspension.

Single mounting, in continuous line by angle (90°), free composition.

Dimmable electronic power supply DALI.

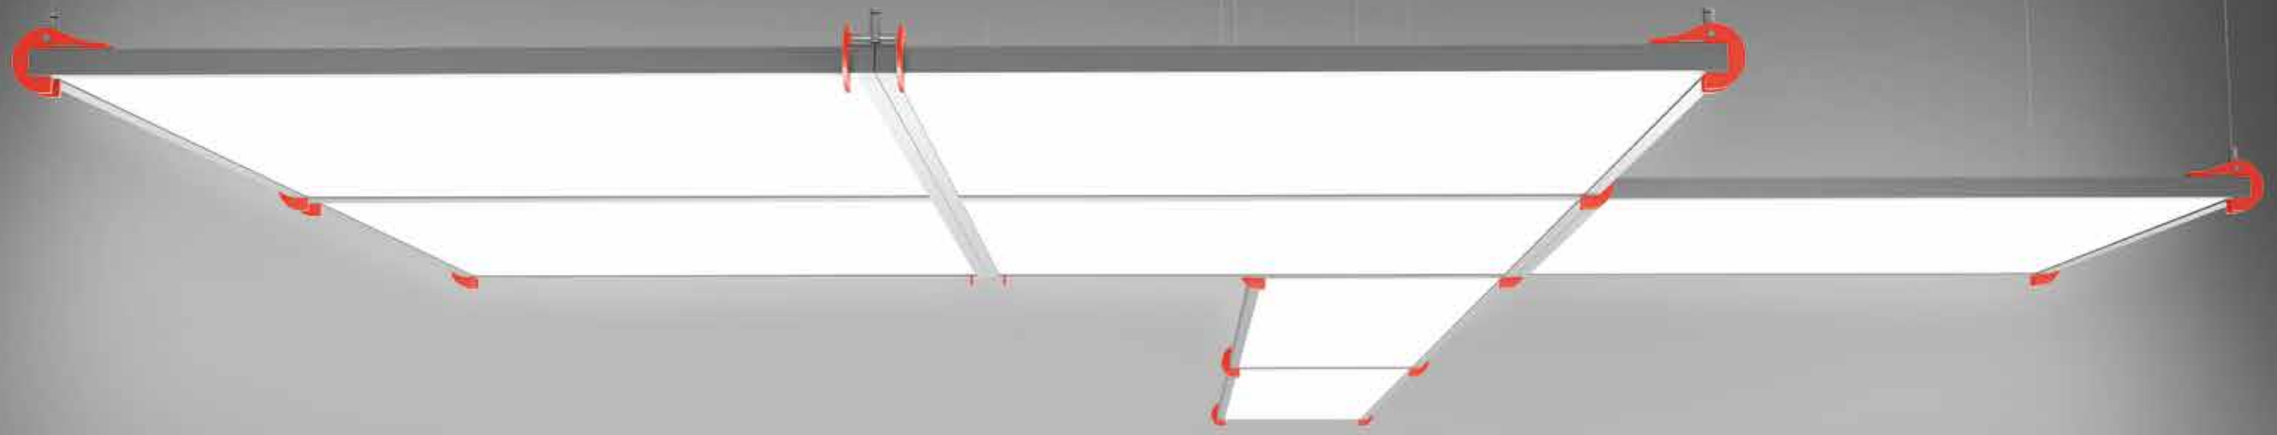

Materials: structure in extruded aluminum anodised matte, top screen with anti-dust polycarbonate, staples in 6 different tones.

Quick adjustment steel suspension cables.

Complies with EN62471, EN60598-1 and other specific standards.

Uglare 19

↪ 2015

Uglare is 600x600 and 300x1200 recessed ceiling light, suited to illuminate working areas with video-terminals.

Its strong steel and aluminium mechanical construction and high performance (over 100lm/W for the 4000K version), as well as the possibility to adjust the luminous flow, make this appliance ideal to illuminate work areas that require minimum incidence in terms of actual and perceived volumes of lighting systems.

Chocolate floor

a.g.Licht
↪ 2013

Luminous flux distribution: Version 1 desk – 800x1600mm: Total flux produced consists of 35% direct emission and 65% indirect emission.

Version 2 desk – 1600x1600mm: Total flux produced consists of 50% direct emission and 50% indirect emission.

Two options of light management: dimmable with manual independent control of direct and indirect emission, or Interactive DALI system offering automatic control of illumination on the working plane. A single button allows you to set the desired light with Interactive DALI option.

2 colours: brown and white.

Materials: head and stem in polished aluminium, base in polished aluminium, optics in metallized plastic, diffuser in clear polycarbonate.

Compliant with standard EN60598-1 and other specific regulations.

For further information on Chocolate
↪ visit artemide.com

Chocolate terra LED 1-desk

Chocolate terra LED 2-desks

The innovative optic system,specifically made with 108 micro-reflectors, allows a dazzle-free, controlled and concentrated light emission for single workspaces(800x1600mm, 1-desk version)or double workspaces (1600x1600mm,2-desks version).

The aluminium profile works as heat sink to dissipate heat.
Driver and components are located in the central compartment.
The 4 LEDs located in each corner are protected by an integral anti-dust screen.

Eggboard
↪ Matrix

Suspension appliance with sound-absorbing properties ensured by an unusual sinusoidal cross-section design of the lower surface and the use of a sound-absorbing material.

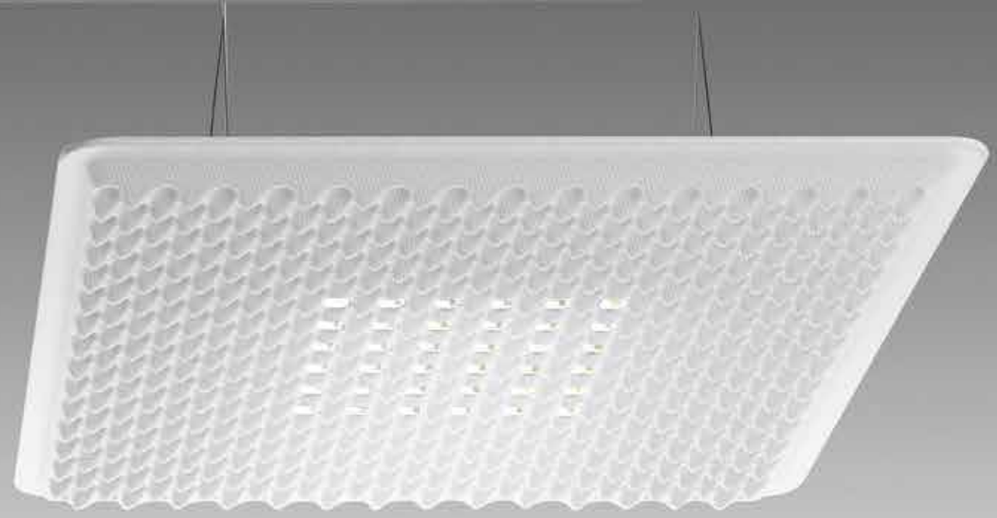

Acoustic efficiency is ensured within a limited space by positioning at approximately one metre above the head of the speaker and listener.

Direct emission: a board with a high number of low-voltage LEDs ensures maximum lighting comfort.

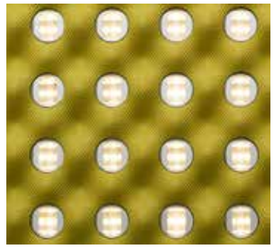

Reflectors can be rotated for use on single or counterposed double desk.

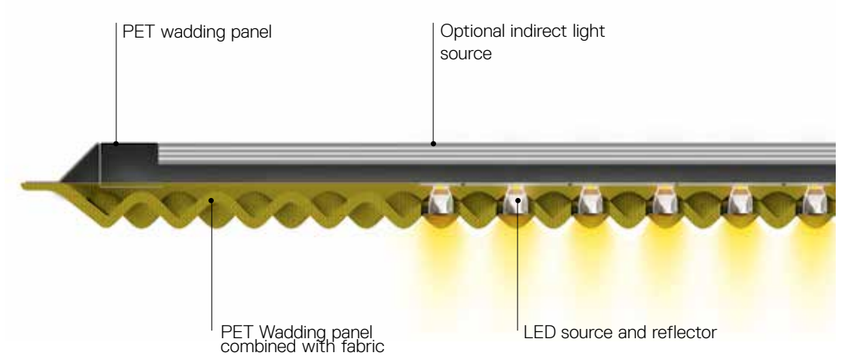

Complies with the norms on office activities that involve the use of video-terminals (UGR<19).

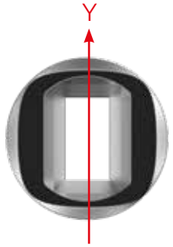

Available in 3 colours (white, grey, green) and 2 different sizes (1600X800mm - 800X800mm).

↳ EGGBOARD MATRIX 1 DESK

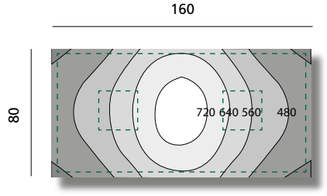

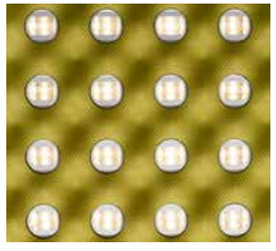

Rotating the elliptic-beam reflector along the Y axis allows to use the product to illuminate one workstation.

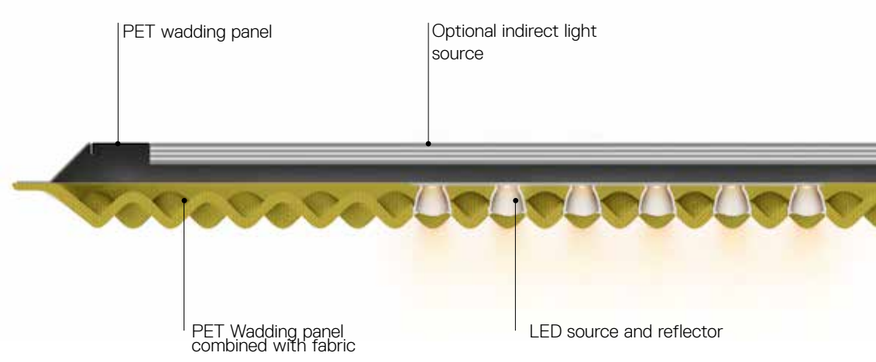

UGR < 12

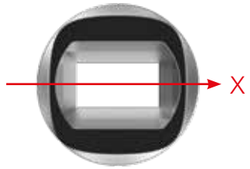

↳ EGGBOARD MATRIX 2 DESK

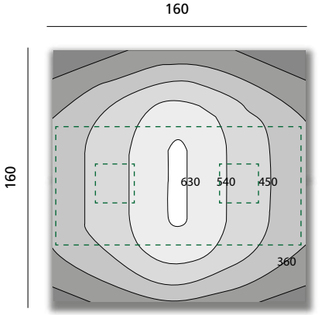

Rotating the elliptic-beam reflector along the X axis allows to use the product to illuminate two workstations.

UGR < 17

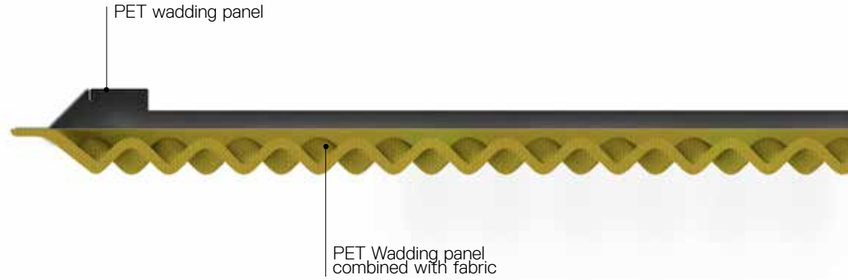

EGGBOARD ACOUSTIC PANEL

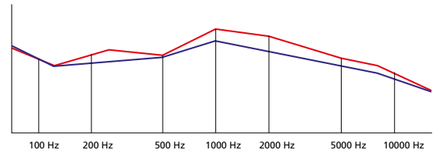

The sound-absorbing material acts by reducing the reverberation time (i.e. the time required to reduce any noise inside the room by 60 db, so as to ensure that any echoes due to reflections on the walls are inaudible).

The frequency of human voice typically ranges from 1 to 4 kHz.

The use of materials capable to reduce these frequencies allows better understanding of speech and prevents the need to talk loudly to cover the background noise.

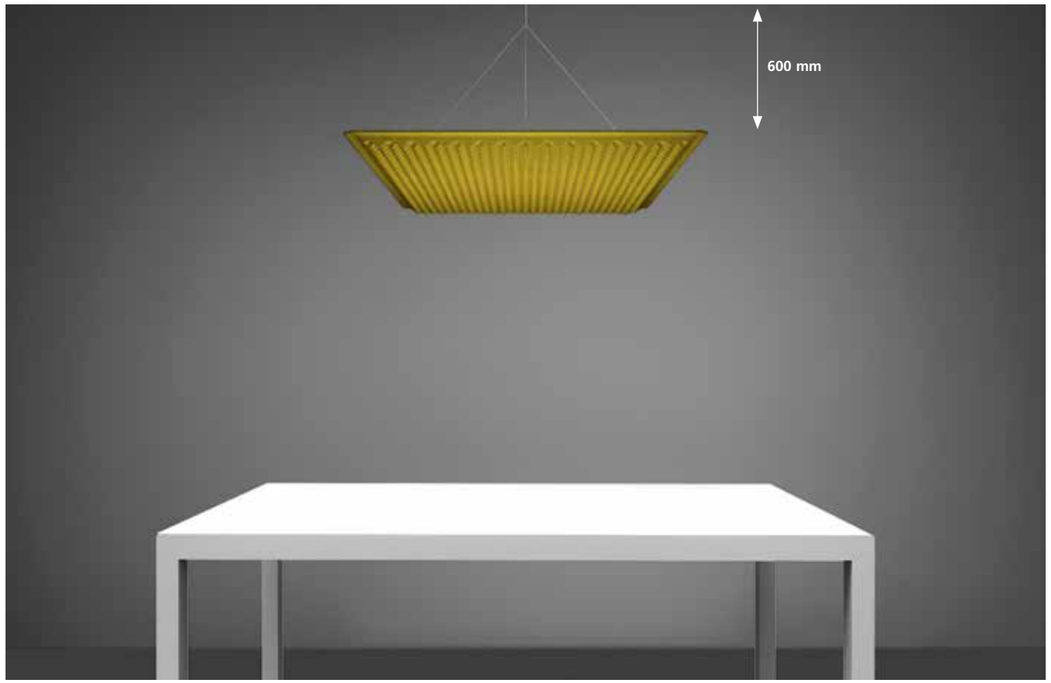

The sound-absorbing appliance should be located 400-600 mm off the ceiling to ensure optimal operation.

No sound-absorbing material

Noise reduction with Eggboard installed 60 cm off the ceiling

Suspension appliance with sound absorption properties: the material's characteristics and the appliance's geometry ensure a reduced reverberation time.

The sound absorption effect is optimized for the frequencies of human voice.

The varying densities of the material used for the lower panel promote the absorption of different frequencies.

Both the upper and the lower surface of the appliance feature sound-absorbing properties. Appropriate positioning of the appliance in space is crucial to optimize sound absorption.

Fixed optics detail

Artemide App

2 SURFACES FOR DIFFERENT ACOUSTIC ABSORPTION

Upper surface with low density to entrap soundwaves reflected from the ceiling

Indirect emission

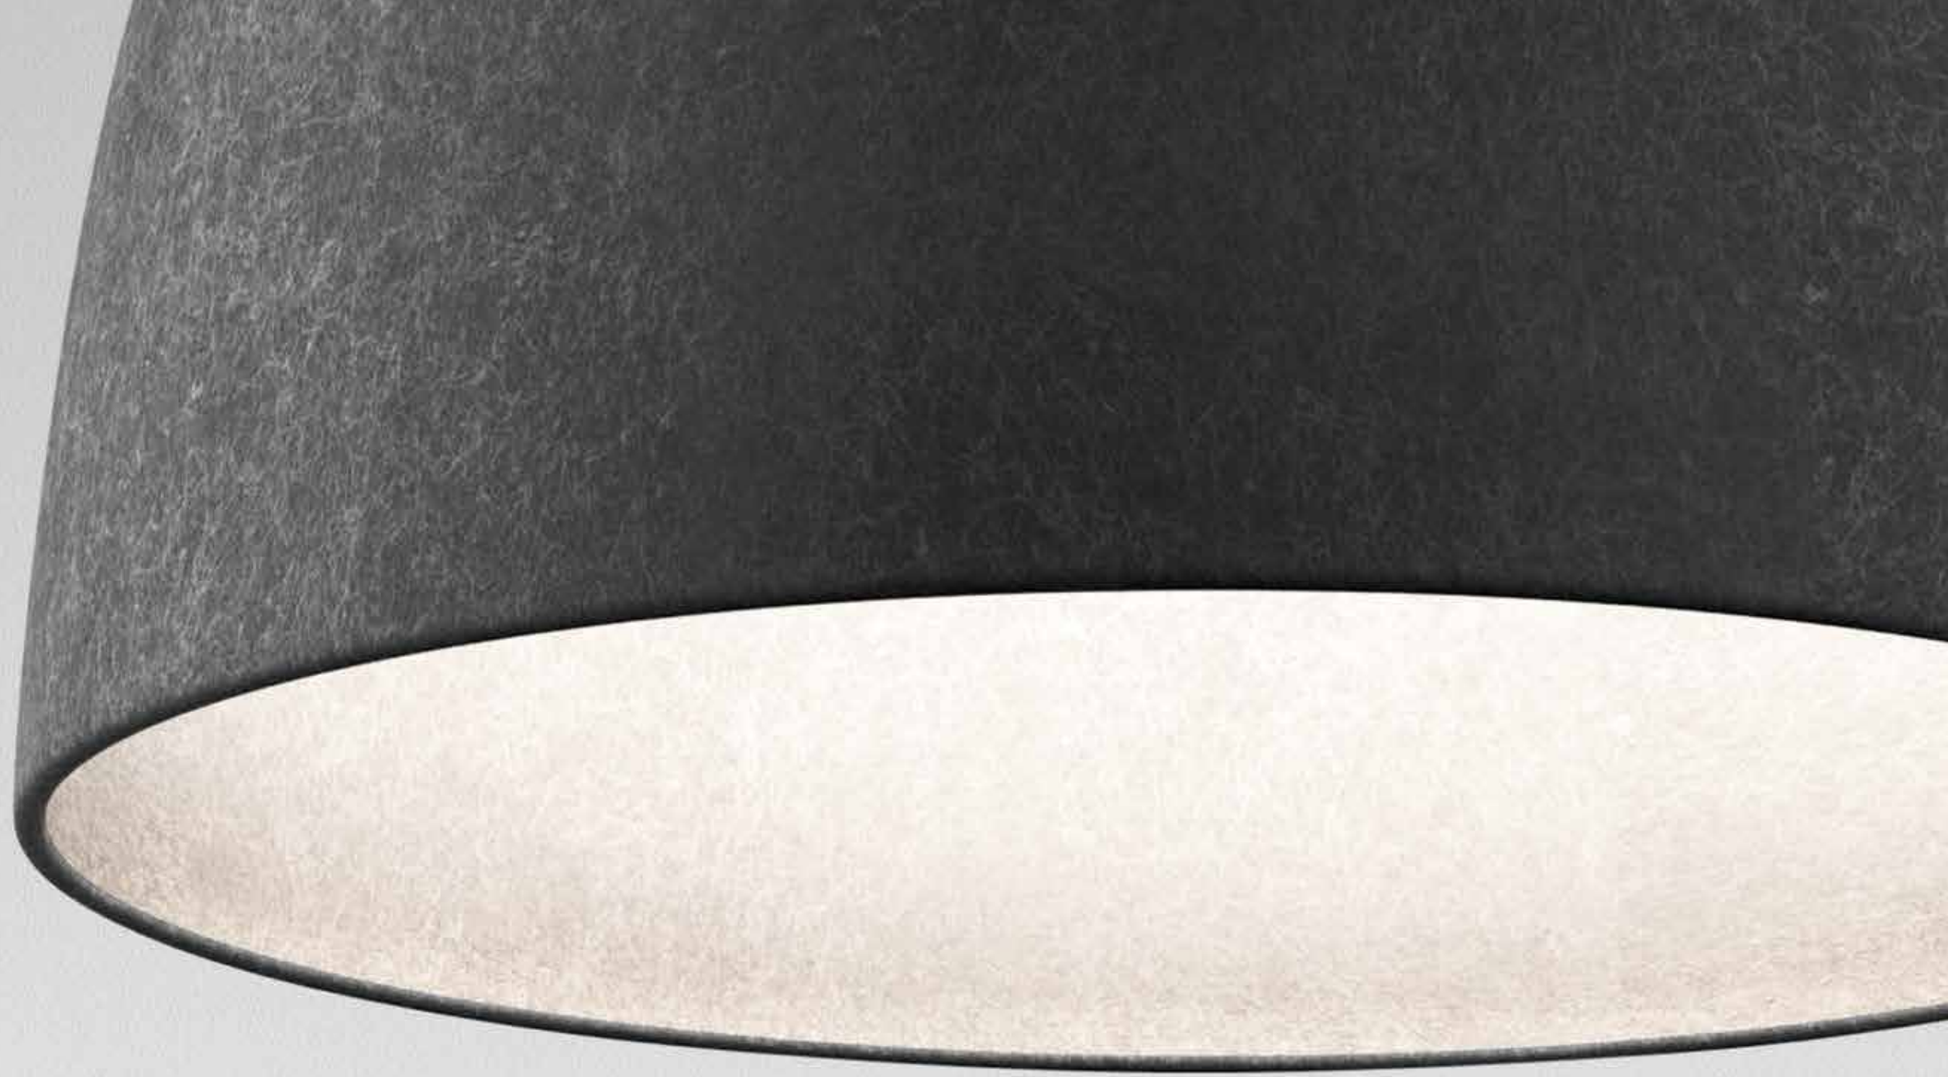

PATENT PENDING

High efficiency

Maximum uniformity & no color spots

Total control of the light emission

Lower surface with different density to absorb different frequencies

Alphabet of light
Letters installation

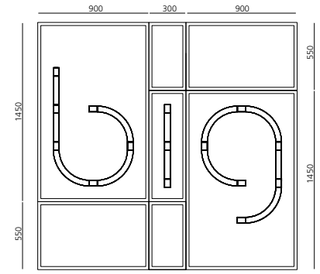

Modules

An entire alphabet composed by 7 elements:
5 joints + 2 constructive modules
with electro mechanical connections

→ MDF SUPPORT INSTALLATION

The letters are provided mounted on MDF panels to allow installation on any kind of wall. Installation requires creating a counter-frame to accommodate the drivers, supplied separately, and the power cables.

A configuration software is available to calculate the necessary usable surface, as well as to identify the codes required to implement the desired project.

1. Create the supporting frame and provide for power connections for the individual letters.

2. Connect panel ь to power source.

3. Fix panel ь and connect panel ı to power source.

4. Fix panel ı and connect panel ọ to power source.

5. Fix panel ọ and close using the supplied panels.

6. Complete closing using the supplied panels.

7. Frame ready for finishing.

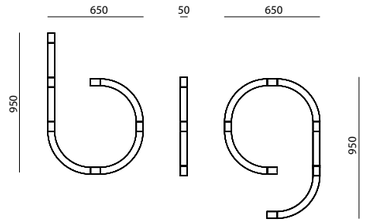

8. Apply the gauze and plaster flush with the gaps between panels.

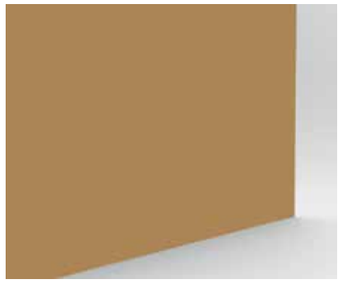

9. Final painting.

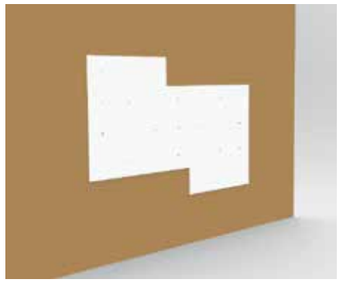

→ CARDBOARD MOUNTING-SUPPORT INSTALLATION

The letters are provided with a packaging that ensures the right support during the installation process. This type of installation is suitable for existing drywalls that have accessible back space for the housing of drivers (code DV1009) supplied separately and cables (power supply 75 W max - 2 letters or more up to max 85% load).

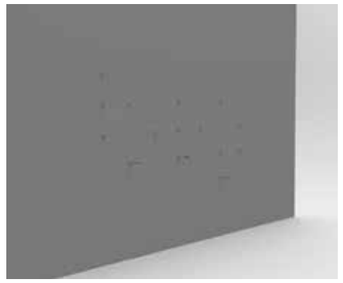

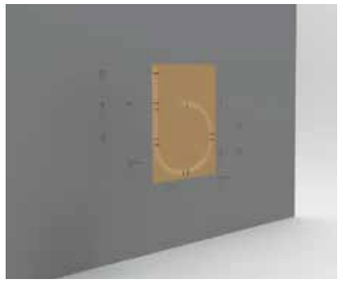

1. Drywall with accessible back space.

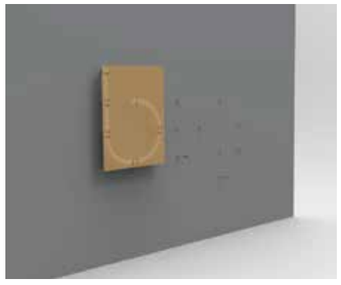

2. Use the provided template to drill the holes and paint the drywall.

3. Install wall pins, identify output points and prepare wiring connections.

4. Connection of letter b to first wall output.

5. Attachment of letter b on wall pins.

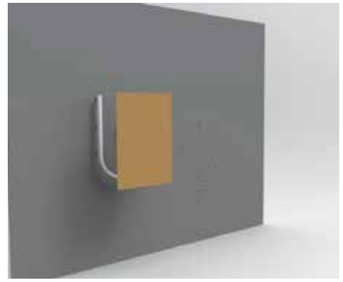

6. Detail of the wall pins fixing.

7. Detail of the wall pins fixing.

8. Removal of the nylon wrapper.

9. Removal of the cardboard support.

10. Connect letter i to first wall output.

11. Fix letter i on wall pins.

12. Removal of the nylon wrapper.

13. Attachment of letter g to first wall output.

14. Removal of the nylon wrapper.

15. Finished.

SUSPENSION HORIZONTAL

An ultra-light aluminum profile hosts a LED strip that injects light into a technopolymer surface with microengravings.

The microengravings pattern ensures maximum efficiency and uniformity in direct and indirect emission.

Dimmable devices (push dimmer).

Available as suspension and wall/ceiling Ø 700 mm, as vertical suspension Ø 700-1000-1400 mm.

Artemide
Mercedes-Benz Style
A BRIGHT FUTURE

Ameluna white

→ Ameluna discloses an innovative optoelectronic system integrated in the transparent frame.
An aluminium band, a patent of innovation, which is welded with the optics, supports the led strip.The latter is also hidden behind the lower profi le, in order to maintain the purity of the form. The transparent body allows the light to be both direct and partially refracted.

The geometric section and the optical features of the materials give life to a “light box” that ensures perfect control of the emission, despite transparency.

A set of LED sources is installed along the lower profile, on a ring made of a thermo-conductive polymer, an innovative material that allows excellent heat dissipation.

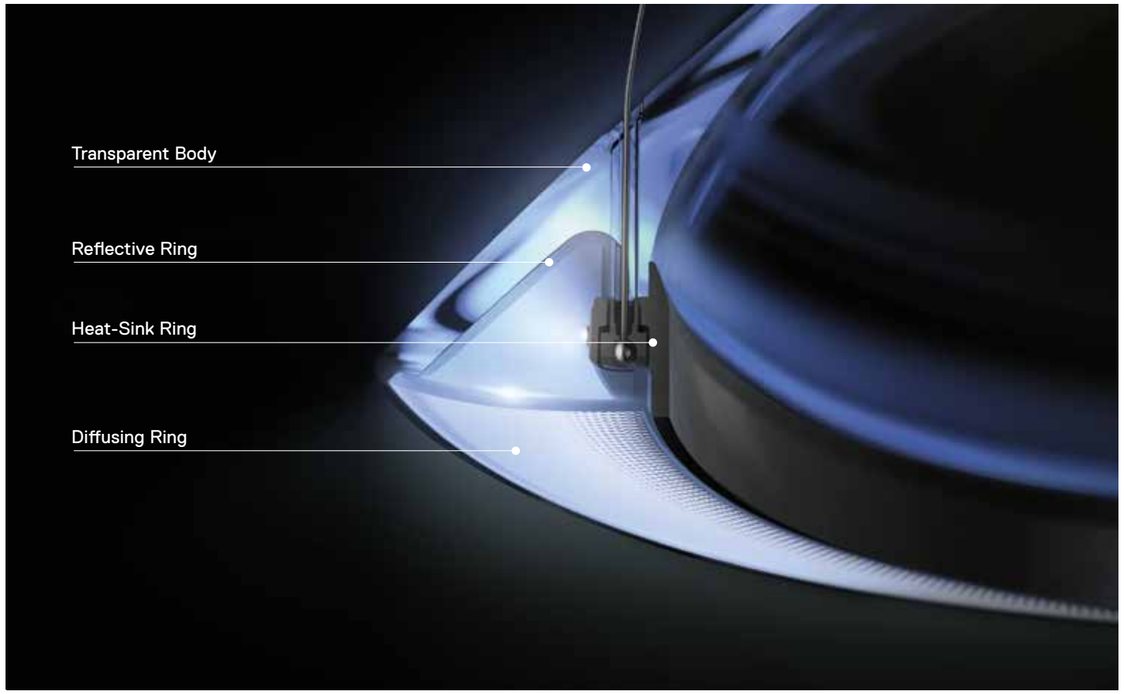

Emission is perfectly designed through careful selection of the materials constituting the “light box”. The special reflectance and transmittance properties, combined with a very low absorption coefficient, ensure that the light reflected from the inner surfaces of the section is scattered across the environment in a controlled and mostly direct way.

Ameluna can be controlled with an On/Off switch or using a Push to adjusts its luminous intensity.

Ameluna RGB can be controlled using 2 different Push (one for white light and one for the RGB spotlight) and the Ameluna App. Control via push button has always priority over control with the App (when the Push are operated, the commands sent via bluethooth from the smartphone or tablet are ignored)..

Not for Tagora 80 ceiling version

Tagora
↳ recessed

Series of ceiling mounted luminaires available in 4 diameters (80 mm, 270 mm, 570 mm, 970 mm), using high-output LEDs, Retrofit LEDs.

Consists of a trimless recessed frame fitted into the ceiling and an optical unit with an aluminium body painted in a range of colours.

Tagora 80 and 270 offer high-output spot light with aluminium optics.

Tagora 270 LED uses a proprietary system based on a hybrid combined lens and reflector optic. This system helps to create defined narrow beams using high-powered LED modules of large dimensions.

Tagora 570 and 970 cone with a PMMA diffuser, offering a comfortable diffused light, use high-output sources.

Integrated electronic power supply, dimmable or non-dimmable options, depending on the version.

Only ceiling recessed installation allowed.

Compliant with standard EN60598-1 and other specific standards.

Tagora
↳ ceiling

Series of ceiling mounted luminaires available in 4 diameters (80 mm, 270 mm, 570 mm, 970 mm), using high-output LEDs, Retrofit LEDs.

Aluminium body available in different two-coloured versions: beige/white, grey/white, black/orange, black/vert and black/blue.

Tagora 80 and 270 offer high-output spot light with aluminium optics.

Tagora 270 LED uses a proprietary system based on a hybrid combined lens and reflector optic.
This system helps to create defined narrow beams using high-powered LED modules of large dimensions.

Tagora 570 and 970 come with a PMMA diffuser, offering a comfortable diffused light. LED versions use high-output sources.

Integrated electronic power supply, dimmable or non-dimmable options, depending on the version.

Only ceiling mounted installation allowed.

Compliant with standard EN60598-1 and other specific standards.

Mouette

Wilmotte & Industries
↳ 2004

Suspension light fitting with diffused emission.

Versions: Mouette symmetric, Mouette asymmetric.

Solid opal diffuser in moulded polypropylene.

Luminous flux distribution:
74% in direct emission,
26% in indirect emission.

DALI dimmable.

The light fitting is equipped with quick-adjustment steel suspension cables, ceiling plate and power cable.

Cable length: Mouette: 2m or 6m,
Mouette mini: 2m.

Complies with standard EN60598-1 and other specific standards.

O

Light without a lamp for public space

The more the planet becomes urban, the more we appreciate the value of natural spaces. The cities with the highest quality of life are those that were visionary enough to keep portions of untouched nature within their footprint and transform them into public spaces. Forest than can become parks, rivers that can become pools, hills that can become viewpoints or beaches that can become promenades measure the capacity of a city to provide the right environment for their citizens.

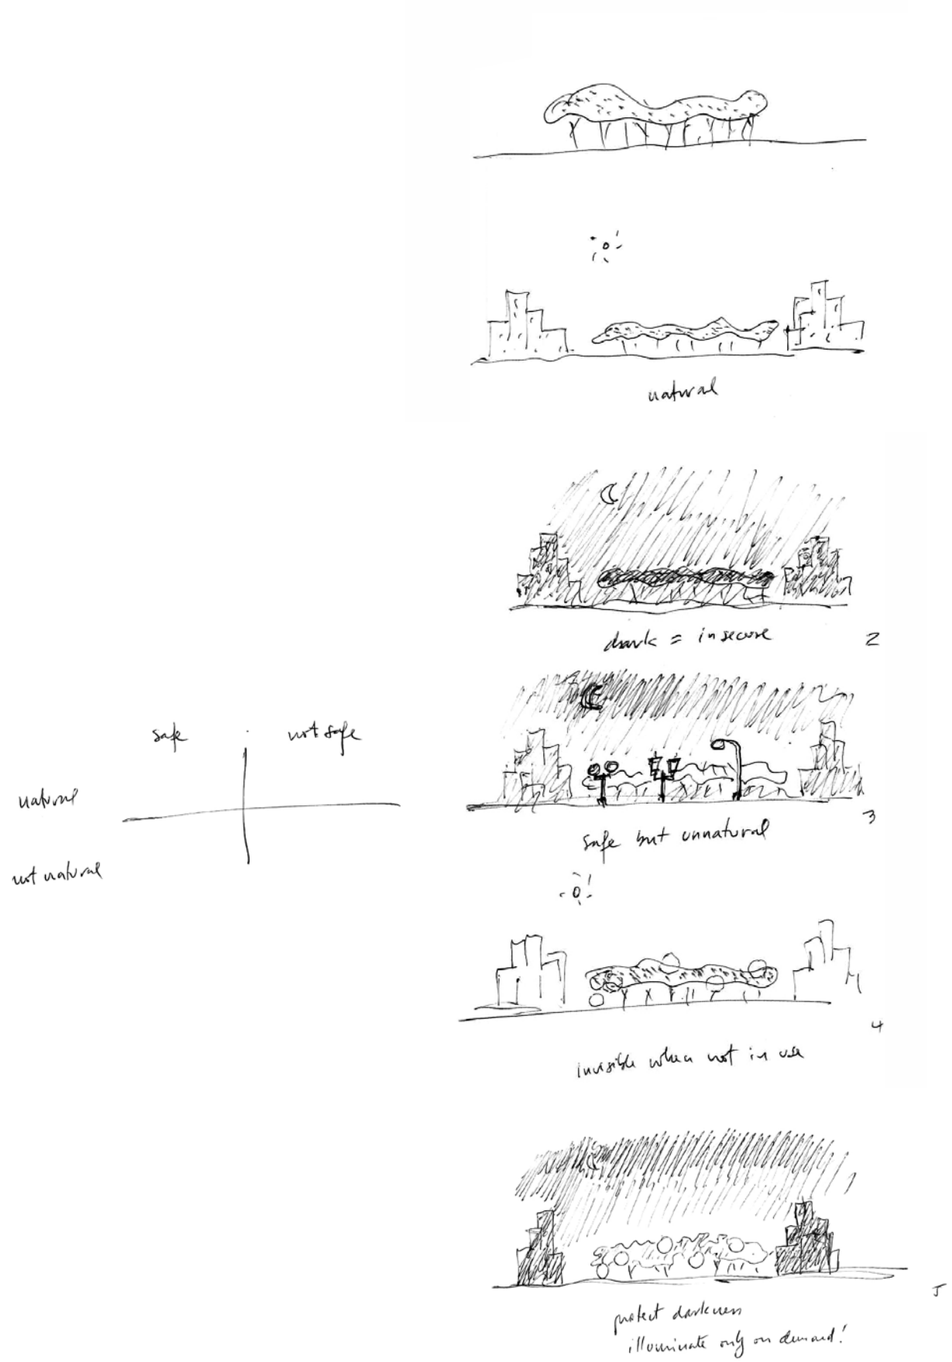

The problem is that the forces that govern nature and modern urban life, even if guided by good will, tend to pull in opposite directions. If we want to access a hill, we erode its slopes with roads. If we want to prevent a river's flooding, we alter its basin's permeability. If we want to keep a park clean, we invade it with garbage cans. If we want to illuminate it to make it safe, we invade it with posts and cables.

One of the strongest intrusions in the natural order (and yet one of that remains almost unnoticed) is the disappearance of darkness in our cities. In the attempt to make parks safe, we not only invade them with posts and cables, but we alter forever the circadian rhythm that is crucial for the existence of species, both animal and vegetal.

Our project for Artemide is an attempt to reconcile the needs of the natural and the urban environment. Our strategy is twofold: on the one hand is to design a light for the public space that when not in use can be as imperceptible as possible; light without a lamp. On the other hand is to take advantage of different types of sensors so that light appears just when needed; light only on demand.

For such aims we started from the Discovery lamp developed by Artemide: a disc of Polymethyl methacrylate (PMMA), transparent when not in use, but "carved" with some invisible laser insertions in its mass, so that when the LED in the peripheral ring is turned on, the whole mass becomes the light source.

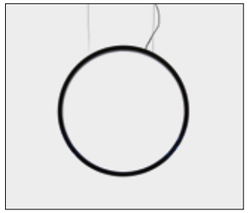

For O we envision a series of discs that interfere as little as possible an existing landscape, but that when activated by people's motion, they illuminate the adjacent space for only a limited amount of time. Darkness and Disappearance will be the contribution of O to nature and public space.

Walking

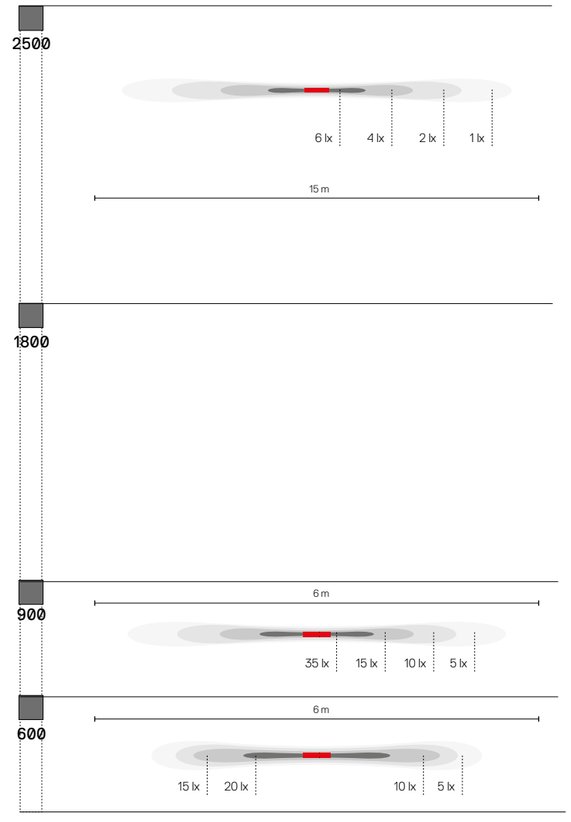

Carlotta de Bevilacqua
↳ 2017

Walking optical system

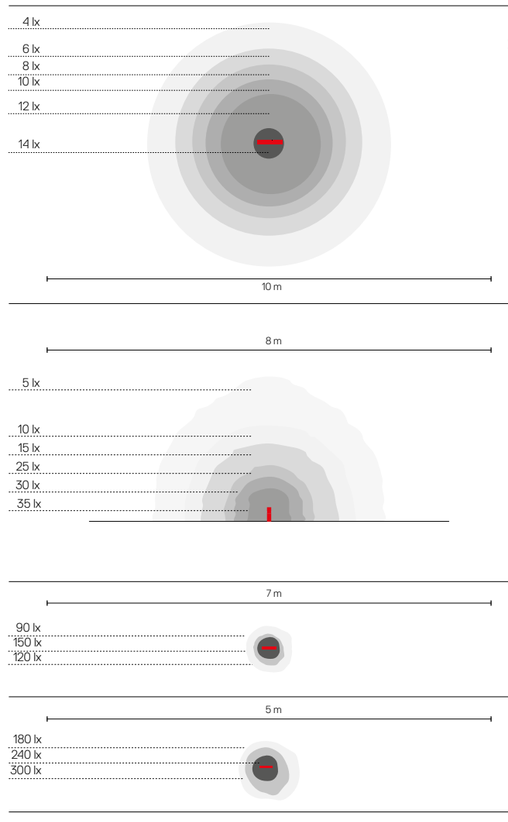

It can create different luminous landscapes starting from three white or coloured lighting performances, either single or combined within the same element according to a space gradient of structures of different heights.
It defines a new, exciting lighting language, respectful of the surrounding space, which it approaches with deeds that promote its perception and a man-sized experience. A dynamic discovery of space that is allowed, among other things, by the possible interaction with sensors, the Artemide App and advanced intelligences.

Reeds

Klaus Begasse
↪ 2013

Floor light fixture with diffuse emission, with monochromatic LED light sources.

Available with IP20 protection rating for indoors, IP67 and IP68 for outdoors. IP67 and IP68 versions are available in Single or Triple shape.

Light is diffused through 7 PMMA rods with different heights to give the impression of a reed bed and which can be screwed to the base by means of AISI 316 stainless steel bushes. Part of the light is also diffused on the floor around the base.

The base has an irregular shape, which has been designed to allow a «mosaic» connection with other light fixtures so as to create an elaborate composition as needed.

Technical features in compliance with EN60598-1 (IP20, IP67) and section 2-18 (IP68).

Reeds IP20

Consists of a base made up of a transparent polycarbonate casing.

Installed between 2 aluminium plates and anti-scratch support feet.

Technopolymer aesthetic cover.

Complete with integrated ballast and plug with transparent cable. Switching on and off are performed by means of the pedal push button located on the cable.

Reeds IP67

Consists of a base made up of a transparent polycarbonate casing installed between 2 AISI316 stainless steel plates fixed by means of AISI316 stainless steel screws. Water sealing is assured by a silicone gasket. The light fixture can be fastened to the floor by means of the holes in the lower plate. Technopolymer aesthetic cover.

Complete with integrated ballast and supplied with a 1.5 m-long H05RN-F 2x1 cable provided with IP67 connector for the electrical connection to the mains suitable for 5-13.5mm diameter cables.

Reeds IP68

Consists of a base made up of a transparent polycarbonate casing installed between 2 AISI316 stainless steel plates fixed by means of AISI316 stainless steel screws. Water sealing is assured by a silicone gasket. The light fixture can be fastened to the floor by means of the holes in the lower plate. Technopolymer aesthetic cover.

The light fixture is supplied with 24V DC power and is provided with a 5 m-long H05RN-F 2x1 cable with IP68 connector for the electrical connection to the mains suitable for 5-13.5mm diameter cables.

Tetragono

Ernesto Gismondi
↪ 2013

Lighting fixtures with direct asymmetrical light (floor version) and radial emission (wall version), with monochromatic LED light sources.

Floor or wall installation.
Finishing: anthracite grey painted.

Technical features of light fixtures in compliance with EN60598-1.

ENEC approved.

Tetragono floor: consists of lamp and supporting pole in extruded EN-AW-6060 aluminium, subjected to chromate treatment and painted, height 450 and 900mm, with painted steel base flange, with holes for floor installation by means of log bolts or dowels.

Tetragono wall: light fixture with radial light emission, consists of body and wall fixing plate; Lamp support in extruded EN-AW-6060 aluminium, subjected to chromate treatment and painted, with painted steel base flange, with holes for wall installation.

Lighting unit in die-cast EN-AB 47100 aluminium painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidising primer, polyester paint.

Provided with metalised polycarbonate reflectors.

UV resistant diffuser in shock resistant polycarbonate with bright finish.

AISI 316 fixing screws and silicone gaskets.

Provided with cable and IP68 connector for the connection to the mains suitable for 5-13.5mm diameter cables (floor version) or for max 3,5mm diameter cables (wall version).

Light fixture with direct emission, with a unique high-performance monochromatic COB LED.

Floor installation.

Available in two heights (h 45cm and h 90cm).

Consists of support with lamp compartment and ballast compartment.

Cylindrical lamp support in engineering polymer (compact polyurethane). Painted with polyurethane resistant to atmospheric and chemical agents.

Fixture head in die-cast EN-AB 47100 aluminium, painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

UV resistant diffuser in transparent shock resistant polycarbonate.

Accessory compartment in polymers with closure cover in AISI 316.

Hot galvanised steel mounting plate, with holes for ground fixing by means of log bolts or dowels.

AISI 316 stainless steel screws and silicone seal gasket.

Provided with cable and IP68 connector for connection to the mains cables with 5 to 13,5 mm diameters.

Technical features of light fixtures in compliance with EN60598-1.

Piroscafo

Ernesto Gismondi
↪ 2014

Lighting appliance for ground fixing with directional light emission, using monochrome LED light sources.

The appliance consists of a body and a fixing base of EN-AB 47100 die-cast aluminium finished with a 3-stage outdoor treatment: nanotechnologies, anti-oxidising primer, polyester painting.

Shock-resistant tempered glass screen.

AISI 316 stainless steel screws and silicone seal gaskets.

Provided with cable and IP67 connector for connection to the mains. Supports cables with 7 to 12 mm diameters.

Technical specifications comply with the EN60598-1 norm.

↪ 2014

Series of direct-light appliances fitted with high-yield LED sources.

Floor, bollard, or wall fitting.

Available with 2 finishes: painted grey-white (RAL 9002) and charcoal grey.

Pre-treated with hard anodic oxide coating, for enhanced resistance to corrosion, and subsequent polyester painting.

The technical specifications of the appliances comply with EN60598-1.

Made up of lighting body, wall mount (wall version); lighting body, bollard available in two heights, floor fixing flange (bollard version.)

Accessories available for the wall version include: 250cm-high bollard; floor fixing peg.

EN-AB 471000 die-cast aluminium lighting body.

EN-AW-6060 aluminium extruded bollard.

Supplied with IP68 connector for connection with mains.

Floor and ceiling asymmetrical wallwasher light fixture with a roto-symmetrical option, only available for the ceiling version. The ceiling version is also available with downlight optics with high visual comfort (UGR<19).

Fixture consisting of cubic body and floor / ceiling fixing plate. Ceiling version includes a security cable, Wallwasher version also available in movable version .

Body made in die-cast aluminium
EN-AB 44100 with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Includes a metal-finish polycarbonate reflector.

Diffuser in tempered silk-screened glass.

AISI 316 fixing screws and silicon gaskets.

Supplied with H05RN-F 3X1 cable and IP67 network connector using 5-13.5 diameter cables, housed in a compartment in the lower part of the fixture.

Technical features in compliance to EN60598-1.

Cuneo
Cuneo Mini

Klaus Begasse
↪ 2010, 2015

The elliptical light emission and the flat shape of the fixture make it particularly suitable for floors or spacious areas in gardens to provide a side lighting.

For further information on Cuneo and Cuneo Mini
↪ visit artemide.com

Light fixture with direct side emission, with high-performance LED light sources. Monochromatic LEDs are used together with collimators and a light-diffusing prismatic screen to obtain an optimum lighting beam.

Floor or wall installation. In the wall installation, the light can be pointed either upwards or downwards.

Available in 3 finishes: light grey, dark grey and rust painted.

Consists of lighting cap and terminal board fixed together by means of locking screws.

Cap and terminal board in die-cast EN AB-47100 aluminium, gaskets in silicone rubber. Electronic ballast integrated in the fixture.

Cuneo: PMMA collimators installed on the LED light sources. Light-diffusing prismatic screen in PMMA siliconed flush with the lighting cap.

Cuneo Mini: High-yield COB LED source with high-reflection anodized aluminium body. Etched tempered glass screen glued flush to the lighting body with silicon.

Power connection to the mains to be carried out outside the fixture, without the need to open, by means of a pre-installed IP65 connection device suitable for cables with a diameter between 6 and 13 mm.

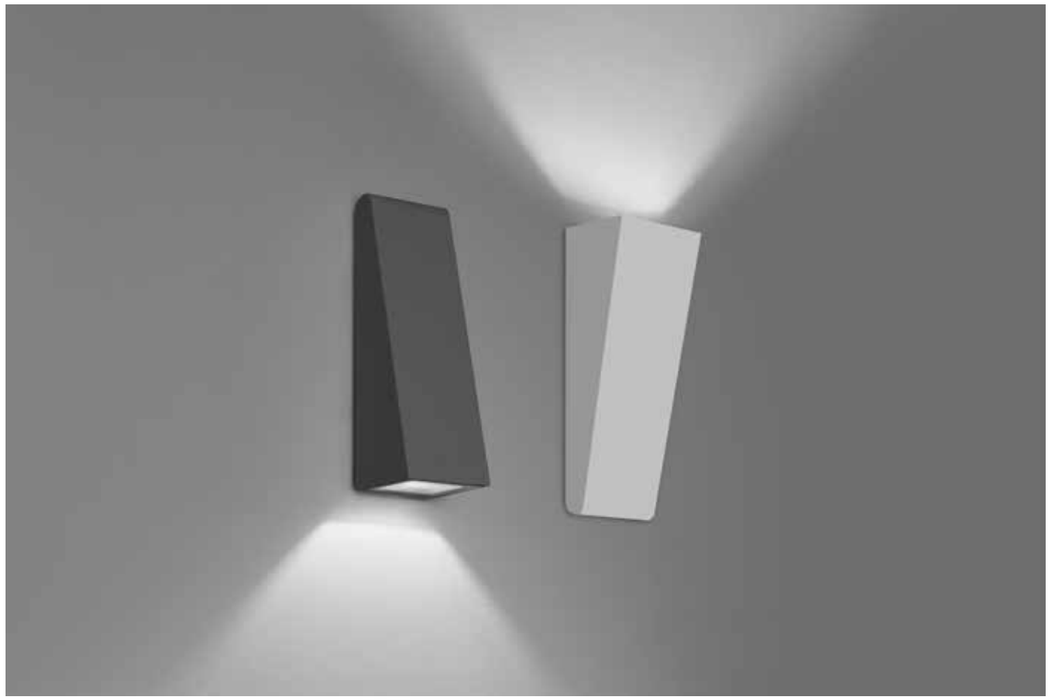

Wall installation by means of a bracket in folded steel sheet to which the fixture is fastened with two screws.

Screws in AISI 316 stainless steel.

All the components in die-cast aluminium and the steel bracket for wall or floor fixing are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1.

ENEC approved.

Nuda

Ernesto Gismondi
↪ 2010

Series of light fixtures with direct unilateral or bilateral emission, with high-performance LED light sources.

Floor and recessed installation.

Available in 3 finishes: grey-white painted (RAL 9002), dark grey and rust painted.

Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

AISI 316 stainless steel screws and silicone seal gasket.

Technical features of light fixtures in compliance with EN60598-1.

ENEC approved.

Nuda floor

Available in unilateral and bilateral emission version and in two heights (h 50cm and h 100cm).

Consist of lamp, support pole and ground mounting plate.

Lamp unit in die-cast EN-AB 47100 aluminium.

UV resistant diffuser in shock resistant polycarbonate with satin finish.

Specular reflector in aluminium. It conveys and diffuses the luminous flow downwards to ensure visual comfort.

Support pole in extruded EN-AW-6060 aluminium, chromate treated and painted.

Mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.

Provided with IP67 cable and connector for the mains connection.

Nuda recessed

Consist of lamp and recessing box for recessed wall installation.

Lamp unit in painted die-cast EN-AB 44100 aluminium, complete with holding plate for electrical components.

Specular reflector in aluminium. It conveys and diffuses the luminous flow downwards to ensure visual comfort.

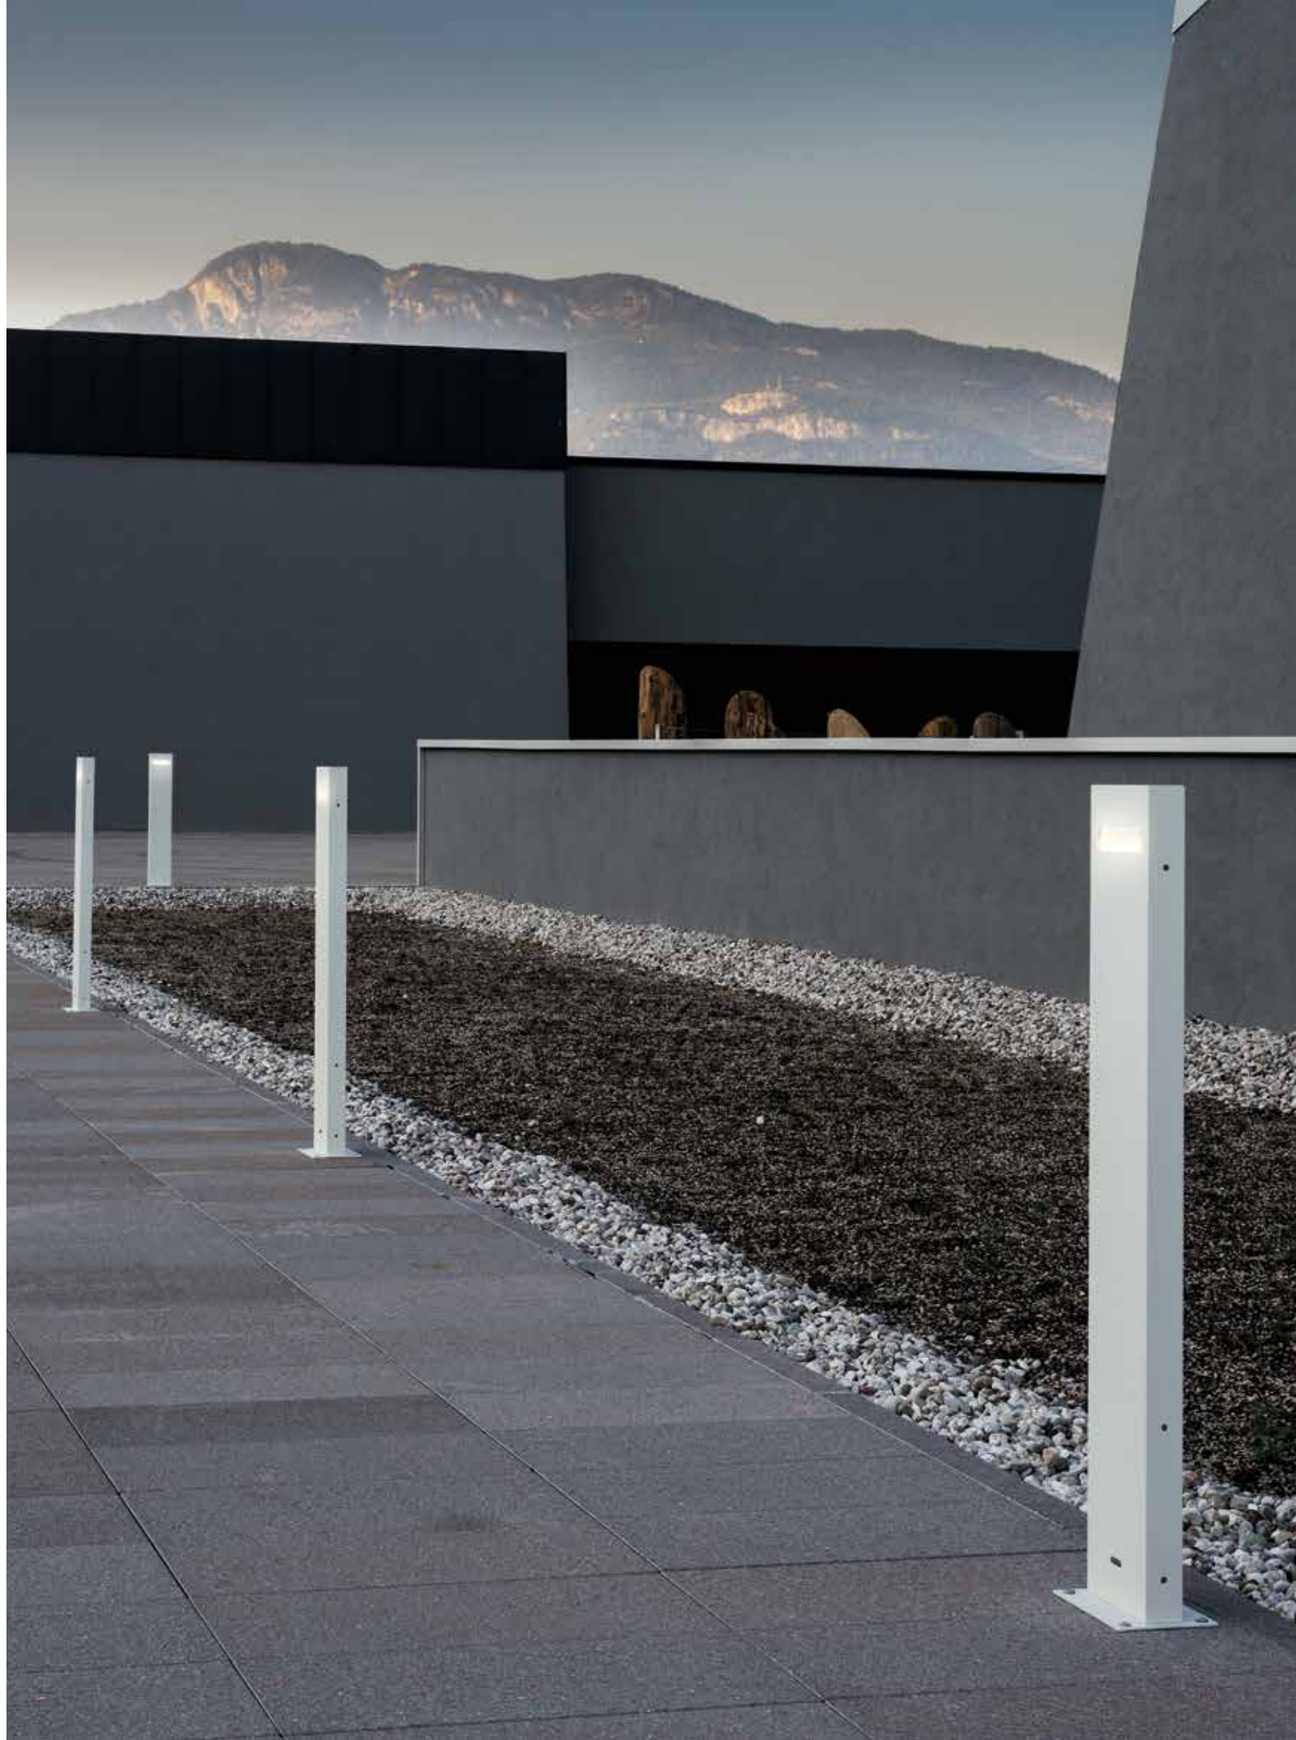

UV resistant diffuser in shock resistant polycarbonate with satin finish.

Aesthetic cover in painted aluminium.

Provided with IP67 cable and connector suitable for H07RN-F cables with a diameter from 5 to 13.5 mm for the mains connection.

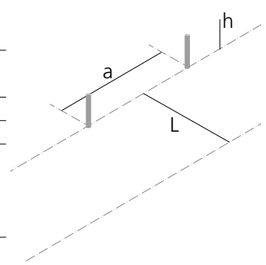

Recessing box in reinforced polymer, can be ordered separately.

Ciclope

Alessandro Pedretti
(Studio Rota & Partners)
↪ 2009

Lighting system with diffuse unilateral or bilateral emission, with high-performance LED light sources.

Light emission is obtained by the combination of six monochromatic LED light sources, a reflector and an opaline diffuser.

Floor in unilateral and bilateral emission, wall or recessed installation.

Available in 3 finishes: light grey (RAL 9002), anthracite grey and rust painted.

Technical features of light fixtures in compliance with EN60598-1.

ENEC approved.

Lighting unit consists of: frame in reinforced polymer; diffuser in light-diffusing polycarbonate; plate in pickled, machined and galvanised steel; watertight gasket in silicone rubber; LED circuit; electronic ballast; reflector in painted spun aluminium; PG13.5 cable gland, H05RN-F cable and IP65 electrical connection device suitable for cables with a diameter between 6 and 13 mm to allow electrical interfacing with the external mains without the need to open the fixture.

The lighting unit houses the electrical components and sources.

Aesthetic cover in die-cast EN AB-47100 aluminium. The components in die-cast, extruded aluminium and steel are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

The elements are fixed together by means of screws. All the locking screws used outside the fixture and inside the stem are in AISI 304 stainless steel.

Ciclope floor: available in two heights (h 50cm and h 90cm), stem in extruded EN AW-6060 aluminium. Ground mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.

Ciclope recessed: recessing box in reinforced polymer, can be ordered separately.

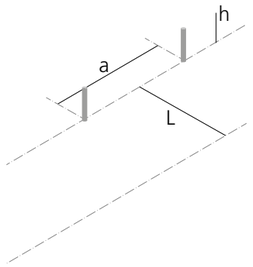

Ciclope wall: box in extruded EN AW-6060 aluminium.

Chilone

Ernesto Gismondi
↪ 2009

Series of light fixtures with direct emission, with high-performance LED light sources.

Floor, pole or wall installation.

Available in 3 finishes: light grey painted (RAL 9002), anthracite grey and rust painted.

Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

AISI 316 stainless steel screws and silicone seal gasket.

Provided with IP67 cable and connector for the mains connection.

Technical features of light fixtures in compliance with EN60598-1.

ENEC approved.

Consists of lamp, lamp support and: wall support (Chilone wall), ground fixing pole (Chilone pole), ground mounting plate (Chilone floor).

Lamp unit in die-cast EN-AB 47100 aluminium.

UV resistant diffuser in shock resistant polycarbonate with satiny finish.

Lamp support in extruded EN-AW-6060 aluminium.

Chilone wall: it can be installed with the light pointed either downwards or upwards. Wall support in steel included.

Chilone pole: height 250 cm, ground fixing pole in painted extruded EN-AW-6060 aluminium. It must be installed by means of a proper foundation plinth.

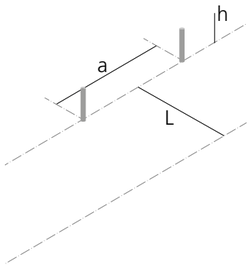

Chilone floor: available with downward emission in two heights (h45cm and h 90cm) and with upward emission (Chilone Up). Support pole in extruded EN-AW-6060 aluminium, chromate treated and painted. Mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.

Granito

Ernesto Gismondi
↬ 2010

Light fixture with metal halide sources.

The four light beams projected through the fissures on the sides make it particularly suitable for lighting drives or creating light effects in parks and gardens.

Available in two heights (h 30cm and h 60cm).

Available in 2 finishes: anthracite grey and Cor-ten (weathering steel).

Transparent sodium-calcium bulb protection glass.

Ground mounting plate in steel with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

AISI 316 stainless steel screws and silicone seal gaskets.

Electronic ballast.

Suitable for watertight connection.

Technical features of light fixtures in compliance with EN60598-1.

ENEC approved.

⚠ The colour of Cor-ten steel may change in time depending on weather conditions. Before stabilization, Cor-ten steel may release rust powder that may stain the surface where it is placed. Artemide recommends not to position it on sensitive surfaces, such as clear stones, marbles, etc.

Ranco (Varese) - IT

Calumet

Ernesto Gismondi
↪ 2012

Lighting system with single or double emission, with high-performance LED light sources combined with lenses which optimize the light emitting efficiency of the beams and determine their spread.

Available in two sizes: ø 8 e ø 13 cm.

Ceiling and wall installation.

Available in two finishes: light grey and anthracite grey painted.

Wall version with single or double emission.

Consist of lighting body, lighting cap and wall fixing bracket / ceiling fixing flange (in EN AW-6060 aluminium)

Cylindrical body in EN AW-6060 aluminium containing the electronic power supply components.

Optical lighting body in EN AW-6060 aluminium.

Led and collimator lenses which swing by means of an aluminium bracket.

Diffuser in toughened glass.

Wall fixing bracket in bent steel.

Water tight silicone gaskets.

Electronic ballast integrated in the body.

PMMA lenses with narrow (wall-version) or wide (ceiling-version) beam.

Wall version: IP65 electrical connection device suitable for cables with a diameter between 6 and 13 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.

Ceiling version: wiring to be made inside the fixture, by piercing a membrane fairlead IP65 suitable for of 6-13mm diameter cables.

All fixing dowels used outside the fixture are in AISI 304 stainless steel.

The components in die-cast aluminium and the steel bracket for wall fixing are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1.

Molla

Ernesto Gismondi
↪ 2011

Light fixture with 2 combined light beams: the large one with lighting function and the narrow one with decorative function.

Wall installation. The fixture can be installed with the main beam pointed either downwards or upwards according to the kind of lighting desired (direct or indirect).

The large beam is obtained by the combination of a monochromatic LED light source with a reflector. The narrow beam is obtained by the combination of a monochromatic LED light source with a high-performance projector.

Available in two finishes: light grey and anthracite grey painted.

Consists of lighting cap unit and terminal board fixed together by means of locking screws.

Cap and terminal board in die-cast EN AB-47100 aluminium.

Watertight gasket in silicone rubber.

Electronic ballast integrated in the fixture.

Projector consists of a body in reinforced polymer and PMMA lenses.

Tempered and silkscreened light-diffusing glasses, siliconed flush with the lighting cap.

Power connection to the mains to be carried out outside the fixture, without the need to open it, by means of a pre-installed IP65 connection device suitable for cables with a diameter between 6 and 13 mm.

Wall fixing by means of a bracket in folded steel sheet to which the fixture is fastened with two screws.

Locking screws used outside the fixture in AISI 316 stainless steel.

Die-cast aluminium and bracket painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1.

Effetto

Ernesto Gismondi
↳ 2011

For further information on Effetto
↳ visit artemide.com

Light fixture with 1, 2 or 4 light beams using monochromatic LED light sources together with light-diffusing lenses which optimize the optical performance of the beams and establish their width. Designed to create geometric lights of scenic effect, it is available with beams of the same spread or with combined beams.

Beam spread 2,6° / 38° (Effetto Round) and 3,6° / 46° (Effetto Square).

Wall installation.

Available in two shapes: square and round and in two finishes: grey-white painted and rust painted.

Consists of lighting cap unit and terminal board fixed together by means of locking dowels.

Cap in die-cast EN AB-47100 aluminium.

Terminal board in reinforced polymer.

Watertight gasket in silicone rubber.

Electronic ballast integrated in the fixture.

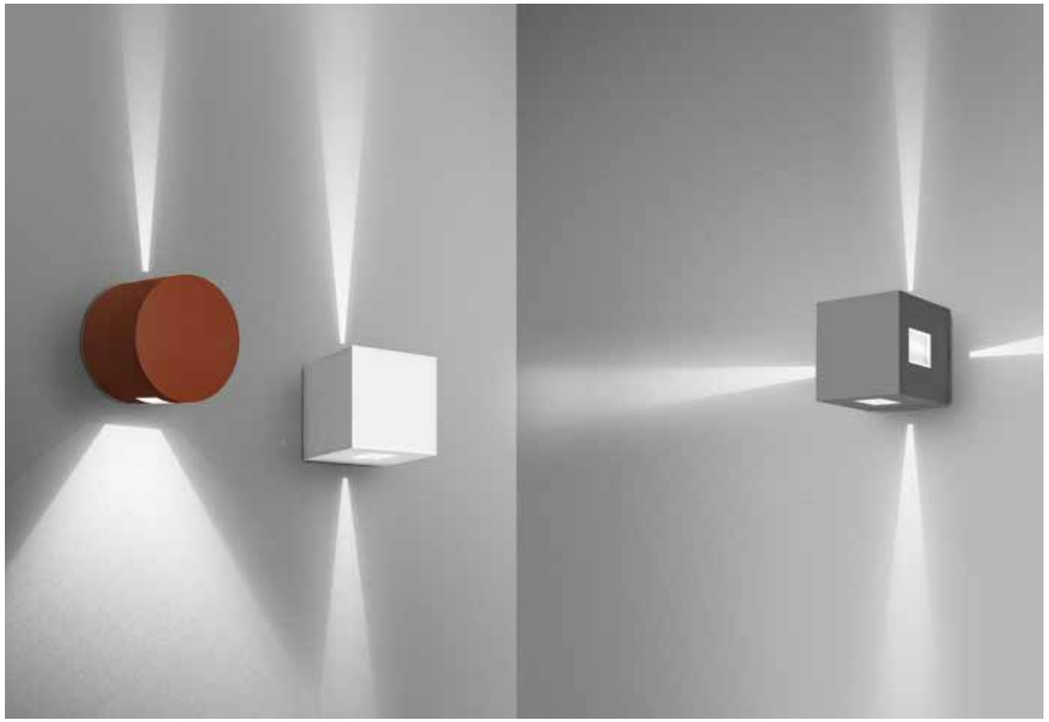

PMMA lenses siliconed flush with the cap to obtain two different beam angle opening (narrow and wide).

Wiring to be carried out inside the terminal board by piercing an IP65 membrane grommet suitable for cables with a diameter of 6-13 mm.

Locking dowels used outside the fixture in AISI 316 stainless steel.

Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1.

Tolomeo XXL

Michele De Lucchi, Giancarlo Fassina
↪ 2009

Light fixture with direct emission, with fluorescent or LED.

Available with base or fixed support (pivot) made of mass-coloured concrete.

Diffuser in mass-pigmented polypropylene, screen in light-diffusing silkscreened methacrylate, reflector in painted aluminium.

Mobile-arm structure in extruded EN-AW-6060 aluminium with bright anodizing treatment.

Polished-painted articulations in die-cast EN-AB 46100 aluminium.

Adjustment system in AISI 316 stainless steel.

Silicone seal gaskets.

Suitable for watertight connection.

Electronic ballast.

Technical features of light fixtures in compliance with EN60598-1.

ENEC approved.

Tolomeo Outdoor

Michele De Lucchi, Giancarlo Fassina
↪ 2015

Floor, suspension, and hook, as well as lampshade and lamppost versions, made with materials and finishes suited for outdoor use.

The LED source is contained within a diffusing cap fitted inside a clear IP65 plastic element.

The suspension version has protection rating IP65, whereas the floor and hook versions have protection rating IP44.

All the versions of Tolomeo Outdoor are available with or without lampshade.

The frames with lighting body of the lamppost and lampshade versions have different features.

Light fixture with high-performance LED light sources.

Ceiling installation.

Two different housing depths.

Round and square version in five sizes.

Consists of body, frame, glass diffuser, fixing springs (Ego Flat and Ego 55-90), fixing brackets (Ego 150-220-320).

Body in EN AB-44100 aluminium, silicone gaskets.

Frame in aluminium or stainless steel AISI 316.

Black silkscreened tempered glass, 8mm-thick.

Fixing springs in harmonic iron.

Power connection to the mains by means of a H05RN-r cable and IP68 electrical terminal board, supplied with the fixture.

Glass surface temperature lower than 40°C.

Fixed and adjustable optics. PMMA lenses in 3 different versions of beams.

Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, anti-oxydant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1 and part 2-13.

Ego downlight
↪ vetro

Ottica Extra Spot 6°

Permette di concentrare il flusso luminoso e di evidenziare particolari evitando la dispersione nell'ambiente.

Ottica Wide Flood 40°

Permette di ottenere flussi luminosi ampi adatti per illuminare porzioni vaste.

Ottica Ellittica EL

Fornisce una distribuzione ellittica del flusso luminoso.
Adatta per un effetto wall washer delle pareti.

Ego walk/drive over typologies

EGO

EGO FLAT

Light fixture with high-performance LED light sources.

Recessed ground installation.

Walk-over and drive-over versions.

Depth of recess box:
Ego WO/DO: 110-120 mm
Ego Flat WO: 60 mm

WO/DO round and square version, each one in 5 different sizes.

Fixture consisting of body, frame, glass diffuser, housing.

Aluminium body EN AB-44100 with silicone gaskets.

All versions are available with stainless steel frames.
Ego 55-90 / Ego flat 55-90 also available with polished aluminium frame.
Ego 150-220 / Ego flat 150-220 also available with 8mm-thick glass flush with the floor.

Housing in composite techno polymer, to be ordered separately.

Ego Flat WO H05RN-F feeding cable length: 300 cm.
Ego WO/DO feeding cable:
H05RNF 2x1 for Ego 55 - 90,
H05RNF 3x1 for Ego 150,
H07RNF 3x1 for Ego 220 - 320, cable length 30 cm.

All Ego versions (excluding Flat version) are supplied with electronic power supply inside the luminaire body. For 55 and 90 versions 24 V power supply and remote power supply to be ordered separately.

All Ego Flat can be operated by a remote power supply to be ordered separately. Connection cable includes a IP68 electrical terminal board.

Housing locked by anti-vandal TORX screws in AISI 316 stainless steel.

Glass surface temperature below 40°C.

Fixed and adjustable lenses in PMMA in 3 versions with different beam angles.

Die-cast painted aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1 and part 2-13.

Megara

Michele De Lucchi
↳ 2011

Light fixture with high-performance LED light sources.

Drive-over recessed floor installation with floor-protruding cap. All the versions are drive-over up to 5000Kg. Due to the low height of the cap, Megara 90 is also suitable for installation in walk-over areas, being careful to avoid areas of direct transit (near walls, buildings, etc.). Cap's temperature 35° C.

3 sizes (90, 150, 220 mm).

Composed by body, cap, diffuser, recessing box.

Body and cap in painted EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable (H07RN-F for versions 90 qnd 150, H05RN-F for version 220).

Electronic ballast integrated in the body.

Diffuser in UV resistant polycarbonate.

Power connection to the mains by means of the IP68 connector supplied with the light fixture, which can be housed in the recessing box and is suitable for cables with a diameter from 5 to13.3 mm.

Fixing to the recessing box is ensured by means of anti-vandal screws TORX.

Recessing box for laying in reinforced polymer to be ordered separately.

Radial emission beam optic.

1, 2, 4 beam and full configurations.

Screws in AISI 316 stainless steel.

Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1 and part 2-13.

Microled

↪ 2013

Light fixture with high-performances LED light sources.

Floor installation.

Consists of diffuser, body, ring, housing.

Diffuser in glass, 3mm-thick.

Body in technopolymer, with or without frame.

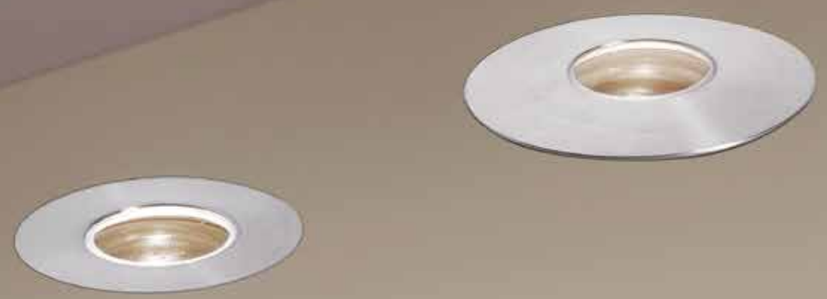

Ring in stainless steel AISI 316L.

Housing in plastic material (available separately).

Remote driver.

Electrical connection to the ballast by means of a two-pole H05RN-F cable and appropriate IP68 terminal board.

Aria

Massimo Sacconi
↳ 2012

Light fixture with high-performance LED light sources.

Wall or ceiling installation.

Composed by: frame (aluminium), body (injection mould of aluminium), asymmetrical reflector, fixing springs or housing (bend metal - to be ordered separately).

Body and frame are painted with outdoor treatment three stages: nanotechnologies, antioxidant primer, polyester paint.

Metalized polycarbonate reflector.

Silicone gasket.

Protection screen in tempered glass, 3mm-thick.

Electrical connection to the ballast by means of a cable with appropriate terminal board supplied with the fixture.

Technical features of light fixtures in compliance with EN60598-1.

For further information on Faci
↪ visit artemide.com

Light fixture with high-performance LED light sources.

Recessed wall installation.

3 sizes (120, 240 and 360 mm length).

Consist of by lamp body and recessing box.

Body in high-resistance reinforced polymer. The lamp body is snap-fitted into the recessing box, then it is fixed by means of two anti-vandal screws Torx. This product is suitable for areas at risk of vandalism.

Aluminium reflector conveying and diffusing the light flow downwards to ensure an even floor lighting and visual comfort without glare.

Diffuser in 8mm-thick silkscreened tempered glass to ensure higher vandal-proof resistance.

Front frame in chromed zamac.

Recessing box for laying in reinforced polymer, with low depth, can be ordered separately.

Wiring inside the lamp body with IP65 grommet suitable for cables with a diameter of 8-12 mm for the connection to the mains.

AISI 316 setscrews and silicone seal gaskets.

Technical features of light fixtures in compliance with EN60598-1.

Installation must be carried out by specialized personnel. Carefully follow the instructions.

Lighting unit

Light fixture with high-performance LED light sources.

Recessed wall installation.

Consist of 3 sizes (120, 240 and 360mm length).

Composed by lamp body and recessing box.

Body in high-resistance reinforced polymer. The lamp body is snap-fitted into the recessing box, so the final product has no visible screws and the glass is flush with the wall.

Aluminium reflector conveying and diffusing the light flow downwards to ensure an even floor lighting and visual comfort without glare.

Diffuser in 6mm-thick silkscreened tempered glass.

Recessing box for laying in reinforced polymer, with low depth, can be ordered separately.

Wiring inside the lamp body with IP65 grommet suitable for cables with a diameter of 8-12mm for the connection to the mains.

AISI 316 setscrews and silicone seal gaskets.

Technical features of light fixtures in compliance with EN60598-1.

Appareil équipé de source LED à haut rendement.

Installation au sol, au plafond ou au mur.

Composé d'un corps, d'un cadre, d'un diffuseur en polycarbonate.

Corps et cadre en aluminium anticorrosion, anodisé.

Diffuseur en polycarbonate opalin, épaisseur 3mm.

Ballast déporté.

Connexion au réseau électrique à l'aide d'un câble H05RN-F et d'un bloc
terminal IP68, fournis avec l'appareil.

Optique fixe. Lentilles en PMMA disponibles en 3 faisceaux différents.

Piquet pour installation au sol.

Caractéristiques techniques des appareils d'éclairage conformes à la norme EN60598-1 et partie 2-13.

Le montage doit être effectué par du personnel spécialisé.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Medium luminous flux to highlight details, large
sections of windows.

Elliptical optic

Elliptical distribution of the luminous flow suitable for wallwasher effect.

Light fixture with high-performance LED light sources.

Ground, floor, wall installation.

Consists of body, frame, glass and bracket.

Aluminium folded sheet bracket. All aluminium components are anodized.

Diffuser in glass, 10mm-thick.

Gaskets in EPDM.

Remote driver supplied separately.

Power connection to the driver by means of H05RN-F cable and IP68 electrical terminal board, supplied with the fixture.

Fixed optic. PMMA lenses in 3 different versions of beams.

Picket for ground installation in galvanized sheet iron.

Painted aluminium with 2-stage outdoor treatment: antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1 and part 2-13.

Installation must be carried out by specialized personnel.

Extra Spot optic 6°

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Wide Flood optic 40°

Wide luminous flow suitable for lighting large areas.

Elliptical optic EL

Elliptical distribution of the luminous flow suitable for wall washer effect.

Light fixture with adjustable direct emission, with high-performance LED light sources.

Floor, wall and eaves installation.

2 sizes: Epulo 13 and Epulo 18.

Available in two finishes: grey-white painted (RAL 9002) and anthracite grey painted.

Consists of lighting unit, terminal board and fixing bracket. Rotation on the base +/-180°, side body tilt +/-45° and front body tilt +0/-90 by means of a spherical joint allowing an accurate adjustment.

Body and terminal board in EN AB-47100 aluminium, fixing bracket in stainless steel, silicone gaskets. Electronic ballast integrated in the body.

Silkscreened tempered glass siliconed flush with the body to avoid backwater.

The device is provided with a safety cable with hook to allow easy wiring during its installation in any position.

IP67 connector for electric connection to the mains, it can be housed in the terminal board compartment and is suitable for cables with a diameter of 5-13.5mm.

PMMA lenses in 3 different versions of beams.

Screws in AISI 316 stainless steel.

The components in die-cast aluminium and the steel bracket are painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1 and part 2-5.

Danese Milano, Milan - (IT)

Falange

Wilmotte & Industries
↳ 2011

Adjutable light fixture with direct emission, with high-performance LED light sources.

Ground, wall, eaves installation.

2 sizes: 134 x 134, 238 x 134 mm.

Composed by adjustable lighting unit and support (housing the wiring) by means of a graduated metal ring allowing an accurate adjustment. Positioning is maintained by means of locking dowels.

Body and support in EN AB44100 aluminium, silicone gaskets.

Electronic ballast integrated in the body.

Silkscreened tempered glass siliconed to a secondary frame.

Wiring to be carried out by means of plug IP 68.

PMMA lenses in 3 different versions of beams.

AISI 316 stainless steel screws.

Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1 and part 2-5.

LineaLed - Drive over

Carlotta de Bevilacqua
↳ 2010

Walk over and drive over approved up to 5000Kg.

Light fixture with high-performance LED light sources.

Walk-over and drive-over recessed floor installation.

Monochromatic or RGB light.

Composed of body, diffuser, recessing box, closing end caps, junctions.

Body in extruded EN AW6060 T5 aluminum.

Opal non-slippery tempered glass 8mm-thick.

Glass surface temperature lower than 35°.

Profile end caps in aluminum EN AW 6060.

Recessing box for laying in stainless steel AISI 304.

Recessing box end caps and junction in stainless steel AISI 304.

Electrical connection to the ballast by means of a two-pole cable H05RN-F, with IP68 quick-release terminal block which is supplied with the fixture and can be housed in the recessing box.

24Vdc remote ballast.

Body fastened to the recessing box by means of proper pre-stressed steel springs supplied with the fixture.

Painted profile with 2-stage outdoor treatment: primer, outdoor paint.

RGB version with Full Colour RGB LEDs.

Technical features of light fixtures in compliance with EN60598-1.

LineaLed - Wallwasher

Carlotta de Bevilacqua
↳ 2011

Walk over and drive over approved up to 5000Kg.

Light fixture with high-performance LED light sources.

LineaLed Wallwasher: walk-over and drive-over recessed floor installation. Consist of body, diffuser, recessing box, closing end caps, junctions. Body fastened to the recessing box by means of proper pre-stressed steel springs supplied with the fixture.

LineaLed Wallwasher adjustable: Wall or ceiling installation. Consist by body in extruded aluminium, protection glass, adjustable die-cast aluminium brackets.

Body in extruded EN AW6060 T5 aluminum.

Transparent non-slippery tempered glass 8mm-thick. Glass surface temperature lower than 50°.

Profile end caps in injection-mould polycarbonate with silicone gasket.

Recessing box for laying, recessing box end caps and junction in stainless steel AISI 304.

Electrical connection to the ballast by means of a two-pole cable H05RN-F; with IP68 quick-release terminal block which is supplied with the fixture and can be housed in the recessing box (LineaLed Wallwasher) or with IP68 terminal board supplied with the fixture (LineaLed Wallwasher adjustable).

24Vdc remote ballast.

Optics. PMMA lenses in 3 different versions of beams.

Painted profile and brackets with 2-stage outdoor treatment: primer, outdoor paint.

Technical features of light fixtures in compliance with EN60598-1.

Solar Tree 2nd Generation

Ross Lovegrove
↪ 2017

Solar Tree 2nd Generation develops and opens up to IoT interaction, to create new scenarios and introduce new and unexpected perspectives for future smart cities.

Solar Tree is conceived as a lighting appliance combining the LED-based lighting technique with the solar photovoltaic technology in a very peculiar and innovative design.

The project is aimed, on one hand, at minimizing the environmental impact of the product's use (deriving, in particular, from reduced consumption of energy obtained from fossil fuels), while ensuring that the appliance can provide service continuity and, therefore, the expected luminous performance, without being vulnerable to random weather agents or suffer design imbalance (number of panels, accumulator size) calculated for winter months. Such imbalance implies significant dimensions, weights, and costs and would not ensure continuous operation in off-average weather conditions.

The same logical principles implemented in the automotive sector on electric cars, with hybrid versions taking the lead over pure electric battery-based ones for a number of reasons, such as costs, performance, and state of the art of certain technologies, were used to develop the Solar Tree project by Artemide. With its mixed accumulator/solar and network configuration, it provides the best possible energy saving and functionality combination.

For further information on Solar Tree 2nd Generation
↪ visit artemide.com

→ The structure consists of curved steel poles of different diameters and heights, reaching a maximum total 6.4m height above road level.

→ The system includes 10 “grass blades” with 3mm-thick poles with a 42mm diameter, fitted with 1 1W terminal LED protected by a PMMA diffuser screen, and 10 4mm-thick poles with a 76mm diameter supporting the heads.

→ The heads are composed by an anodized aluminum structure and, in the lower part, of a UV-resistant PC cover, which ensures protection against water and dust. They are all equipped with solar panels.

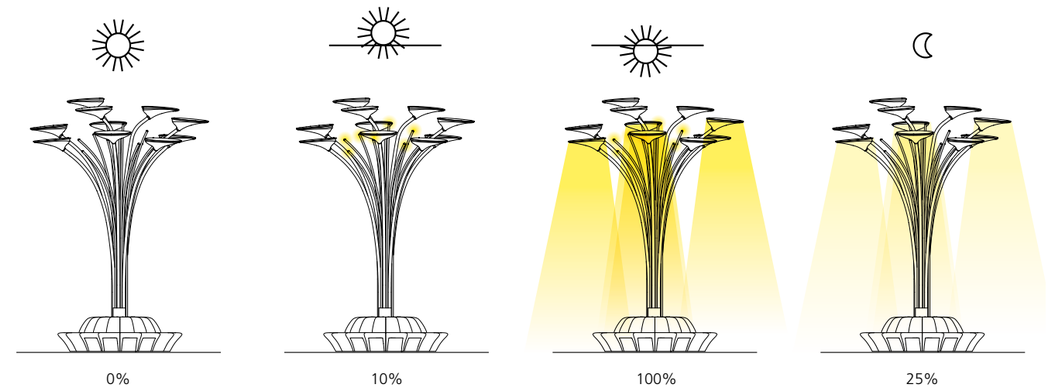

→ The poles are painted with green epoxy paint for exteriors, with iridescent effects on a galvanized base substrate.

→ Four of the ten heads (all with photovoltaic cells on the top) are fitted with a COB LED unit with a warm white colour temperature, for an asymmetric direct emission.

→ The base is made of hot-zinc coated sheet steel designed for enclosure in a plinth of the appropriate size, not provided with the appliance, to be sunk into the ground. Alternatively a base is available, also made of zinc-coated steel with reinforced concrete stabilizing units forming a round seat. In this case the base can simply rest on the ground, even if ground fixing is always recommended.

→ The connection/cabling elements, as well as the control and charging boards, are contained in multiple water-tight boxes with plug-and-socket connectors with protection rating IP65 or higher, and located either in appropriate spots at the foot of the base for easy inspection and maintenance, or inside the concrete stabilizing unit, as specified in detail for the Solar Tree version constituting the object of the supply.

→ The airtight accumulators are contained in specific boxes that allow, on one hand, to protect the battery mechanically and from outer agents and, on the other to release any gas discharges, to be provided for by the law.

CONFIGURATION

The light fitting configuration includes an analysis of the potential incoming energy (geographical location of the light fitting) and a detailed analysis of the physical location of the light fitting (proximity of buildings or trees). Lastly, an analysis of the level of requested service and performance will be implemented (luminance levels, operation hours, potential discontinuity in the service, if any).

TECHNICAL DATA

Total number of heads with solar panels: 10

Solar panel voltage in open circuit: 10V max

Peak power for each panel: about 75 W

Number of heads with COB LEDs: 4

Installed power for each light head: 20 W at 1000mA.

LEDs color temperature: 3000K, 3SDCM

Maximum luminous flux for each head: minimum 2200 lm.

Total number of “stems”: 10

LED power for each “stem”: about 1 W with a power supply of 350mA.

2 batteries

Battery voltage: 12V

Single battery capacity: 230 Ah

2 batteries boxes

1 box for 10 light stem panels wiring connection

1 box of 10 luminous “stems” wiring connection

1 power supply and battery connection box and power supply for LED heads + luminous “stems” + wireless charging / presence sensors (optional)

WORKING

Solar Tree was designed for operation in the HYBRID configuration: in addition to the batteries, generally of the appropriate capacity to contain energy for autonomous operation for up to 7-10 days (with an energy-saving operation cycle, better specified below) with full charge, connection with the mains is provided for energy supply to the appliances (via an appropriate DC power unit connected with the mains) when the batteries are depleted. This is to ensure full service availability even in case of persistent bad weather and/or reduced sun irradiation or 100% use of the luminous performance of the appliance, or anyway when the energy balance is negative.

At dusk (recognized by determination of the dawn and sunset time entered into the calculation routine of the management programme or otherwise), the LED sources are turned on until dawn according to the pre-set duty-cycle.

In “HYBRID” appliances, the system draws energy from the batteries until these fall to the lower charge limit, then switches automatically to the mains.

For appliances based on this configuration, if mains connections coincided with the desired switching time of the public lighting appliances to which the Solar Tree functionally refers, appropriate settings would ensure that the voltage available upon powering is interpreted as a start signal for the Solar Tree and vice versa in case of disconnection from the mains.

WORKING PROGRAMS

Two operating modes are available to satisfy individual needs – Manual and Automatic. The Automatic mode can, in turn, be configured in three different ways, according to the desired performance and energy saving attitude. More specifically: AUTO ECO: 100% operation at times of maximum attendance of the venue, limited operation of the LED heads only in the middle of the night (to ensure average 8 lux ground illumination, the LED sources are turned on and adjusted to approximately 25% of their nominal operating power from sunset to dawn. This mode is recommended to tend to full operation coverage even during the fall/winter in view of energy balance).

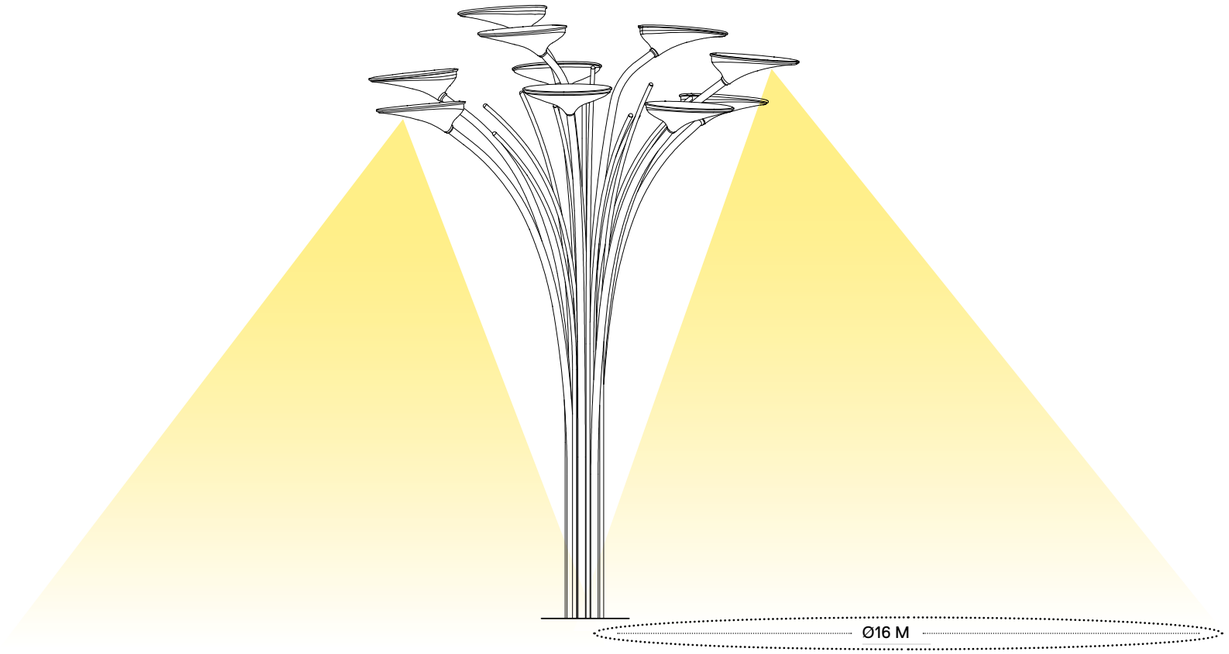

AUTO 100%: an operation mode that tends to ensure maximum operating performance of the appliance adjusting to the increased input of solar energy (if any).

CUSTOMIZED: the user can select the desired operating times and profiles.

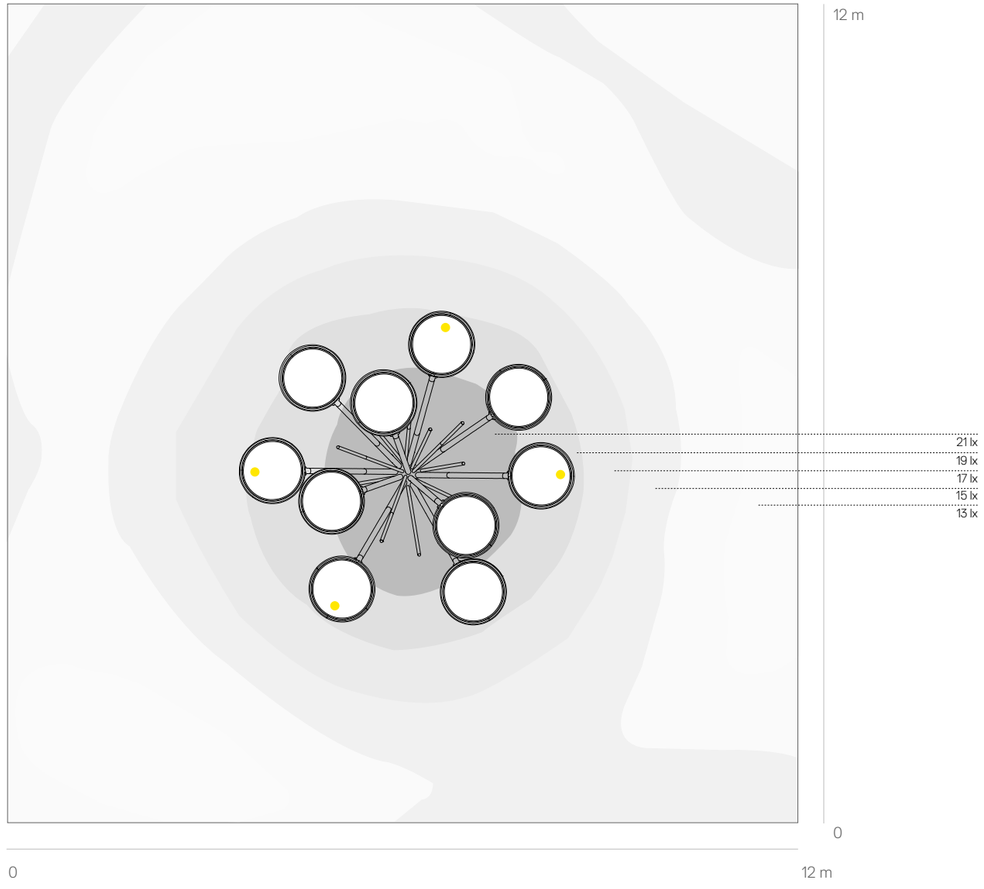

The above-described profiles can be associated with deadlines and, therefore, be selected alternatively.

MANUAL: can be enabled by the user in case of special events and/or needs. The user can access the “fine” adjustment menu for selection on a 0-100% scale of the flow emitted by the individual LED heads and by the bunch of stems. The sources then remain switched on and adjusted according to the user’s settings until switching off or returning to the automatic mode under the user’s control.

Solar Tree 2.0

Ross Lovegrove
↪ 2017

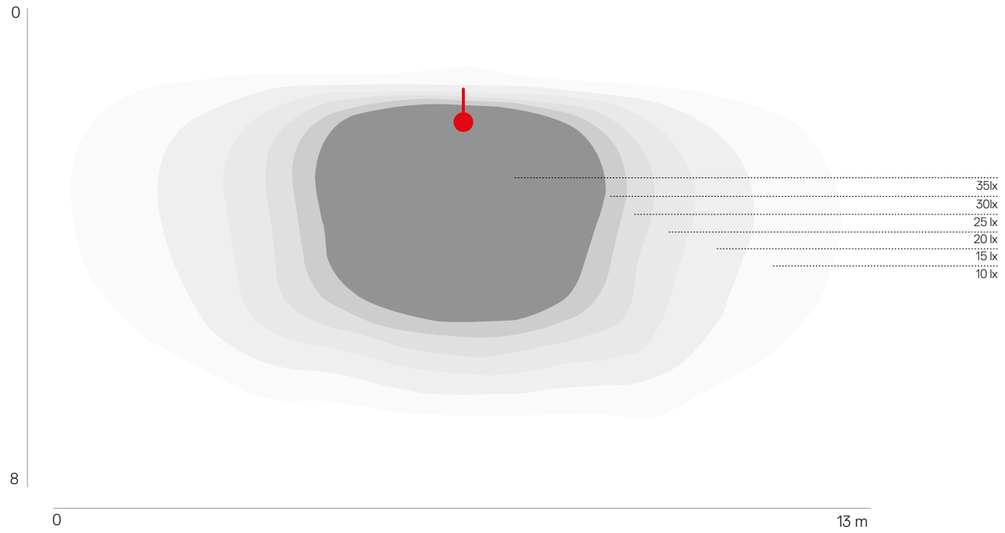

Solar Tree 2.0 has progressed to become a family of modular solutions. Two post heights are the structural features to use to put together various configurations to accomodate the needs of urban areas, with solutions that are not only functional but also interactive and energy-smart, to promote a new sustainable and social dimension for the city and for mankind.

Pole appliance for direct lighting.

Consists of a pole head attached to the pole with grub screws.

The provided EN AW6060 aluminium pole should be bathed in concrete for 0.5m and rise 2.5m up from the ground.

The lighting body is fitted with an IP67 connector supporting cables with 5 to 13.5 mm diameters, to be fitted inside the pole.

The head has a transparent diffuser and a matt white top cap both in impact resistant PMMA. The body fitted inside the pole is made of EN AW6060 aluminium. Silicon seals.

Electronic power pack fitted inside the body suited for 4kV surges.

Internal reflector of metallised zamac fitted by sanded glass filter.

All the screws used for the outside of the product are made of AISI 316 INOX steel.

All the aluminium parts are finished with a 3-stage outdoor treatment: nanotechnologies, anti-oxidant primer, polyester paint.

Light fixture with direct emission, with monochromatic LED light sources.

Floor, wall, eaves installation.

Consists of lighting unit composed by 3 interchangeable optical units, wiring terminal board and fixing plate. Positioning is maintained by means of locking dowels. Tilting with 5° adjustments. Positioning is ensured by means of fastening screws.

EN AB47100 aluminium body and terminal board, silicone gaskets.

Electronic ballast integrated in the body.

Polycarbonate diffuser silicone-sealed to the lens supporting unit.

IP68 connector for the electrical connection to the mains, which can be located in the base compartment and is suitable for 5-13.5 mm diameter cables.

LED circuits with PMMA lenses in 3 beam versions: 9°, 24° and elliptical 12x40°.

All the screws used outside the product are in AISI 316 stainless steel.

All the components in die-cast aluminium are painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidizing primer, polyester paint.

Technical features of the lighting fixtures in compliance with EN60598-1 and section 2-5.

Protection level from 4KV impulse overvoltage.

↪ 2013

Light fixture with direct emission, with monochromatic LED light sources.

Pole installation (pole not supplied).

The appliance is made up of a lighting body and a pole joint, adjustable with 5° angles up to 90° for use with horizontal terminal poles. Positioning is ensured by means of fastening screws.

Die-cast EN-AB 47100 aluminium lighting unit with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Asymmetrical high-efficiency PMMA optical units.High-transparency shock-resistant polycarbonate screens. Consists of 3 interchangeable optical units.

Electronic ballast integrated in the body.

IP68 connector for connection with the mains inside the pole joint, accommodates cables with a 7-12 mm diameter.

AISI 316 fixing screws and silicone gaskets.

Suitable for ME3a and ME4a road lighting.

Technical features in compliance with EN60598-1-2-3.

Protection level from 4KV impulse overvoltage.

ENEC approved.

(Studio Rota & Partners)
↪ 2011

Light fixture with adjustable direct emission, with high-performance LED light sources.

Floor, wall and eaves installation.

2 sizes: Cefiso 14, Cefiso 20.

Available in two finishes: grey-white painted (RAL 9002) and anthracite grey painted.

Consists of adjustable lighting unit and terminal board. A graduated metal ring allows an accurate adjustment. Positioning is maintained by means of locking dowels.

Body and terminal board in EN AB44100 aluminium, silicone gaskets.

Electronic ballast integrated in the body.

Silkscreened tempered glass siliconed flush with the body to avoid backwater.

Wiring to be carried out inside the terminal board by piercing an IP65 grommet suitable for cables with a diameter of 8-13 mm.

PMMA lenses in 3 different versions of beams.

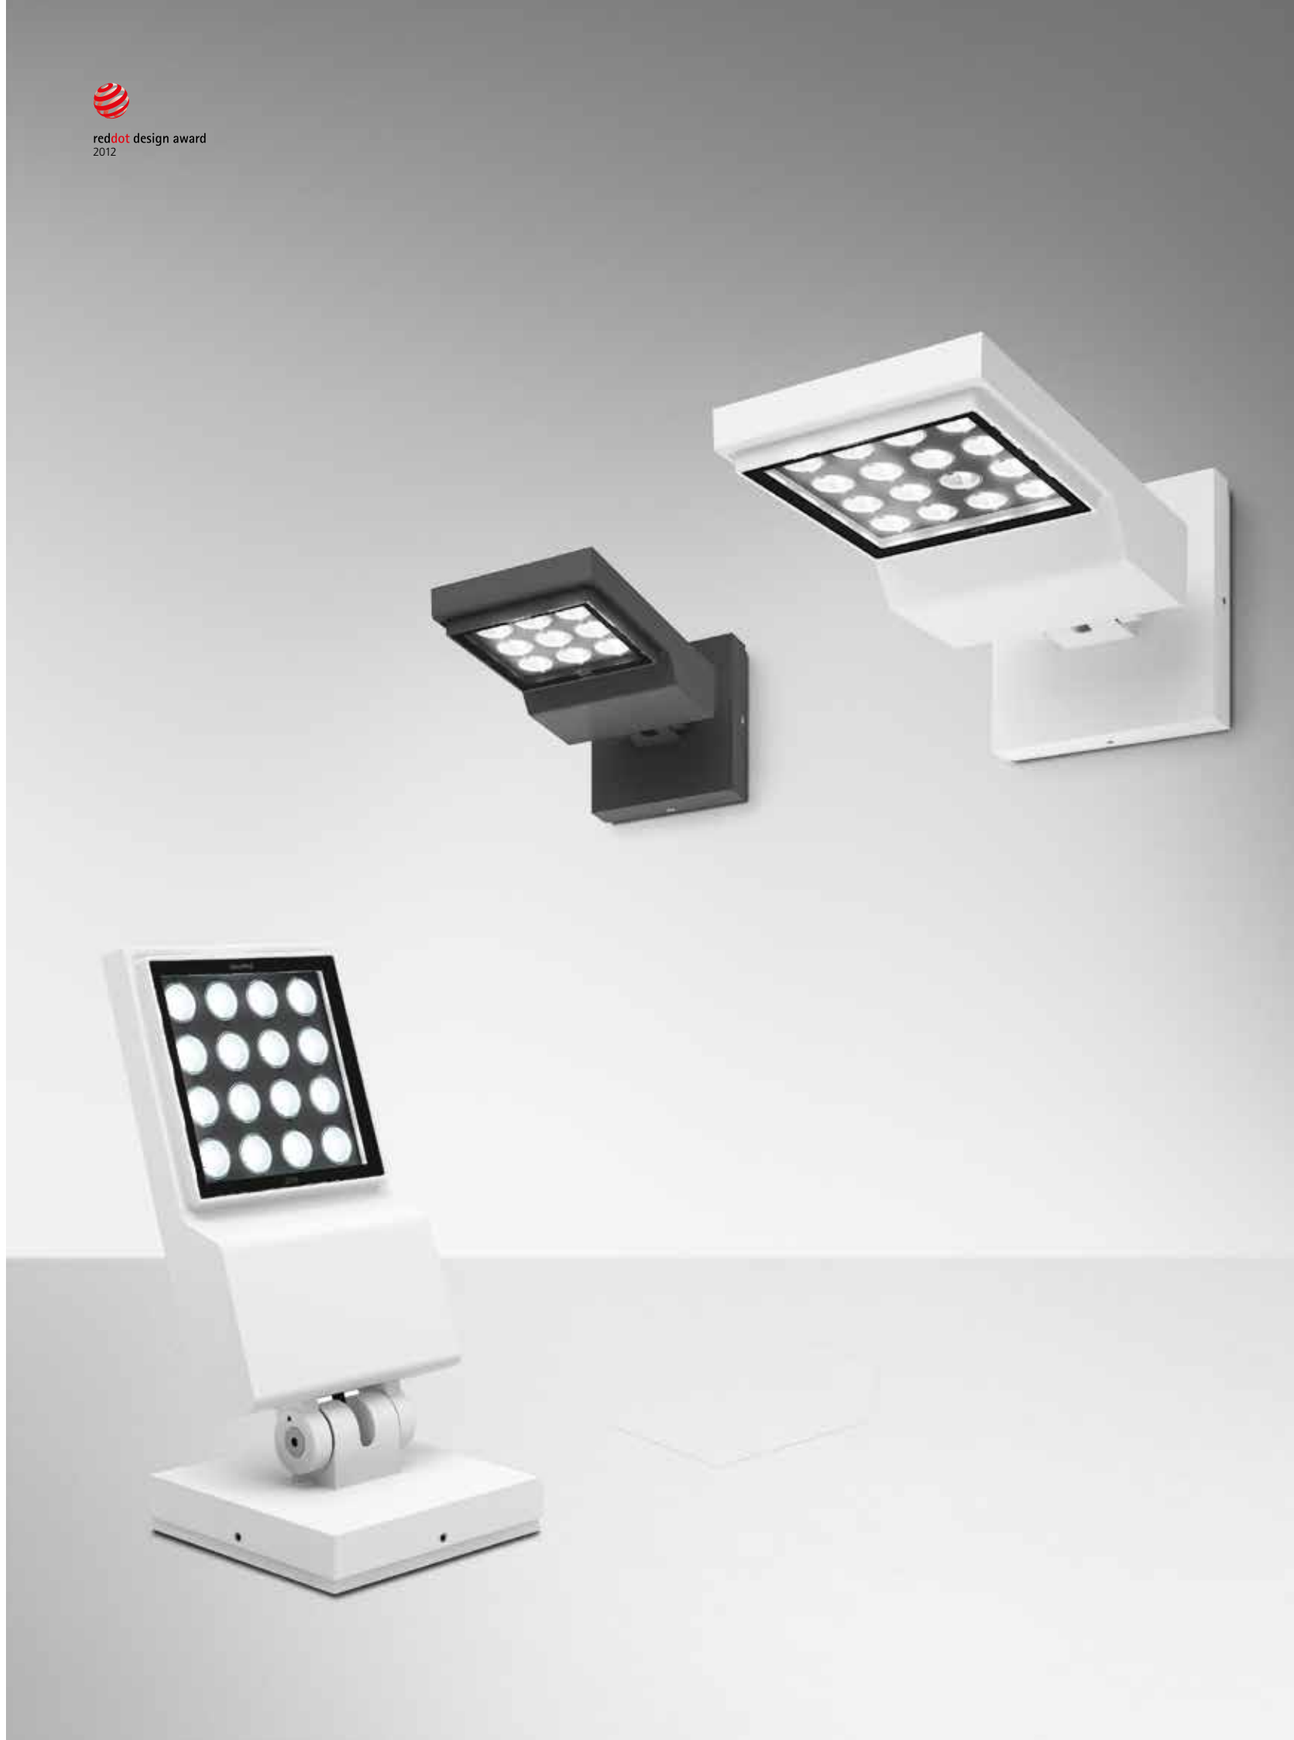

Screws in AISI 316 stainless steel.

Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1 and part 2-5.

↪ 2011

Light fixture with adjustable direct emission, with high-performance LED light sources.

Pole installation.

Available in two finishes: light grey painted and anthracite grey painted.

Consists of lighting unit and pole support. Fixing is maintained by means of locking dowels.

The pole, not supplied, must have a ø 60 mm and h90 mm shank to correctly fix the head- pole. The pole height must be 4 m from the ground to provide a correct surface lighting. In this way, the poles can be installed at a distance of 15 m, suitable to light a 4 m carriageway in compliance with S3 class for cycle tracks.

Body in EN AB44100 aluminium, pole support in galvanized iron, silicone gaskets.

Electronic ballast integrated in the body.

The light fixture is protected from impulse overvoltage up to 4KV both in differential and common mode.

Silicone-sealed silk-screened tempered glass.

IP67 connector for electric connection to the mains, it can be housed in the pole compartment and is suitable for cables with a diameter of 5-13.5 mm.

LED circuits with PMMA lenses with road emission beam.

Screws in AISI 316 stainless steel.

All parts in die-cast aluminium and galvanised iron are painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.

Technical features of light fixtures in compliance with EN60598-1.

Floor, wall, ceiling, eaves installation.

Consists of an adjustable lighting unit and terminal board. Positioning is maintained by means of locking dowels.

The base and the lighting unit are connected by a H05RN-F 3x1 cable.

EN AB47100 aluminium head and terminal board, EN AW6060 aluminium body, silicone gaskets.

Electronic ballast integrated in the body.

Silicone-sealed silk-screened tempered glass.

Wiring to be performed inside the terminal board by piercing an IP65 grommet suitable for 8-12 mm diameter cables.

LED COB with PMMA lens and anodized aluminium reflector in 3 different beam versions.

The optical unit in the narrow-beam version is made up of a N-SF15 optical glass condensation lens and an external PMMA projection lens glued flush with the closing bezel of the lighting body.

Available in 2 different powers.

All the screws used outside the product are in AISI 316 stainless steel.

All the components in die-cast aluminium are painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidizing primer, polyester paint.

Technical features of the light fixtures in compliance with EN60598-1 and section 2-5.

W	Weight	Beam	Flux	CCT
24 W	3,9 kg	AS	1760 lm	3000K

Code
T419800W00

An adjustable direct lighting appliance that consists of a pole joint and an adjustable lighting body. Fixed into position with 6 grub screws.

The pole, not included, should have a 60mm spigot to allow appropriate fixing of the pole head. The pole should be 4m high to ensure appropriate surface illumination. Under these conditions, poles can be installed 15m apart to illuminate a 4m lane, in order to ensure compliance with class S3 for cycling lanes.

Cabling should be accommodated within the pole head, accessible through a lid, using an IP67 sealed connector fit for cables with 5 to 13.5mm diameters.

The lighting body is powered through a H05RN-F 2x1 cable.

Aluminium EN AB47100 head, pole joint, and sealing caps; aluminium EN AW6060 body and glass-holding ring, silicon gaskets. Electronic power unit inside the body.

Suited for public use, protected for 4kV surges, both in the common and in the differential mode.

Moulded silicon road lighting appliance. The tempered glass diffuser glued flush to the lighting body ensures the absence of lighting pollution.

INOX AISI 316 steel screws.

Die-cast aluminium elements painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidizing primer, polyester paint.

The technical features of the appliances comply with the EN60598-2-3 norm.

↪ KEY

CLASSIFICATIONS

Class I
Device in which electrical safety is provided by an additional protective conductor (earth) connected to the metal frame of the lamp.

Class II
Device in which protection against electric shocks is not provided solely by the basic insulation, but which has additional safety measures such as double or reinforced insulation.
These measures do not involve earthing devices and do not depend on the installation conditions.

Class III
Device in which protection against electric shocks is based on a safety extra-low voltage power source and in which no voltages greater than this can be generated.
A class III device does not need earth protection.

APPROVALS

ENEC certification of European conformity.

DALI

Each DALI device occupies one address, unless otherwise specified.

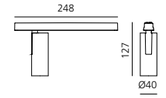

DRIVER

One driver powers one device, unless otherwise specified.

ARTEMIDE APP

When a product managed by Artemide App is installed, the application takes priority on the DALI dimming.

RATES

The diagrams shown in this catalogue are expressed in millimetres.

IP DEGREE OF PROTECTION

Electrical fittings are designed to prevent the intrusion and contact of solids and liquids with live parts.
Resistance to the penetration of solids and liquids is expressed by the acronym IP, followed by two digits that show the degree of protection: the first digit refers to solid bodies, the second to liquids.

First digit
0 No protection.
1 Protected against the penetration of solid bodies larger than 50 mm.
2 Protected against the penetration of solid bodies larger than 12 mm.
3 Protected against the penetration of solid bodies larger than 2.5 mm.
4 Protected against the penetration of solid bodies larger than 1 mm.
5 Protected against dust.
6 Totally dust-tight.

Second digit
0 No protection.
1 Protected against dripping water.
2 Protected against dripping water up to 15° from the vertical.
3 Protected against rain.
4 Protected against splashing water.
5 Protected against water jets.
6 Protected against waves.
7 Water-tight on immersion.
8 Water-tight on submersion.

Artemide always develops its products with special attention to the flexibility of using all possible innovations in the field of LEDs. Many are, in fact, a variety of components available on the market, each with its own special features and suitable for different purposes.

Artemide designs and manufactures all the LED circuits required to turn on the product and operate it correctly over time, in order to prevent any problems and quickly repair any possible defects.

Among the most important types of LED used are:
- 5mm LED, which offers the highest average life span with intermediate light levels;
- SMD-LED, which enables the size to be minimised while maintaining good values of luminous flux;
- Power LED, characterised by a wide choice of power and luminous flux and high life expectancy;
- multi-chip LED, characterised by high power, up to over 20W per module, with high luminous flux.

Artemide offers the possibility of using dimmable systems (1-10V, PUSH button, DALI) or home automation control and lighting management systems by means of specific drivers or ad-hoc solutions. The dimming of the LED allows you to create user-controlled lighting scenarios and adjust the brightness for better viewing comfort.

Artemide is able to c customise and tailor their products to meet the various design requirements, thanks to the electronic control and the flexibility in the choice of LED. To request any type of specific or special project, you can contact our technical department.

Artemide manufactures its circuits with power signals in constant current or constant voltage, equivalent to a connection in series or in parallel to the products, respectively. For the correct selection of the transformer or power supply required to operate the lighting, we recommend you follow these guidelines:

Power calculation for electronic driver with constant current:
To properly select the driver necessary for electrical installation, it is sufficient to sum up the power values of each fixture, expressed in W (Watt), as indicated in the catalogue, and to select a ballast with a rated power 20% higher than the resulting total power value.
7 x Linea LED 8W - 24Vdc
7 x 8W = 56W + 20% = 67,2W -> Power supply T409999

Power calculation for electronic driver with constant current
To properly select the driver with constant current (350/500/700mA), choose the driver following the indication “N° LED max” in the relevant driver table.
3 x Zeno Up 3 - 500mA
3 x 3 = 9 LED x 2W -> Power supply NL19034

Constant current driver for series connection (indoor use)

Code	Description	V (Vac)	I (mA)	P (W)	N°Led max*	L (mm)	W (mm)	H (mm)

Max surge supported by the ballasts: 2kV.
Working temperature of the ballasts: -35°C + 50°C.
The ballasts must not be directly exposed to UV-rays.
When calculating sections/lengths, all the fixtures should supplied with power at the line end.
The IP67 connector supplied with the fixtures is suitable for sections from 1.5 to 4 mm2.
Insulation class II. Earthing is not required.

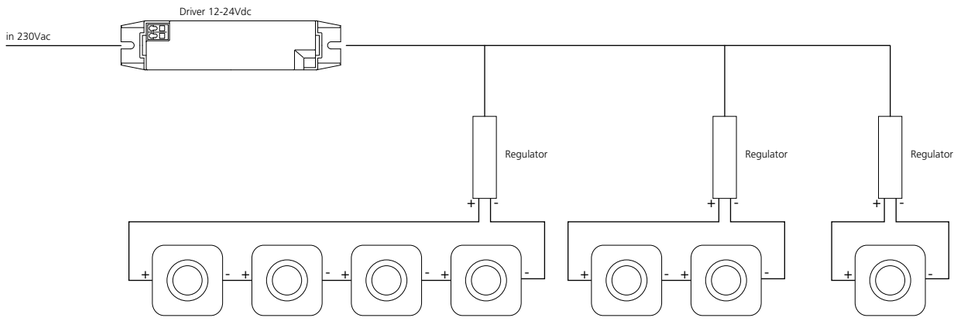

DIMMABLE CONSTANT CURRENT REGULATORS FOR INDOOR USE

Code	Description	V (Vac)	I (mA)	N°Led max	L (mm)	W (mm)	H (mm)

WIRING DIAGRAM FOR RGB LED SYSTEMS RGB

Artemide Drivers and controller allow a flexible and fully programmable dynamic lighting System. The LED Drivers are compatible with the USITT DMX 512 Standard which is a simple, reliable and economic light management and can be easily interfaced with modern domotic Systems. The DMX data lines are electrically opto-isolated to ensure the maximal reliability and to avoid disturbances.

↳ CONTROLLERS DMX

NL19030	DSC30 USB interface - DMX stand alone						
Data In	Data Out	DMX ch.	Scenes	Driver	Data cable	L x W x H (mm)	Weight (kg)
USB	DMX	2x512 stand alone	255	5-5,5Vdc - 300mA excl.	DMX 2m/XLR + USB	80x40x90	0,7
USB	DMX	2x512 live	255	5-5,5Vdc - 300mA excl.	DMX 2m/XLR + USB	80x40x90	0,7
NL19031	5Vdc 300mA plug-in power supply Mini-USB						
NL7833	50cm cable with HE10 connector for keyboard (optional)						

Standard USB-DMX "Stand Alone" interface (512 channels, real-time clock, Local use), software, USB cable.Live mode with a computer; Stand Alone mode. Scenes can be triggered in sequential or using external push-buttons to trigger for instance 8 Scenes. Upon request: connection to external keyboard or to domotics Systems. Needs an external power supply for the Stand Alone mode. Upon request: connection to external keyboard or to domotics Systems.

NL19081	DSC60 USB/Ethernet Interface						
Data In	Data Out	DMX ch.	Scenes	Driver	Data cable	L x W x H (mm)	Weight (kg)
Ethernet	DMX	2x512	250	5-5,5Vdc - 300mA excl.	DMX 2m/XLR + Ethernet	80x40x90	0,7
NL19031	5Vdc 300mA plug-in power supply Mini-USB						

Standard USB and Ethernet DMX "Stand Alone" Interface (2x512 channels), with software, USB cable, 3 DMX 512 universes in live mode with a computer (not included); 2 DMX512 universes in stand-alone mode. Micro sd-card memory for stand-alone use, 8 dry contact trigger ports via HE10 connector (upon request). Clock & calendar function. Stand-alone mode with 5 areas and 250 scenes. WIFI remote control option with smart phone/tablet (IOS, ANDROID, Windows, Linux) to trigger scene. Simply connect to your wireless local network, the WIFI remote control app will automatically find the interface and allow you to control it. A second application, compatible with any IOS and ANDROID smart phones or tablets, allows you to easily create or change the lighting surroundings in each area. In just a few steps, you'll be able to take control of all your DMX fixtures in live, or Stand Alone mode. The simple application can be used by just about everyone in any situation. The interface needs an external power supply for the Stand Alone mode.

NL19080	DSC70 USB Glass Touch Sensitive Control Keypad						
Data In	Data Out	DMX ch.	Scenes	Driver	Data cable	L x W x H (mm)	Weight (kg)
USB	DMX	512	99	5-12Vdc - 300mA excl.	RJ45 + USB	110x86x10	0,2
NL19083	5Vdc 300mA plug-in power supply						

Thanks to the "All-in-One" technology, the DSC70 includes a high-tech keypad, stand-alone memory storage and a powerful DMX512 lighting software package. It offers the best solution for projects requiring a large amount of scenes along with an uncluttered and intuitive interface. The computer programmable, flat wall mounted lighting controller is ideal for LED, RGB & DMX lighting and capable of playing up to 99 scenes, each of which can be modified by touching the mode button to change the dimmer and color. The LED display makes it easy to tell which scene number is playing. The wall panel allows it to be mounted on any single gang wall socket around the world. Large memory capacity, 4 touch sensitive buttons, glass wall-mounted DMX controller. Micro-USB for programming. For PC, Mac & Tablet with USB. 32bit RM technology, software included. Stand alone operation. Ready to use (pre-loaded). The interface needs an external power supply which can be placed in the gang wall socket.

DV1046	NLX 1-100IP	DMX/DALI	95	120-250	24	1xRGB	340x103x61	1,7

PWM Driver for LED units with pre-installed colour-programmes for an independent stand-alone Mode or operation through the DMX512 protocol. The DMX interface allows lighting systems of any size and can be easily integrated with domotic Systems.

Max distance between LED driver and RGB products.

Fixture	Max distance from driver
Spike RGB	20m
Spike IP65 RGB	20m
LineaLed RGB	20m
Dedalo RGB	20m

PWM Driver for LED units with pre-installed colour-programmes for an independent stand-alone Mode or operation through the DMX512 protocol. The DMX interface allows lighting systems of any size and can be easily integrated with domotic Systems.

EXAMPLE OF WI-FI CONTROL OF THE RGB SYSTEM

App/Android
iPod touch / iPhone

Wi-Fi Network with DSC60 and DCS70
Art-Net to DMX converter directly wired
via ethernet to a Wi-Fi Router

LED-Driver DMX compatible equipment

SPECIAL DEVICES FOR PROJECTS

Code	Description	V IN	DMX Channels	IP	Dimensions
NL78070	Splitter DMX 1 in to 8 out				
DV1044	DMX/RDM Splitter - 4CH DIN-RAIL	12-24-48Vdc	4 x 512	10	79x92x62mm DIN RAIL 4mod.
DV1045	PSU 15W 24Vdc 0.63A (for DV1045)	85-264Vac			17,5x90x54,5mm DIN RAIL 1mod.

This is a 4 way DMX splitter, features one DMX/RDM input/THRU and 4 DMX/RDM outputs. This unit takes the incoming DMX signal and splits the signal into 4 separate output channels. Each output channel and the input channel are completely electronically isolated from each other, all channels have independent line drivers to boost the DMX signal. In addition, the timing of outputs are regenerated in digital mode from a 32bit ARM processor.
The RDM return messages are amplified and redistributed on the other outputs. They can be redistributed on other splitters up to a maximum of 3 different splitter.
